Rhoda Cohen
Project Director

Dear Friends:

It is with great honor that I present to you the most comprehensive study of domestic hunger ever undertaken, *Hunger in America 2006*. The release of this study comes on the heels of the most catastrophic hurricane seasons Americans have ever witnessed. We have all seen the devastation Hurricanes Katrina, Rita, and Wilma had on the landscape of the American Gulf as well as our beloved towns and cities. Tragically, as the murky waters began to recede, the faces of poverty and hunger in our country began to emerge.

The aftermath of these brutal storms revealed to the entire nation the hidden crisis of Americans living in poverty. Many of us asked ourselves, "In the land of plenty, how can this be?" Yet, our eyes are not the only ones reopened. Newspapers across the globe pondered the very same question, shocked at the very same images of desperate Americans that could easily have been mistaken for communities of the Third World.

While the face of poverty was partially hidden, so was the enormous generosity and spirit of the American people to join together in a common purpose to help those who are suffering. This unprecedented outpouring of support was demonstrated in record levels of donations to non-profits involved in the disaster-relief efforts; schoolchildren collecting canned goods to send to the impact zone; households taking in distraught families when they had nowhere else to turn; and doctors and other medical professionals working around the clock to provide the medical care needed when there was no hospital left. These few examples illustrate that the moral will to end human suffering, including hunger, is within all Americans.

What you hold in your hands is the most extensive and ambitious study of hunger in America to date. *Hunger in America 2006* involved more than 52,000 face-to-face interviews with clients who sought emergency help through our network of more than 200 food banks and their member agencies. Additionally, more than 30,000 of these member agencies across the country responded to our questionnaire as well.

The numbers contained in this report reflect the stories of thousands of Americans living through disasters everyday, and not just after a hurricane. For these Americans, disaster occurs when faced with the difficult choices of being forced to choose between feeding your family and paying the rent, between filling a prescription and eating dinner, or between providing a warm home for their children and buying groceries.

The struggle to end hunger so that no family has to make these difficult choices confronts this nation. Like the receding of the flood waters, the pages within this report reveal a hidden America that some may have never known existed until now. Hunger in America is not just the

homeless: it impacts our nation's cities and small towns, our wealthy suburbs and our poorest rural counties. Hunger impacts families with jobs and the elderly with medical needs. This study supports the notion that hunger in America does not discriminate.

I extend my deepest thanks to the many America's Second Harvest Network members that participated in this study. The road to this report's publication has been tireless, and the effort our Network has shown towards *Hunger in America 2006* reflects our shared belief in the significance of the data included. In addition, I would also like to thank the thousands of agencies that allowed data collectors to come into their operation to conduct interviews, as well as the time put towards answering detailed questions regarding the features of their operation.

I must also acknowledge the dedicated and conscientious work of the entire research team that made this report possible. The staff of Mathematica Policy Research, Inc. exemplified professionalism and devotion towards this very difficult project, and Dr. John Cook of the Boston University School of Medicine and Dr. Beth Osborne Daponte of Yale University and their team of respected and venerated researchers applied themselves to the task at hand as if it were their very own project.

Finally, I would like to express my grateful appreciation for the tens of thousands of Americans who had the courage to be interviewed and divulge their personal information for this endeavor. It is because of their stories that I am proud to present to you *Hunger in America 2006*.

A handwritten signature in black ink that reads "Robert Forney". The signature is written in a cursive, flowing style with a long horizontal stroke at the end.

Robert H. Forney
President and CEO

ACKNOWLEDGMENTS

We would like to acknowledge the strong support and vision of the staff at America's Second Harvest, Doug O'Brien, Halley Aldeen, and Stephanie Uchima, who provided sound guidance and strong support throughout the research process. The quality of the product was also much improved through the participation of the Technical Advisory Group: John Cook, Beth Osborne Daponte, Steve Carlson, Kirk Johnson, Lynn Parker, Jan Poppendieck, Martha Raske, Ken Rice, Rob Santos, and Tommy Wright.

Also, a number of staff from Mathematica Policy Research, Inc. (MPR) made important contributions, which contributed to the success of the project. Frank Potter, working with Zhanyun Zhao, developed and implemented the sampling plan and developed the analysis weights for the project, with the assistance of Yuhong Zheng and Cathy Lu. MPR internal advisors, including Ronette Briefel, Barbara Carlson, John Hall, Donsig Jang, Dan Kasprzyk, and Stuart Kerachsky made many important suggestions for the analysis and reports.

On the survey side, Daniel Gundersen and Laurie Bach spent long hours obtaining the sample frames from the food banks and providing feedback to them throughout the sampling process. The data they obtained were placed in a comprehensive computer tracking database developed by Shilpa Khambati. Jim Cashion worked tirelessly to update and produce the training video for affiliates to use in training large numbers of field interviewers. He also coordinated the work of our subcontractor, Questar, in processing the completed instruments to generate electronic data files for the analysis team.

Marcia Comly, Loring Funaki, Cheryl Lichtenstein, Michael Smith, Marcia Tobias, and Lawrence Vittoriano provided guidance to the Second Harvest affiliates on an ongoing basis as they implemented the survey work. More than 85 staff at MPR's Survey Operations Center, under the leadership of Susan Golden and Rachel Reed, assisted in reviewing and preparing the completed questionnaires for shipment to Questar.

Jeffrey Holt and Jacob Rugh, with assistance from Amy Zambrowski, provided critical and advanced programming skills on the complex analysis database needed to produce the report. Carlo Cummings-Caci offered extraordinary computer skills in enhancing and implementing a system to expeditiously generate more than 150 local reports from the analysis database. Bill Garrett provided exceptional secretarial support throughout the process. The competency and flexibility demonstrated by all involved were key factors in the success of the project.

1. HIGHLIGHTS OF FINDINGS

This report presents information on the clients and agencies served by the Food Bank of Central and Eastern North Carolina. The information is drawn from a national study, Hunger in America 2006, conducted for America's Second Harvest (A2H), the nation's largest organization of emergency food providers. The national study is based on completed in-person interviews with more than 52,000 clients served by the A2H food bank network, as well as on completed questionnaires from more than 30,000 A2H agencies. The study summarized below focuses mainly on emergency food providers and their clients who are supplied with food by food banks in the A2H network. Here, emergency food providers are defined to include food pantries, soup kitchens, and emergency shelters serving short-term residents. It should be recognized that many other types of provider organizations served by food banks are, for the most part, *not* described in this study. These providers who are not covered included such services as Congregate Meals for seniors, day care facilities, and after school programs.

Key findings are summarized below:

HOW MANY CLIENTS RECEIVE EMERGENCY FOOD FROM THE FOOD BANK OF CENTRAL AND EASTERN NORTH CAROLINA?

- The A2H system served by the Food Bank of Central and Eastern North Carolina provides food for an estimated 294,500 different people annually.
- Approximately 48,100 different people receive assistance in any given week.

WHO RECEIVES EMERGENCY FOOD ASSISTANCE?

A2H agencies served by the Food Bank of Central and Eastern North Carolina provide food for a broad cross-section of households. Key characteristics include:

- 28% of the members of households served by the Food Bank of Central and Eastern North Carolina are children under 18 years old (Table 5.3.2).
- 8% of the members of households are children age 0 to 5 years (Table 5.3.2).
- 18% of the members of households are elderly (Table 5.3.2).
- About 25% of clients are non-Hispanic white, 70% are non-Hispanic black, 2% are Hispanic, and the rest are from other racial or ethnic groups (Table 5.6.1).
- 38% of households include at least one employed adult (Table 5.7.1).
- 70% have incomes below the official federal poverty level (Table 5.8.2.1) during the previous month.
- 5% are homeless (Table 5.9.1.1).

MANY A2H CLIENTS ARE FOOD INSECURE OR ARE EXPERIENCING HUNGER

- Among all client households served by emergency food programs of the Food Bank of Central and Eastern North Carolina, 65% are food insecure, according to the U.S. government's official food security scale. This includes client households who are food insecure without hunger and those who are food insecure with hunger (Table 6.1.1).
- 23% of the clients are experiencing hunger (Table 6.1.1).
- Among households with children, 64% are food insecure and 24% are experiencing hunger (Table 6.1.1).

MANY CLIENTS REPORT HAVING TO CHOOSE BETWEEN FOOD AND OTHER NECESSITIES

- 45% of clients served by the Food Bank of Central and Eastern North Carolina report having to choose between paying for food and paying for utilities or heating fuel (Table 6.5.1).
- 34% had to choose between paying for food and paying their rent or mortgage (Table 6.5.1).
- 36% had to choose between paying for food and paying for medicine or medical care (Table 6.5.1).

DO A2H CLIENTS ALSO RECEIVE FOOD ASSISTANCE FROM THE GOVERNMENT?

- 35% of client households served by the Food Bank of Central and Eastern North Carolina are receiving Food Stamp Program benefits (Table 7.1.1); however, it is likely that many more are eligible (Table 7.2.1).
- Among households with preschool children, 66% participate in the Supplemental Nutrition Program for Women, Infants, and Children (WIC) (Table 7.4.1).
- Among households with school-age children, 54% and 43%, respectively, participate in the federal school lunch and school breakfast programs (Table 7.4.1).

MANY A2H CLIENTS ARE IN POOR HEALTH

- 35% of households served by the Food Bank of Central and Eastern North Carolina report having at least one household member in poor health (Table 8.1.1)

MOST CLIENTS ARE SATISFIED WITH THE SERVICES THEY RECEIVE FROM THE AGENCIES OF THE FOOD BANK OF CENTRAL AND EASTERN NORTH CAROLINA

- 96% of adult clients said they were either “very satisfied” or “somewhat satisfied” with the amount of food they received from their A2H provider; 95% were satisfied with the quality of the food they received (Table 9.2.1).

HOW LARGE IS THE FOOD BANK OF CENTRAL AND EASTERN NORTH CAROLINA?

- The Food Bank of Central and Eastern North Carolina included approximately 815 agencies at the administration of this survey, of which 428 have responded to the agency survey. Of the responding agencies, 325 had at least one food pantry, soup kitchen, or shelter.

WHAT KINDS OF ORGANIZATIONS OPERATE EMERGENCY FOOD PROGRAMS OF THE FOOD BANK OF CENTRAL AND EASTERN NORTH CAROLINA?

- 82% of pantries, 61% of kitchens, and 38% of shelters are run by faith-based agencies affiliated with churches, mosques, synagogues, and other religious organizations (Table 10.6.1).
- At the agency level, 74% of agencies with at least one pantry, kitchen, or shelter and 63% of all agencies including those only with other types of programs are faith-based (Table 10.6.1).

- Private nonprofit organizations with no religious affiliation make up a large share of other types of agencies (Table 10.6.1).

HAVE AGENCIES BEEN EXPERIENCING CHANGES IN THE NEED FOR THEIR SERVICES?

- 63% of pantries, 65% of kitchens, and 60% of shelters of the Food Bank of Central and Eastern North Carolina reported that there had been an increase since 2001 in the number of clients who come to their emergency food program sites (Table 10.8.1).

WHERE DO THESE AGENCIES OBTAIN THEIR FOOD?

- Food banks are by far the single most important source of food for the agencies, accounting for 73% of the food used by pantries, 39% of kitchens' food, and 30% of shelters' food (Table 13.1.1).
- Other important sources of food include religious organizations, government, and direct purchases from wholesalers and retailers (Table 13.1.1).
- 66% of pantries, 57% of kitchens, and 55% of shelters of the Food Bank of Central and Eastern North Carolina receive food from government commodity programs (Table 13.1.1).

VOLUNTEERS ARE EXTREMELY IMPORTANT IN THE A2H NETWORK

- For the Food Bank of Central and Eastern North Carolina, 89% of pantries, 81% of kitchens, and 85% of shelters use volunteers (Table 13.2.1).
- Many programs rely *entirely* on volunteers; 72% of pantry programs and 38% of kitchens have no paid staff at all (Table 13.2.1).

2. INTRODUCTION

Recent government data indicate that at least 13.5 million households in the United States (11.9% of all households) were food insecure in 2004, of which 4.4 million (3.9% of all U.S. households) had experienced hunger at some point in that year. The food insecure households contained an estimated 38 million people, of whom almost 14 million were children. The existence of large numbers of people without secure access to adequate nutritious food represents a serious national concern.¹

An important response to this problem has been the growth of private-sector institutions that have been created to provide food for the needy. In particular, throughout the United States, food pantries, emergency kitchens, and homeless shelters play a critical role in meeting the nutritional needs of America's low-income population. By providing people who need assistance with food for home preparation (pantries) and with prepared food that can be eaten at the agencies (kitchens and shelters), these organizations help meet the needs of people and households that otherwise, in many instances, would lack sufficient food.

America's Second Harvest (A2H) plays a critical role in helping these organizations accomplish their mission. A2H, a network of about 80% of all food banks in this country, supports the emergency food system by obtaining food for the system from national organizations, such as major food companies, and providing technical assistance and other

¹ Mark Nord, Margaret Andrews, and Steven Carlson. "Household Food Security in the United States, 2003." U.S. Department of Agriculture, Food and Nutrition Service, 2004. Economic Research Report No. 11 (ERS-11) October 2005.

services to the food banks and food rescue organizations. A2H also represents the interests of the emergency food community in the national political process.

Over the years, A2H has periodically studied the workings of its network and the characteristics of the clients the network serves, both to assess the severity of nutrition-related problems of the poor in America and to identify ways of increasing the effectiveness of its operations. This report presents the results of the fourth comprehensive study sponsored by A2H. The study provides detailed information about the programs and agencies that operate under A2H network members and the clients the programs serve.

This chapter of the report provides important background for the findings. Subsequent subsections are as follows:

- Highlight the objectives of the study
- Provide an overview of the Second Harvest Network
- Identify the groups of organizations involved in conducting the study
- Provide an overview of the rest of the report

2.1 OBJECTIVES

The Hunger in America 2006 study comprises a national survey of A2H emergency food providers and their clients. The study had the following primary objectives:

- To describe the national demographic characteristics, income levels, food stamp utilization, food security status, and service needs of low-income clients who access emergency food assistance from the A2H network at the national level
- To describe the demographic profiles of clients of local agencies and to examine the ability of local agencies to meet the food security needs of their clients
- To compare data, where possible, between the 2001 and 2005 A2H research studies, to identify trends in emergency food assistance demands, and to relate observed trends to welfare policies

- To compare local-level and national-level data on the characteristics of agencies in describing the charitable response to hunger throughout the nation

The Hunger in America 2006 study was designed to provide a comprehensive profile of the extent and nature of hunger and food insecurity as experienced by people who access A2H's national network of charitable feeding agencies. Information was collected on clients' sociodemographic characteristics, including income and employment, benefits from food stamp and other federal or private programs, frequency of visits to emergency feeding sites, and satisfaction with local access to emergency food assistance. Information obtained from provider agencies included size of programs, services provided, sources of food, and adequacy of food supplies.

2.2 OVERVIEW OF THE SECOND HARVEST NETWORK

The A2H network's 209 certified members are regularly monitored by A2H staff and food industry professionals to ensure compliance with acceptable food handling, storage, and distribution standards and practices. A2H network members distribute food and grocery products to charitable organizations in their specified service areas, as shown in Chart 2.2.1.

Within this system, a number of different types of charitable organizations and programs provide food, directly or indirectly, to needy clients. However, there is no uniform use of terms identifying the essential nature of the organizations. Hunger relief organizations are usually grassroots responses to local needs. As such, they frequently differ throughout the country and use different terminology. For clarity, the terms used in this report are defined as follows:

Food Bank. A food bank is a charitable organization that solicits, receives, inventories, stores, and distributes donated food and grocery products to charitable agencies that directly

CHART 2.2.1

SOURCES OF FOOD AND CHANNELS OF FOOD DISTRIBUTION FOR FOOD BANKS

serve needy clients. These agencies include churches and qualifying nonprofit [Internal Revenue Code 501(c) (3)] charitable organizations.

Subsidiary Distribution Organization (SDO). SDOs, smaller food banks or larger agencies allied with affiliated food banks, are private, nonprofit, charitable organizations providing important community services. Although some are agencies, all SDOs distribute part of their food to other charities for direct distribution to clients.

Food Rescue Organization (FRO). FROs are nonprofit organizations that obtain mainly prepared and perishable food products from food service organizations, such as restaurants, hospitals, caterers, and cafeterias, and from distributors of fresh fruits and vegetables and distribute to agencies that serve clients.

Agencies and Food Programs. A2H network members distribute food to qualifying charitable agencies, most of which provide food directly to needy clients through food programs. Some agencies operate single-type and single-site food programs, while others operate food programs at multiple sites and sometimes operate several types of food programs.

For this research, there are two general categories of food programs that A2H network members serve: emergency and nonemergency.

Emergency food programs include food pantries, soup kitchens, and shelters. Their clients typically need short-term or emergency assistance.

- ***Emergency Food Pantries***, also called “Food Shelves,” distribute nonprepared foods and other grocery products to needy clients, who then prepare and use these items where they live. Food is distributed on a short-term or emergency basis until clients are able to meet their food needs. An agency that picks up boxed food from the food bank to distribute to its clients was included as a food pantry. The study excluded from this category any agency that does not directly distribute food to clients or distributes bulk food only on a basis other than emergency need (such as U.S. Department of Agriculture [USDA] commodities to all people over age 60).

On the other hand, a food bank distributing food directly to clients, including clients referred from another agency, qualified as a food pantry.

- ***Emergency Soup Kitchens*** provide prepared meals served at the kitchen to needy clients who do not reside on the premises. In some instances, kitchens may also provide lighter meals or snacks, such as sandwiches, for clients to take with them when the kitchen is closed. This category includes “Kids Café” providers.
- ***Emergency Shelters*** provide shelter and serve one or more meals a day on a short-term basis to low-income clients in need. Shelter may be the primary or secondary purpose of the service. Examples include homeless shelters, shelters with substance abuse programs, and transitional shelters such as those for battered women. The study did not categorize as shelters residential programs that provide services to the same clients for an extended time period. Other excluded programs are mental health/retardation group homes and juvenile probation group homes.

Nonemergency organizations refer to any programs that have a primary purpose other than emergency food distribution but also distribute food. Examples include day care programs, senior congregate-feeding programs, and summer camps.

2.3 GROUPS AND ORGANIZATIONS INVOLVED IN THE STUDY

The study was conceived and coordinated by the national offices of A2H. Data were collected by more than 160 A2H network members or consortia around the country. A2H’s research contractor, Mathematica Policy Research, Inc. (MPR), provided technical advice throughout the study and implemented the sampling and data analysis activities.

Throughout all stages of the study, oversight and advice were provided by a Technical Advisory Group convened by A2H. John Cook of Boston Medical Center Department of Pediatrics was the chair and Beth Osborne Daponte of Yale University was co-chair of the Group. Other members were Steve Carlson of the Food and Nutrition Service, U.S. Department of Agriculture, Kirk Johnson of The Heritage Foundation, Lynn Parker of the Food Research and Action Center, Janet Poppendieck of Hunter College, Martha Raske of the University of

Southern Indiana, Ken Rice of Leo J. Shapiro and Associates, Rob Santos of NuStats, and Tommy Wright of the Census Bureau.

Also, the Affiliate Advisory Group (AAG) consisting of selected members of the A2H national network, provided valuable input during the research process. AAG includes: John Krakowski of City Harvest, Jayne Wright of Food Bank of Central Louisiana, Erica Hanson of Rhode Island Community Food Bank, Michelle Pierceall of Harvesters—The Community Food Network, Ellen Stroud of San Francisco Food Bank, Marian Blanchard of God’s Pantry Food Bank, Inc., and Natasha Thompson of Food Bank of the Southern Tier.

2.4 OVERVIEW OF THE REST OF REPORT

Chapter 3 provides an overview of the methodologies used in the study and shows the proportion of agencies that participated among all eligible agencies of the A2H national network and the Food Bank of Central and Eastern North Carolina. Chapter 4 makes projections of the numbers of clients served by the Food Bank of Central and Eastern North Carolina. Chapters 5 through 9 present detailed findings from the client survey, including information about characteristics of the Food Bank of Central and Eastern North Carolina clients, their levels of need, and their experiences with the program. Chapters 10 through 14 present findings from the agency survey, including data on agency characteristics and program operations in the Food Bank of Central and Eastern North Carolina service area.

3. METHODS

This study had two components: (1) an agency survey that collected information about the food programs operating in the A2H network, and (2) a client survey that would characterize the people using food pantries, emergency kitchens, and shelters and provide a better understanding of their needs. Each of the participating food banks helped MPR with the development of the sampling frame and with the data collection. MPR provided technical assistance with the implementation of the agency and client surveys.

This section provides an overview of the methods used in the survey and analysis work. (Detailed information is contained in the technical volume of the report.) We first discuss two key activities common to both surveys: (1) instrument development, and (2) the training of food bank staff on survey procedures. We then describe each of the two surveys.

3.1 INSTRUMENT DEVELOPMENT

The 2005 data collection instruments were based on the questionnaires used in the 2001 study, revised to reflect the 2001 data collection experience and the needs of A2H. MPR worked closely with A2H and the Technical Advisory Group to revise the questionnaires to provide high-quality data.

3.2 TRAINING

To ensure that each food bank study coordinator had the proper knowledge to administer the surveys, MPR conducted three regional, two-day, in-depth training sessions. Most of the training dealt with showing the study coordinators how to prepare local interviewers to conduct the client survey. Each study coordinator also received a training video demonstrating the client

interview process and a manual containing sample materials and an outline of the A2H network members' responsibilities.

3.3 AGENCY SURVEY

MPR developed the sampling frame for the agency survey by first obtaining, from participating A2H network members, lists of all active agencies each member served and then entering the names into a database. The agency survey sample consisted of a census of the agencies provided by the participating members.

After entering the data, MPR staff printed bar-coded mailing labels to identify the agencies and their addresses and then shipped the proper number of questionnaires, bar-coded labels, and mailing envelopes to each participating member. Some members mailed advance letters informing agencies of the planned survey. Study coordinators were instructed, at the training and in the manual, how to assemble and mail the questionnaires. Each envelope included a personalized cover letter.

The cover letter and the instructions on the questionnaire stated that the agency should complete the questionnaire and mail it back to MPR. In most instances, agencies did so, but some members collected the instruments from their agencies and mailed them to MPR in bulk. When MPR received a questionnaire, staff logged it into a database by scanning the bar code on the mailing label. Each Monday morning, MPR sent an e-mail to the members listing all the questionnaires received the previous week. These e-mails served as the basis for the mailing of reminder postcards to those agencies that did not return the questionnaire within two weeks of the initial mailing, and a second mailing, this time of questionnaires, to agencies that did not return the first one within two weeks following the mailing of reminder postcards. The weekly e-mails also helped the member study coordinators schedule reminder calls to agencies that did

not return the questionnaire within three weeks after the second mailing. Occasionally, in areas where response to the mailings of questionnaires was particularly low, member coordinators completed the questionnaires with nonresponding agencies over the phone. Members were also asked to apprise MPR of agencies that no longer provided food services so that they could be identified as ineligible in the database.

After MPR received, logged into the database, and reviewed the questionnaires, they were shipped to a subcontractor for data capture and imaging. The subcontractor optically scanned all questionnaires and produced data files and CD-ROMs with images of each completed questionnaire for MPR. Chart 3.3.1 summarizes the sequence of activities of the agency survey.

CHART 3.3.1

AGENCY SURVEY ACTIVITIES

3.4 CLIENT SURVEY

The agency lists obtained for the agency survey sample were also used for the two-stage sampling process for the client survey. In the first stage, depending on member size (small, medium, or large as determined by A2H goal standards), 47, 63, or 78 agencies from each participating network member were sampled with probability proportional to size. Sampled agencies were limited to those with pantries, kitchens, and shelters. MPR then asked those members to provide information on each program site the sampled agencies operated:

- Days and hours of operation
- Meals served by kitchens and shelters
- Number of clients served by kitchen and shelter programs at each meal
- Number of households served by pantry programs on an average day

The second-stage sampling process used this additional information to randomly select 30, 40, or 50 program sites, depending on the size of the member, at which to conduct client interviews. Each program site was randomly assigned a preferred date and time for the interviews. The remaining eligible programs from the 47, 63, or 78 originally selected in phase one sampling were designated as replacements. Replacements were used only when an agency or program refused to participate in the client interviews or if, after conferring with the agency, members determined that they were ineligible for the study. In cases where members did not have reserve sample, a supplemental first-stage sample was drawn and additional information was requested, or an additional visit was assigned to a randomly selected program among the already sampled programs. In some instances, we discovered during the process of obtaining additional information that an agency was no longer operating or did not run a pantry, kitchen, or shelter. In such instances, we dropped the agency from the sample.

MPR prepared bar-coded labels with identification numbers for the client questionnaires. We also printed, for use by interviewers, client selection forms with which we could randomly select program participants and account for refusals and ineligible respondents during on-site data collection. We then shipped these materials and client questionnaires to members.

Member study coordinators shipped completed questionnaires and client selection forms back to MPR. MPR staff then logged each questionnaire into a database by scanning the bar-coded label on the cover page. As with the agency survey, each Monday morning MPR sent an e-mail to the members listing the agencies where client questionnaires were completed the previous week. The e-mails allowed the member study coordinators to monitor their progress in completing the client survey portion of the study.

After MPR received the questionnaires, staff logged them into the database and shipped them to the subcontractor for data capture and imaging. The subcontractor optically scanned the questionnaires and produced data files for MPR. As with the agency survey, MPR received data files and CD-ROMs with electronic images of all completed client questionnaires. Chart 3.4.1 summarizes the sequence of activities in the client survey.

CHART 3.4.1

CLIENT SURVEY ACTIVITIES

3.5 RESPONSE RATES

As Chart 3.5.1 shows, of the A2H national network of 209 members, 164 individual members covering all or part of 45 states and the District of Columbia participated in the agency survey. Of those members, 156 fully participated in the client survey.

Client Survey. A total of 156 individual members contacted 10,076 agencies to gain access for on-site client data collection. Of those agencies, 9,874 provided detailed information about their programs and 4,593 were sampled for and participated in client data collection.

A2H network members' staff and volunteers sampled 72,399 clients at the eligible agencies; of those 1,439 were determined to be ineligible for age or other reasons. Client interviews were completed with 52,887, or 74.5%, of the eligible respondents.²

Agency Survey. Participating A2H network members sent out questionnaires to 43,141 eligible agencies.³ MPR received completed questionnaires from 31,342, or 72.7%.

Research Involvement of the Food Bank of Central and Eastern North Carolina. Chart 3.5.2 shows an overview of the process the Food Bank of Central and Eastern North Carolina followed for this study. It also identifies the completed numbers of responses from the client interviews and the agency survey, by program type. For the service area of the Food Bank of Central and Eastern North Carolina, see Chart 3.5.3.

² Interviews were conducted only with respondents age 18 or older.

³ Some additional questionnaires were mailed out to agencies who were later found to be no longer operating or to be otherwise ineligible.

CHART 3.5.3

THE FOOD BANK OF CENTRAL AND EASTERN NORTH CAROLINA SERVICE AREA

3.6 ANALYSIS METHODS

Most of the findings presented in this report are based on tabulations of the survey data. In this section, we describe the methods used in this work.

3.6.1 Tables

In the descriptive tabulations of clients presented in chapters 5 through 9, the percentage figures in the tables are based on the total weighted number of usable responses to the client survey, unless specified otherwise. Responses are weighted to represent clients or households of all emergency food programs of the Food Bank of Central and Eastern North Carolina. In general, weights are based on the probabilities of selection in the sampling and also account for survey nonresponse.⁴ Weights were scaled so that the final weights represent a month-level count of different clients, as derived in Chapter 4 of the national report.⁵

Similarly, all tables containing information obtained from the agency survey, as presented in chapters 10 through 14, are based on the total weighted number of usable responses to the agency survey, unless specified otherwise. The descriptive tabulations in these chapters represent all emergency food programs in the Food Bank of Central and Eastern North Carolina. The weights, calculated based on the sampling frame, also reflect survey nonresponse.

Percentage distributions in the client tables are presented by the type of the programs where clients were interviewed (pantries, kitchens, or shelters). When appropriate, the

⁴ To reduce variances in the analysis, we truncated weights with extremely large values. However, to keep the sum of weights unchanged, we then adjusted the weights by an adjustment factor, which is the ratio of the sum of the original weights to the sum of the truncated weights.

⁵ Originally, we computed weights to make the sample representative at the weekly level. We later converted them to a monthly scale to take into account the fact that, compared with kitchen and shelter users, most pantry users do not visit the program in any given week.

percentage distribution for “all clients” is shown in the last column. Most tabulations of the agency data are presented by the type of programs operated by the agencies.

The percentages in the tables are rounded to one decimal place and are based only on the valid responses. They exclude missing, don’t know, refusal, and other responses deemed incomplete for the question.

The sample sizes presented at the bottom of single-panel tables (or at the bottom of each panel of multipanel tables) reflect the total number of responses to the question. Where the question relates to a subset of the respondents, the appropriate sample size is presented. In general, these sample sizes include missing responses, as well as don’t know and refusal responses. We report the percentages of item nonresponse in notes to each table.

The main reason for including only valid responses is to present appropriately the weighted percentage distribution among the main response categories of interest. Our preliminary analysis of item nonresponse revealed little evidence of any systematic biases, and excluding missing data also has the advantage of being consistent with the convention used for previous studies commissioned by A2H.

Some tables also present the average (mean) or the median values associated with the variable of interest. The average, a measure of central tendency for continuous variables, is calculated as the sum of all valid values in a distribution, divided by the number of valid responses. The median is another measure of central tendency. It is the value that exactly divides an ordered frequency distribution into equal halves. Therefore, 50% of the observations have values smaller than the median and the remaining 50% of the observations have values larger. The median is suitable only for describing central tendency in distributions where the categories of the variable can be ordered, as from lowest to highest.

3.6.2 Other Methodological Considerations

Certain other conventions should be noted in interpreting the findings of the study and how they are presented. Below we discuss the distinction between clients and respondents and describe the structure of reports available from the project.

Clients Versus Respondents. *Clients* are defined differently by program type. The kitchen and shelter programs are viewed as serving only those who are present at the program site. (Thus, in general for these providers, the survey respondents are representative of all clients.)⁶ However, pantry programs are regarded as serving all members of respondents' households.

At the kitchen and shelter sites, the sampling unit was the individual. That is, the interviewers were instructed to treat members of a single household as separate respondents if they were selected by our random sampling process and met other eligibility criteria (such as being at least 18 years of age). At the pantry programs, on the other hand, the sampling unit was the household, and only one interview was completed for each randomly selected household, even when two or more members of the household were present at the program.

Ideally, the survey would have obtained all relevant information about every member of the household, especially among pantry users. However, so as not to overburden respondents, the survey was designed to acquire information about at most 10 members of the household, including the respondent. Also, this series of questions was limited to a set of variables of interest, such as sex, age, relationship to the respondent, citizenship, and employment status.

⁶ One exception was children at the kitchens and shelters. They were clients, but they were not respondents, because only clients age 18 or older were interviewed for this study. However, the children were taken into account in estimating the total number of clients.

Because households with more than 10 members are uncommon, we do not believe that this has significantly affected our estimates.

National Versus Local Reports. Hunger in America 2006 has produced a set of reports to serve both national and local interests and to be useful to a wide range of audiences with varying needs. The national report consists of information gathered through 155 participating members for the client survey and 162 members for the agency survey. In addition, in most cases, a local report was generated containing information on clients and agencies served by a particular member. There are roughly 155 member-level local reports. In addition, state-level reports were produced when all A2H network members in a particular state participated in this study. About 20 states achieved full participation of their members.

In addition to the comprehensive national and local reports, A2H will disseminate *Hunger in America 2006: An Extended Executive Summary*, which contains key findings from the comprehensive national report. A Technical Appendix, which describes in detail the methodologies of the current study, is available separately for technical audiences.

Tables in the local and national reports are numbered comparably to facilitate comparisons between the local and national findings. Not all tables from the national report are reproduced in the local documents.

Statistical Sampling Variation and Measurement Error. As with all estimates relying on statistical samples, the client survey estimates in this report are subject to “sampling error,” resulting from the fact that they are based on *samples* of clients rather than information about *all* clients. The margins of error due to this factor vary among individual estimates, depending on such factors as sample sizes, the nature of the client characteristics being estimated, and the number of different providers within a food bank at which the client data collection took place.

For most percentage estimates based on the full sample size for a food bank, this sampling variation can lead to “confidence intervals” extending at least plus-or-minus 8 percentage points around the estimate. For instance, if a certain client characteristic percentage is estimated to be 60% within a given food bank, and the “margin of error” is 8 percentage points, we can be reasonably certain it is someplace in the range of 52% to 68%. In many instances, particularly when the sample is divided by the type of providers that clients are using, the width of the confidence interval can be greater.

These issues are discussed in detail in Appendix A, where guidelines for estimating margins of error are described.

In addition to sampling error, there is also undoubtedly “measurement error” in some of the estimates presented in this report, due to the complexities of carrying out the survey work in a very decentralized context. Most of the interviewers did not have extensive experience in data collection work, and while MPR supplied general training guidelines and materials, there was undoubtedly considerable variation between food banks as to how the training was implemented. Inevitably, as in any survey, some interviewers may have read questions incorrectly, clients may have understood questions incorrectly, and even correct answers may have sometimes been incorrectly recorded on the survey instrument. All of these factors may have led to “measurement error” *which is in addition to the sampling error discussed above*. While this measurement error cannot be fully quantified, it should be recognized as a factor in examining the results.

3.7 REPORTING CONVENTIONS IN FOOD BANK REPORTS

For some food banks, there were certain client-based tabular analyses for which fewer than 30 observations were available. (This happened mostly with shelters and, to a lesser extent,

kitchens.) In these instances, the relevant tabulations have not been included in the tables, because there are too few client observations for the results to be statistically reliable.⁷

When client tabulations have been suppressed because of small sample sizes, the entry *n.p.* (“not presented”) is made in the relevant columns of the tables. In these cases, the observations *are* included in computing the “total” column, which is aggregated across the three types of agencies.⁸

In some instances, there may be no observations available at all for a column of a table. In those cases, we have entered *N.A.* (“not available”).

3.8 DEGREE OF COMPARABILITY BETWEEN 2001 AND 2005 STUDIES

It is also of interest to assess the comparability of the 2001 and 2005 studies. Most aspects of the two studies were similar. Both surveys (1) were based on the two-stage provider sampling approach described above, (2) used essentially the same client sampling techniques, (3) used similar questionnaires, and (4) were data-entered and analyzed using similar methods.

Nevertheless, some significant changes were made between the two study years. Most were developed to improve the study, by (1) increasing the accuracy of the data collection and analysis (through improved questions, improved operational procedures and forms, and more emphasis on training of topics that were confusing in 2001), or (2) reducing the considerable burden that falls on the food banks in implementing the study.

⁷ On the other hand, when presenting agency findings, we have reported tabulations with fewer than 30 programs, in part because some of the smaller members do not have as many as 30 kitchens or shelters.

⁸ Because of a limitation of the computer system used to generate the member-level reports, in some instances a chart corresponding to a table with the *n.p.* or *N.A.* conventions may actually have a graphic corresponding to the suppressed column in the table. In those instances, that part of the chart should be ignored.

The Technical Appendix volume for the National Report provides a complete description of the survey and analysis methodologies. Here, however, we highlight the main salient methodological considerations:

- Developing improved estimates of client turnover in the A2H network
- Increasing screening of the provider sample for eligibility
- Improving the treatment of more than one interviewing visit to the same provider on the data file and in the analysis
- Incorporating detailed information on provider operating hours
- Increasing the number of participating food banks
- Taking into account the possibility of providers being open less than once a week
- Adjusting the estimated number of clients served by small providers where direct interviews did not occur

3.8.1 Estimating Client Turnover Rates Within the A2H System

An important goal of the periodic A2H surveys has been to develop *annual* estimates of the number of different clients the system serves. However, this raises substantial methodological issues, as discussed below.

Importance of “Newcomer” Rates and Key Resulting Estimation Issues. The study depends on information obtained during the client interviews to draw inferences about client usage of the system over a 12-month period. Survey recall problems pose formidable challenges to interpreting the data, however, because many clients in the survey may not be able to recall and report their past usage patterns accurately for an entire year. Typically, clients are able to supply reasonably accurate information about their usage of the emergency food system during a recent period, such as a week (or even perhaps a month). As the recall period gets longer, however, their memory often becomes less reliable. While this is a problem for many surveys,

long recall periods may be particularly problematic for the A2H client population, because many of them are elderly, have disabilities, or are in low-income households where they are concentrating on how to meet day-to-day household needs with low resources, rather than thinking about the past year.

The Survey Questions Related to Client Turnover. In both the 2001 and the 2005 surveys, we tried to examine client turnover based on the self-reports of survey respondents about their patterns of using the A2H system. The research strategy focuses on what the 2001 report called the “newcomer rate,” defined as the percentage of clients at a given point who have started using A2H providers within the past month but had not used the A2H system in the previous 12 months. If we can estimate “newcomers” defined in this way for 12 months in a row, the sum yields a measure of all the people who entered the system during the past year.⁹

It was found during the 2001 survey, however, that the questions included to elicit this information were confusing to many respondents. In addition, response patterns were not always consistent.

At the outset of the 2005 study, to improve accuracy, we tried to develop alternative ways of obtaining these data on newcomer rates. The result was a single question that focused on the respondent’s estimate of the number of months the household had used the pantry in the previous year. During fielding of the 2005 survey, far fewer complaints were received about the new question than about the two previous ones. Furthermore, examination of the answer patterns for

⁹ Key to the approach outlined in the text is that a “newcomer” is defined as a person who starts using the A2H system *and has not previously used it for at least a year*. Of course, some people may enter and exit the system several times during the year; however, in making *annual unduplicated estimates*, we want to count these people only once a year.

the three 2005 questions and the two 2001 questions suggests that the response patterns to the two previous questions were broadly consistent for 2005.

3.8.2 Increased Provider Screening

Screening to ensure provider eligibility for the survey was done more intensively in 2005 than in 2001. During the 2001 survey, it had become evident that many food banks had trouble distinguishing between providers that met the eligibility criteria for the survey (by being emergency food providers) and those that did not. For instance, congregate meal programs for seniors often were confused with emergency kitchens. Similarly, long-term group living facilities were sometimes confused with emergency shelters. In 2005, therefore, MPR staff spent more time training food bank personnel on the relevant distinctions than they had spent in 2001. We also modified the data collection forms to allow the food banks to provide detailed comments about the individual providers. In addition, MPR performed more screening of information provided by the food banks on the agencies and providers enumerated by the food banks. The effect was to increase the rate of ineligible agencies and providers and lower participant estimates somewhat. We believe that the result was a sample that was better focused on the target population.

3.8.3 Keeping More Information on Interviewing That Involved More than One Visit to Providers

To achieve interview targets for both surveys (particularly in 2001), it was sometimes necessary to make more than one visit, on different days, to a provider. In 2001, summary information on these visits was combined and placed in a single data record on the analysis file. In 2005, we kept detailed data on each visit in separate data records. This allowed more complete and precise analysis of the sampling done at the sites.

3.8.4 Taking into Account the Fact That Some Providers Are Open More than Four Hours a Day

In the 2001 data collection and analysis, we assumed that the observation period (including observations of number of clients) was the same as the period that providers were open. By the time of the 2005 survey, we had realized that this is not always true, and we built into the weighting algorithm an expansion factor to allow for clients who may have come on the day of sampling but not while the observers were there.

3.8.5 Number of Participating Food Banks

The 2005 survey had considerably more coverage than the 2001 survey. In 2001, there were 97 food banks participating in the client survey (about half the food banks in the network). After adjusting for size, the 97 food banks were estimated to account for about two-thirds of all A2H operations. In the 2005 study, 155 food banks participated, and they are estimated to account for about 81% of all operations.

3.8.6 Allowing for the Possibility of Food Providers Being Open Less than Once a Week

The data collection and analysis procedures used in 2001 assumed that all providers were open at least once a week. It became apparent that this was not always the case, however. Therefore, in 2005, the approach was made more general to allow for some providers being open less often.

3.8.7 Numbers of Clients Served by Small Providers

During the 2001 survey, many food banks complained about the burden associated with sending teams of interviewers to very small providers that might have as few as two or three clients in a day. In 2005, we reduced the burden on food banks by excluding very small

providers from the survey work and imputing values for them in the data. Our rationale was that it would reduce data collection burden and increase cooperation, and because, by definition, these providers were small and could be accounted for by an adjustment factor in computing the sampling weights, the analysis would not be significantly affected. In general, the criterion chosen was to not send interviewers to providers that served fewer than 10 clients in a day.

During the analysis, several methods were considered for accounting for small providers in the estimates. One possible method was to incorporate a design-consistent ratio adjustment factor directly into the weighting process. In this adjustment, the number of clients at small providers would have been accounted for by using the ratio of the projected number of clients at all providers to the projected count of clients at large providers (with the ratio developed by provider type within food bank using 2005 sampling data from the individual food banks). Other methods considered involved imputing the estimates for clients at small providers based on data collected in 2001, when interviewing *was* done at small providers. Estimates were done using both approaches, and judgments about the likely accuracy of the methods were made in discussions with the Technical Advisory Group for the project and with MPR analysis team and sampling advisors. Based on these discussions, the method used was based on a variant of the imputation approach and was decided by the Technical Advisory Group and the MPR analysis team to be most accurate. This final approach was then implemented technically by including a ratio adjustment in the weighting process (by provider type), with the ratio set to achieve the estimate determined in the analysis described above.

3.8.8 Summary

Because of the changes described above between the 2001 and 2005 surveys, and the implementation of improved methodologies and analytical techniques in 2005, the results of the

two surveys cannot be directly compared at a formal level. Several changes in the survey and analysis procedures were made to improve accuracy and reduce the burden the survey imposed on food banks. These changes could have shifted the survey findings, independent of the true underlying changes in the system.

On the other hand, overall, the underlying estimation objectives of the two surveys were essentially the same. Each survey represents the best attempt possible, given the methods available at the time, to estimate the number of A2H clients and their characteristics. Therefore, we believe it is useful to examine the results of the two surveys together to some degree. However, the conclusions reached by comparing the results across years should be taken as *indicative*, rather than as the results of formal statistical tests. In making comparisons across years, users should also remember that there are considerable statistical sampling margins associated with the estimates given in both the 2001 and 2005 reports. Many apparent differences may be due to this sampling variation, which is discussed in more detail in Appendix A.

4. ESTIMATED NUMBERS OF AGENCIES AND CLIENTS

As background for the detailed tabulations in subsequent chapters, this section presents estimates of the A2H clients and agencies in the area served by the Food Bank of Central and Eastern North Carolina. These estimates are derived from the sampling and data collection work in the area covered.

In assessing the estimates presented below, remember that the A2H system is dynamic, is constantly changing. Also, because of various factors detailed later in the chapter, the available estimation methodologies sometimes involve substantial margins of error. Therefore, the estimates should be viewed as approximations rather than exact numbers.

Within this context, sections 4.1 and 4.2 present an overview of our estimates. Section 4.3 then discusses the limitations of these projections.

4.1 ESTIMATED NUMBER OF AGENCIES

During the preparation for the survey work, A2H network members were asked to supply MPR with lists of all the member agencies to which they distribute food. MPR then carefully reviewed these lists, and to refine them, in some instances performed several stages of interaction with members.

On the basis of the final list of agencies generated by this process, we estimate that the Food Bank of Central and Eastern North Carolina served approximately 815 agencies at the time of the survey, of which 428 agencies responded to the agency survey. These responses contained usable information on 282 pantries, 53 kitchens, 45 shelters, and 399 other nonemergency food programs.

4.2 ESTIMATED NUMBER OF CLIENTS

The Food Bank of Central and Eastern North Carolina attempted interviews with clients at certain agencies that it serves, determined as a subsample of agencies MPR selected using randomizing procedures. Based on the results of this agency-level sampling process and of the random sampling of clients implemented at the sites, MPR developed survey weights that make the sample representative of all clients of the Food Bank of Central and Eastern North Carolina.

From these weights we have developed estimates of the numbers of A2H clients served within the areas of the Food Bank of Central and Eastern North Carolina. Originally we did the weighting at the weekly level, to make the sample representative of clients served in a given week. We then extrapolated these weekly estimates to cover an annual period, using the same percentage projection factors as those used with the national data, as described in the *Hunger in America 2006 National Report*.

Based on this approach, the estimated number of different clients served per week by A2H emergency food providers in the area served by the Food Bank of Central and Eastern North Carolina is 48,100. The estimate of different clients served annually is 294,500. It is important to recognize that these estimates are based on relatively small survey samples and are therefore subject to considerable statistical sampling error (see Appendix A).

The weekly estimate is meant to be an estimate of the number of *different* people who use emergency food services supplied by the food bank in a week. Each person is only included once. For instance, if the same person goes to a soup kitchen three times during the week, that person is only counted *once* not three times. For pantry users, all persons in a household are included in the count.

The *annual unduplicated count* is defined similarly to the weekly count. It is an estimate of all of the people served during a year by emergency food providers that are supplied by the food bank. People who use the system multiple times are only counted once. For instance, if a household used a pantry every month for the year, members of that household would only be counted once. In general, the annual count will be much less than 52 times the weekly count, because most people getting food from a provider in a given week are likely to use the system in other weeks as well. On the other hand, the annual count is much larger than the weekly count because there is considerable turnover of people entering and leaving the system.

4.3 BACKGROUND AND LIMITATIONS OF THE ESTIMATES

We used several data sources to derive estimates of the size of the A2H system:

- Information from the survey sample frame of providers, which was compiled from records of A2H network members
- Information from the sampling and data collection operations concerning the observed numbers of clients served by providers, the providers' days of operation, and similar factors
- Information from the client survey concerning respondents' length and frequency of use of the emergency food system
- Information from A2H administrative files concerning the relative sizes of the A2H members that participated in the study compared with those that did not participate

Given these rich data sources, several approaches could be taken in the estimation work. In much of the work below, we drew primarily on an approach, rooted in standard statistical estimation theory, whereby we (1) computed the probabilities of various providers and clients being in our survey sample, (2) computed analysis weights based on these probabilities, and (3) estimated the underlying population totals by summing the relevant analysis weights. In some instances, however, we employed alternative approaches to supplement the estimates.

For each food bank, the estimate of *weekly* clients served is derived from the sums of the weekly client weights for the food bank. As described in detail in the National Report for the study, these weekly rates reflect the probabilities of client selection at the multiple sampling stages,¹⁰ together with adjustments for non-response and similar factors.

For estimates of *annual* unduplicated clients at the food bank level, the basic approach taken was to allocate the national total as estimated in the National Report, among the various food banks. In part, the allocation process was based on the food bank-level weekly estimates derived during the weighting process. In addition, because of the relatively small sample sizes at the food bank level, we used a second variable, the “goal factor” determined by A2H to essentially provide more stability and thus anchor the estimates.¹¹ Specifically, we (1) rescaled the goal factors to place them on a scale comparable to the estimates based on the sums of statistical weights; (2) took the simple average of these two components (sums of weights and rescaled goal factor) to form a composite indicator; and then (3) used that composite index to proportionately allocate the national totals to the individual food banks.

There is unavoidably some uncertainty in the estimates presented. This uncertainty derives from several factors, including:

- **Reporting Error.** Some of the interview questions on which our estimates are based were unavoidably somewhat complex. As a result, there is undoubtedly some error caused by respondents not always understanding the questions and not always reporting accurately.

¹⁰ Including sampling agencies, sampling providers within agencies, and sampling clients within providers.

¹¹ The goal factor is based on population and poverty data and is designed to be a measure of the relative need for emergency food in each food bank’s service area.

- ***Nonresponse Bias.*** As with any survey, it must be assumed that there is at least some nonresponse error caused by the agencies and clients who did not respond to our surveys being different from those that did.
- ***Alternative Estimation Methods.*** As the subsequent discussion makes clear, several methods could be used in deriving the results presented below. Our discussion explains the reasons for the choices we make, but some judgment is involved in this and may influence the final results.
- ***Seasonality.*** Because of logistical requirements, most of the data were collected during the spring of 2005. It is therefore not possible with this data set to fully examine and correct for fluctuations in providers of the Food Bank of Central and Eastern North Carolina and clients over the entire year.

5. CLIENTS: DEMOGRAPHIC PROFILE

One of the most important purposes of the evaluation has been to develop a description of the people and households served by the A2H network. Key findings are presented in this section.

We begin by describing the client sample on which the analysis is based. Section 5.2 then provides an overall profile of clients served by the Food Bank of Central and Eastern North Carolina. Subsequent sections then provide additional details about clients' demographic characteristics, citizenship, education levels, household income levels, and other resources.

5.1 NUMBER OF CLIENT RESPONDENTS

A total of 477 clients were interviewed at selected program sites of the Food Bank of Central and Eastern North Carolina. The clients interviewed at the pantry programs (362 clients) account for 75.9% of all client respondents. Those interviewed at the kitchen programs (78 clients) make up 16.4% of the total, and those interviewed at the shelter programs (37 clients) account for the remaining 7.8%. See Table 5.1.1, which also shows the percentage distribution after the weights described earlier were applied to each observation.

TABLE 5.1.1
NUMBER OF CLIENT RESPONDENTS

Site of Interview	Client Respondents		
	Number	Unweighted Percentage	Weighted Percentage
Pantry	362	75.9%	86.5%
Kitchen	78	16.4%	8.6%
Shelter	37	7.8%	4.9%
TOTAL	477	100.0%	100.0%

5.2 SUMMARY DEMOGRAPHIC PROFILE

Client respondents provided information about various demographic characteristics of themselves and their households. Table 5.2.1 summarizes the demographic profile of the client households of the Food Bank of Central and Eastern North Carolina. It also contains statistics about adult clients who visit A2H emergency food programs.

TABLE 5.2.1
SUMMARY DEMOGRAPHIC PROFILE OF A2H CLIENTS
(Client Households of A2H Emergency Food Providers)

	Pantry	Kitchen	Shelter	All
Client Households				
Size of household^a				
Households with 1 member	30.8%	36.9%	85.3%	34.0%
Households with 2-3 members	46.7%	43.2%	9.8%	44.6%
Households with 4-6 members	20.6%	17.0%	4.9%	19.6%
Households with more than 6 members	1.8%	2.9%	0.0%	1.8%
Average household size	2.6	2.5	1.3	2.5
Median household size	2	2	1	2
Households with nonfamily members	6.2%	25.8%	0.0%	7.6%
Households with one or more adults employed	37.9%	48.5%	27.7%	38.3%
Households with single parents	17.3%	9.5%	2.3%	15.9%
Households with single parents among households with children younger than age 18 ^b	46.6%	63.7%	32.1%	47.1%
Elderly and children in household				
Households with children younger than age 18	37.1%	14.9%	7.2%	33.7%
Households with children ages 0-5 years	15.6%	11.1%	2.3%	14.6%
Households with children ages 0-3 years	12.8%	8.1%	1.1%	11.8%
Households with any member 65 years or older	38.5%	10.9%	0.0%	34.2%

TABLE 5.2.1 (continued)

	Pantry	Kitchen	Shelter	All
Adult Clients at Program Sites				
Adult Clients at Program Sites				
Male	22.4%	77.5%	73.2%	29.5%
Female	77.6%	22.5%	26.8%	70.5%
U.S. citizens	97.7%	99.0%	100.0%	97.9%
Registered voters ^c	72.0%	73.9%	50.8%	71.4%
Married or living as married	29.3%	14.5%	13.5%	27.3%
High school graduate	54.9%	79.1%	73.4%	57.9%
Currently employed	22.4%	38.6%	25.7%	23.9%
Clients in suburban/rural areas	75.1%	38.6%	48.5%	70.6%
SAMPLE SIZE (N)	362	78	37	477

SOURCE: This table was constructed based on usable responses to questions 2, 3, 4, 5, 6, 7, 9, 10, 11, 11a, 12, 81a, and 82 of the client survey.

NOTES: The percentages presented in this table are based only on usable responses, excluding missing, don't know, and refusal responses, except for the percentage of employed clients (See Table 5.7.2). All usable responses were weighted as described in Chapter 3 and in the Technical Appendix volume to represent all emergency food clients of the Food Bank of Central and Eastern North Carolina. The sample sizes (N) also include missing data.

^aFor all programs, responses greater than 24 people in a household were recoded as 24 people. Additional data are available for at most 10 members of each household. See Chapter 3 for details.

^bThe sample size is 135 for the pantry, 9 for the kitchen 3 for the shelter, and 147 for all.

^cFor registered voters, missing, don't know, and refusal responses combined are 1.9% for pantry clients, 1.6% for kitchen clients, 20.8% for shelter clients, and 2.8% for all clients.

The upper part of Table 5.2.1 shows the compositions of A2H client households of the Food Bank of Central and Eastern North Carolina. The mean household size is 2.5, and 38.3% of the households have an employed adult. In addition:

- 34.0% of the client households are single-person households.
- 1.8% of the client households have more than six members.
- Among client households with children younger than age 18, 47.1% are single-parent households.
- 33.7% of the client households have at least one member younger than age 18.
- 14.6% of the client households have one or more children ages 0 to 5 years.

- 34.2% of the households have at least one member age 65 years or older.

The lower part of Table 5.2.1 shows that 29.5% of the adult clients visiting emergency food programs are men, while 70.5% are women. (Table 5.3.1 contains detailed age, gender, and citizenship information.) Of them, 97.9% are U.S. citizens, 57.9% are high school graduates, and 23.9% are currently working. These statistics, however, take into account only the client population who come to the program sites. Since the pantries' client base is not limited to the individual members who come to pick up food, but includes all members of such clients' households, it is also of interest to examine similar tabulations based on all individual members of client households. Table 5.3.2 in the next section presents age, gender, and citizenship composition of all members of client households.

5.3 AGE, GENDER, AND CITIZENSHIP COMPOSITION

Clients interviewed were asked to provide information on age, gender, and U.S. citizenship for themselves and for at most nine members of their households. Table 5.3.1 shows the distribution of each variable only among the population represented by clients interviewed at program sites. Table 5.3.2 shows the distribution among all members of client households.

TABLE 5.3.1
AGE, GENDER, AND CITIZENSHIP COMPOSITION
(Adult Clients at A2H Program Sites)

	Adult Clients Who Pick Up Food at a Pantry	Adult Clients at a Kitchen	Adult Clients at a Shelter	Adult Clients at All Program Sites
Age				
18-29	5.9%	11.3%	24.8%	7.2%
30-49	34.2%	37.4%	70.1%	36.1%
50-64	30.5%	47.8%	5.1%	30.8%
65 and over	29.5%	3.6%	0.0%	25.9%
TOTAL	100.0%	100.0%	100.0%	100.0%
Gender				
Male	22.4%	77.5%	73.2%	29.5%
Female	77.6%	22.5%	26.8%	70.5%
TOTAL	100.0%	100.0%	100.0%	100.0%
U.S. Citizen				
Yes	97.7%	99.0%	100.0%	97.9%
No	2.3%	1.0%	0.0%	2.1%
TOTAL	100.0%	100.0%	100.0%	100.0%
SAMPLE SIZE (N)	362	78	37	477

SOURCE: This table was constructed based on usable responses to questions 2, 3, and 5 of the client survey.

NOTES: The percentages presented in this table are based only on usable responses, excluding missing, don't know, and refusal responses. All usable responses were weighted as described in Chapter 3 and in the Technical Appendix volume to represent all emergency food clients of the Food Bank of Central and Eastern North Carolina. The sample sizes (N) also include missing data.

For age, missing, don't know, and refusal responses combined are 1.9% for pantry clients, 2.8% for kitchen clients, 11.2% for shelter clients, and 2.4% for all clients.

For gender, missing, don't know, and refusal responses combined are 0.4% for pantry clients, 0.0% for kitchen clients, 4.9% for shelter clients, and 0.6% for all clients.

For citizenship, missing, don't know, and refusal responses combined are 0.0% for pantry clients, 0.0% for kitchen clients, 0.0% for shelter clients, and 0.0% for all clients.

Among the adults clients who come to program sites, 7.2% are ages 18 to 29; 36.1% ages 30 to 49; 30.8% ages 50 to 64; and 25.9% ages 65 and older. In addition:

- Among the adult pantry clients who were represented at the interview sites (not including all members of their households), 5.9% are ages 18 to 29; 34.2% ages 30 to 49; 30.5% ages 50 to 64; and 29.5% ages 65 and older.
- 22.4% of adult pantry clients at program sites are male.
- 97.7% of adult pantry clients at program sites are U.S. citizens.
- Among the adult kitchen clients, 11.3% are ages 18 to 29, 37.4% ages 30 to 49, 47.8% ages 50 to 64, and 3.6% ages 65 and older.
- 77.5% of adult kitchen clients at program sites are male.
- 99.0% of adult kitchen clients at program sites are U.S. citizens.
- Among the adult shelter clients, 24.8% are ages 18 to 29, 70.1% ages 30 to 49, 5.1% ages 50 to 64, and 0.0% ages 65 and older.
- 73.2% of adult shelter clients at program sites are male.
- 100.0% of adult shelter clients at program sites are U.S. citizens.

TABLE 5.3.2

AGE, GENDER, AND CITIZENSHIP COMPOSITION
(All Members of Households)^a

	All Members of Household, Pantry	All Members of Household, Kitchen	All Members of Household, Shelter	All Members of Household, All Programs
Age				
0-3	5.8%	3.5%	1.9%	5.5%
4-5	3.2%	1.3%	1.1%	3.0%
6-17	20.7%	7.6%	9.6%	19.4%
18-29	10.1%	12.6%	19.0%	10.5%
30-49	22.7%	28.9%	64.6%	24.1%
50-64	18.5%	41.4%	3.9%	20.0%
65 and over	19.1%	4.8%	0.0%	17.5%
TOTAL	100.0%	100.0%	100.0%	100.0%
SAMPLE SIZE (N)^b	943	166	45	1,154
Gender				
Male	42.6%	57.9%	68.9%	44.5%
Female	57.4%	42.1%	31.1%	55.5%
TOTAL	100.0%	100.0%	100.0%	100.0%
U.S. Citizen				
Yes	97.4%	98.1%	100.0%	97.5%
No	2.6%	1.9%	0.0%	2.5%
TOTAL	100.0%	100.0%	100.0%	100.0%
SAMPLE SIZE (N)	942	160	45	1,147

SOURCE: This table was constructed based on usable responses to questions 2, 3, and 5 of the client survey.

NOTES: The percentages presented in this table are based only on usable responses, excluding missing, don't know, and refusal responses. All usable responses were weighted as described in Chapter 3 and in the Technical Appendix volume to represent all emergency food clients of the Food Bank of Central and Eastern North Carolina. The sample sizes (N) also include missing data.

For age, missing, don't know, and refusal responses combined are 1.6% for pantry clients, 6.3% for kitchen clients, 8.8% for shelter clients, and 2.1% for all clients.

For gender, missing, don't know, and refusal responses combined are 0.2% for pantry clients, 0.1% for kitchen clients, 4.9% for shelter clients, and 0.3% for all clients.

For citizenship, missing, don't know, and refusal responses combined are 0.1% for pantry clients, 1.6% for kitchen clients, 0.0% for shelter clients, and 0.2% for all clients.

^aData available for at most 10 members of household. See the Technical Appendix volume for details.

^bThe sample sizes for age variables may be larger than those for the other two variables in this table. This is because the client questionnaire had additional questions to identify household members who are younger than age 18 and whether the household has any children between ages 0 and 5.

When we consider all members of client households, 8.4% are ages 0 to 5, 19.4% ages 6 to 17, 10.5% ages 18 to 29, 24.1% ages 30 to 49, 20.0% ages 50 to 64, and 17.5% ages 65 and older. Information on age distribution, as well as gender and citizenship distributions, by program type follows:

- Among all members of pantry client households, 8.9% are ages 0 to 5; 20.7% ages 6 to 17; 10.1% ages 18 to 29; 22.7% ages 30 to 49, 18.5% ages 50 to 64, and 19.1% ages 65 and older.
- 42.6% of all members of pantry client households are male.
- 97.4% of all members of pantry client households are U.S. citizens.
- Among all members of kitchen client households, 4.8% are ages 0 to 5; 7.6% ages 6 to 17; 12.6% ages 18 to 29; 28.9% 30 to 49; 41.4% ages 50 to 64, and 4.8% ages 65 and older.
- 57.9% of all members of kitchen client households are male.
- 98.1% of all members of kitchen client households are U.S. citizens.
- Among all members of shelter client households, 2.9% are ages 0 and 5; 9.6% ages 6 and 17; 19.0% ages 18 to 29; 64.6% ages 30 to 49; 3.9% ages 50 to 64; and 0.0% ages 65 and older.
- 68.9% of all members of shelter client households are male.
- 100.0% of all members of shelter client households are U.S. citizens.

5.4 MARITAL STATUS

Clients were asked about their marital status. Table 5.4.1 presents the results.

TABLE 5.4.1
MARITAL STATUS
(Adults Interviewed at A2H Emergency Food Providers)

Clients' Marital Status	Adult Clients Who Pick Up Food at a Pantry	Adult Clients at a Kitchen	Adult Clients at a Shelter	Adult Clients at All Program Sites
Married	27.4%	13.6%	13.5%	25.5%
Living as married	1.9%	0.9%	0.0%	1.7%
Widowed	20.8%	6.9%	11.2%	19.1%
Divorced	11.2%	25.5%	26.0%	13.2%
Separated	14.3%	12.6%	19.0%	14.4%
Never been married	24.3%	40.5%	30.3%	26.0%
TOTAL	100.0%	100.0%	100.0%	100.0%
SAMPLE SIZE (N)	362	78	37	477

SOURCE: This table was constructed based on usable responses to Question 9 of the client survey.

NOTES: The percentages presented in this table are based only on usable responses, excluding missing, don't know, and refusal responses. All usable responses were weighted as described in Chapter 3 and in the Technical Appendix volume to represent all emergency food clients of the Food Bank of Central and Eastern North Carolina. The sample sizes (N) also include missing data.

Missing, don't know, and refusal responses combined are 0.0% for pantry clients, 0.0% for kitchen clients, 0.2% for shelter clients, and 0.0% for all clients.

Key findings include:

- Overall, 25.5% of the clients at all program sites are married.
 - The percentage of married clients at pantry programs is 27.4%.
 - The percentage of married clients at kitchen programs is 13.6%.
 - The percentage of married clients at shelter programs is 13.5%.
- 1.7% of the clients at all program sites are living as married.
- 19.1% of the clients at all program sites are widowed.
- 14.4% of the clients at all program sites are separated.
- 26.0% of the clients at all program sites have never been married.

5.5 HIGHEST EDUCATION LEVEL ATTAINED

Clients were asked the highest education level they had attained. Education levels of clients based on their responses are provided in Table 5.5.1.

TABLE 5.5.1
HIGHEST EDUCATION LEVEL ATTAINED
(Adults Interviewed at A2H Emergency Food Providers)

Clients' Education Level	Adult Clients Who Pick Up			
	Food at a Pantry	Adult Clients at a Kitchen	Adult Clients at a Shelter	All Adult Clients
Less than high school	45.1%	20.9%	26.6%	42.1%
Completed high school or equivalent degree	40.1%	40.0%	40.4%	40.1%
Completed noncollege business/trade/technical school	3.5%	6.4%	0.2%	3.6%
Some college/two-year degree	8.8%	31.0%	12.9%	10.9%
Completed college or higher	2.4%	1.7%	19.9%	3.2%
TOTAL	100.0%	100.0%	100.0%	100.0%
SAMPLE SIZE (N)	362	78	37	477

SOURCE: This table was constructed based on usable responses to Question 10 of the client survey.

NOTES: The percentages presented in this table are based only on usable responses, excluding missing, don't know, and refusal responses. All usable responses were weighted as described in Chapter 3 and in the Technical Appendix volume to represent all emergency food clients of the Food Bank of Central and Eastern North Carolina. The sample sizes (N) also include missing data.

Missing, don't know, and refusal responses combined are 1.2% for pantry clients, 0.0% for kitchen clients, 0.0% for shelter clients, and 1.1% for all clients.

As Table 5.5.1 shows, 42.1% of the clients at emergency food programs have not completed high school. The comparable percentage for the entire U.S. adult population is 15.4%.¹² More details follow:

¹² *Statistical Abstract of the United States, 2004-2005*. Table No. 212.

- 40.1% of all clients finished high school but no further education beyond high school.
- 10.9% of all clients have some college education or completed a two-year degree.
- 3.2% of all clients have completed college or beyond.

5.6 RACIAL AND ETHNIC BACKGROUND

Clients were asked about their racial and ethnic background. Table 5.6.1 summarizes the results.

TABLE 5.6.1
RACIAL AND ETHNIC BACKGROUND
(Adults Interviewed at A2H Emergency Food Providers)

Clients' Racial ^a and Ethnic Background	Adult Clients Who Pick Up Food at a Pantry	Adult Clients at a Kitchen	Adult Clients at a Shelter	All Adult Clients
Non-Hispanic White ^b	23.6%	28.9%	39.7%	24.8%
Non-Hispanic Black	71.2%	61.5%	55.3%	69.6%
American Indian or Alaskan Native	4.5%	5.1%	6.0%	4.7%
Native Hawaiian or other Pacific Islander	0.7%	0.0%	0.0%	0.6%
Asian	0.0%	1.2%	0.0%	0.1%
Latino or Hispanic				
Mexican, Mexican American, Chicano	1.4%	2.8%	0.0%	1.5%
Puerto Rican	0.3%	0.0%	0.0%	0.2%
Cuban	0.0%	0.0%	0.0%	0.0%
Other Latino or Hispanic	0.8%	0.0%	0.0%	0.7%
SUBTOTAL	2.6%	2.8%	0.0%	2.4%
Other ^c	0.4%	6.3%	0.8%	0.9%
SAMPLE SIZE (N)	362	78	37	477

SOURCE: This table was constructed based on usable responses to questions 11, 11a, and 12 of the client survey.

NOTES: The percentages presented in this table are based only on usable responses, excluding missing, don't know, and refusal responses. All usable responses were weighted as described in Chapter 3 and in the Technical Appendix volume to represent all emergency food clients of the Food Bank of Central and Eastern North Carolina. The sample sizes (N) also include missing data.

For race, missing, don't know, and refusal responses combined are 0.0% for pantry clients, 0.0% for kitchen clients, 0.0% for shelter clients, and 0.0% for all clients.

For ethnicity, missing, don't know, and refusal responses combined are 1.1% for pantry clients, 3.7% for kitchen clients, 0.8% for shelter clients, and 1.3% for all clients.

^aMultiple responses were accepted for races.

^bNote that Table 5.6.1 of *Hunger in America 2001* showed racial distribution of all respondents regardless of their ethnicity. In the current table, race categories (including "Other") reflect racial distribution of non-Hispanic respondents only.

^cMost respondents who marked "Other" as their choice did not provide further information. Those who provided an answer sometimes indicated their nationality, but because the number of usable responses was small, recoding of those responses based on this information was not performed.

Racial or ethnic background of the clients at emergency food program sites follows:

- Among the clients who come to all program sites, 24.8% are non-Hispanic white; 69.6% non-Hispanic black; and 4.7% American Indian or Alaskan Native.
- 0.6% are native Hawaiian or other Pacific Islander, and 0.1% are Asian.
- A total of 2.4% of the clients at all program sites indicate they are Spanish, Latino, or of Hispanic descent or origin.

5.7 EMPLOYMENT OF ADULTS IN HOUSEHOLD

Client respondents provided information on their households' current employment status.

Tables 5.7.1 and 5.7.2 present the findings regarding all adults in the households.¹³

TABLE 5.7.1
EMPLOYMENT STATUS OF ADULTS IN HOUSEHOLD

	Pantry	Kitchen	Shelter	All
Percentage of employed adults among all adults in client households	24.7%	49.7%	24.7%	27.1%
SAMPLE SIZE (N)	637	127	39	803
Percentage of employed adults among adults younger than age 65 in client household	32.9%	53.0%	27.4%	35.2%
SAMPLE SIZE (N)	494	118	38	650
Percentage of client households with one or more adults employed	37.9%	48.5%	n.p.	38.3%
SAMPLE SIZE (N)	362	78	5	477

SOURCE: This table was constructed based on all responses to questions 3 and 6 of the client survey.

NOTES: The percentages in this table, unlike those in most other tables, were calculated without leaving out item nonresponses. Because this table was constructed combining responses to several questions, excluding item nonresponses could have caused confusion.

For all adults in the household, missing, don't know, and refusal responses combined are 0.3% for pantry clients, 0.4% for kitchen clients, 0.0% for shelter clients, and 0.3% for all clients.

For adults younger than age 65 in the household, missing, don't know, and refusal responses combined are 0.4% for pantry clients, 0.5% for kitchen clients, 0.0% for shelter clients, and 0.4% for all clients.

For client households, missing, don't know, and refusal responses combined are 0.0% for pantry clients, 0.0% for kitchen clients, 0.0% for shelter clients, and 0.0% for all clients.

Among the adults who come to program sites, 23.9% are currently employed. When we consider all adults in client households, 27.1% are employed.

¹³ Data are available for at most 10 members of the household. See Technical Appendix volume for details.

- 37.9% of the pantry client households have one or more adults currently employed.
- 48.5% of the kitchen client households have one or more adults currently employed.
- n.p. of the shelter client households have one or more adults currently employed.

TABLE 5.7.2

DETAILED EMPLOYMENT STATUS OF ADULTS IN HOUSEHOLD

	Pantry	Kitchen	Shelter	All
Current employment status of all adults in client households				
Full-time	14.1%	38.8%	7.7%	16.3%

Clients participating in government-sponsored job training or work experience programs among those who have never worked	n.p.	n.p.	n.p.	n.p.
SAMPLE SIZE (N) – Clients who have never worked	6	2	1	9

SOURCE: This table was constructed based on all responses to questions 3, 6, 12a, 13, 14a, and 15 of the client survey.

NOTE: The percentages in this table, unlike those in most other tables, were calculated without leaving out item nonresponses (labeled “unknown”). Because this table was constructed combining responses to several questions, excluding item nonresponses could have caused confusion. All responses were weighted as described in Chapter 3 and in the Technical Appendix volume to represent all emergency food clients or households of the Food Bank of Central and Eastern North Carolina.

^aIncludes only households with at least one adult younger than age 65.

As shown in Table 5.7.2, when we consider the employment status of all adults in client households, 16.3% are employed full-time, 10.8% are employed part-time, and the remaining 72.9% are currently unemployed. Details of the employment status of adult clients who come to program sites follow:

- Overall, 12.9% of the adult clients at program sites are currently employed full-time; 11.1% employed part-time.
- 8.9% of the clients have recently lost their job, having been unemployed for three months or less.
- 6.7% of all clients have been unemployed for one to two years.
- 50.8% of all clients have not worked for more than two years.
- Among those who have worked before or are currently working, 10.6% either had or currently have managerial or professional jobs.

- 0.9% of the clients had never worked; of these, n.p. are participating in government-sponsored job training or work experience programs.

5.8 HOUSEHOLD INCOME

Lack of sufficient income usually plays a major role in forcing a person or a family to seek assistance from an A2H emergency food provider. In this section, we examine patterns of income receipt, for both monthly and annual income.

5.8.1 Federal Poverty Level

The U.S. government periodically establishes poverty guidelines to provide an indication of the levels of income below which households of various sizes would be considered impoverished. In parts of the analysis in this section, it will be useful to refer to these guidelines as a tool in understanding the meaning of various income levels. For reference, Table 5.8.1.1 presents 100% of these federal poverty levels.

TABLE 5.8.1.1
THE 2005 FEDERAL POVERTY LEVEL—MONTHLY INCOME

Household Size	48 Contiguous States and DC	Alaska	Hawaii
1	\$798	\$996	\$918
2	\$1,069	\$1,336	\$1,230

4	\$1,613	\$2,016	\$1,855
5	\$1,884	\$2,356	\$2,168
6	\$2,156	\$2,696	\$2,480
7	\$2,428	\$3,036	\$2,793
8	\$2,699	\$3,376	\$3,105
Each additional member	+\$272	+\$340	+\$313

SOURCE: Federal Register, Vol. 70, No. 33, February 18, 2005, pp. 8373-8375.

NOTE: The 2005 federal poverty guidelines (also known as the federal poverty level) reflect price changes through calendar year 2004; accordingly they are approximately equal to the Census Bureau poverty thresholds for calendar year 2004.

5.8.2 Household Income for the Previous Month

Clients were asked to report their total household income for the previous month or to choose from a set of predefined income brackets. The results are in Table 5.8.2.1.

TABLE 5.8.2.1

HOUSEHOLD INCOME FOR THE PREVIOUS MONTH

Income for the Previous Month	Pantry Client Households	Kitchen Client Households	Shelter Client Households	All Client Households
Total monthly income				
No income	5.9%	5.0%	17.5%	6.4%

	72.7%	74.2%	100.3%	74.2%

TABLE 5.8.2.1 (continued)

Income for the Previous Month	Pantry Client Households	Kitchen Client Households	Shelter Client Households	All Client Households
SAMPLE SIZE (N)	362	78	37	477

SOURCE: This table was constructed based on all responses to questions 29 and 29a of the client survey.

NOTES: The percentages presented in this table, unlike those in most other tables, were calculated without leaving out item nonresponses (labeled “unknown”). To ensure that key percentages, such as that for no income, appear consistent within this table and across related tables, a constant denominator, which includes item nonresponses, was used. All responses were weighted as described in Chapter 3 and in the Technical Appendix volume to represent all emergency food clients or households of the Food Bank of Central and Eastern North Carolina.

For total monthly income, missing, don’t know, and refusal responses combined are 10.5% for pantry clients, 5.4% for kitchen clients, 12.6% for shelter clients, and 10.2% for all clients. The missing rates we report here were obtained after we cross-imputed missing responses for monthly and yearly income variables.

For income as percentage of federal poverty level, missing, don’t know, and refusal responses combined are 10.5% for pantry clients, 5.4% for kitchen clients, 12.6% for shelter clients, and 10.2% for all clients.

^aFor the calculation of the average and the median, responses given as a range were recoded to be the midpoint of the range.

^bThe percentages in this panel may not be equal to those in the corresponding row of the upper panel of this table because the two panels of data may have different item nonresponse rates. The calculation in the lower panel required information about household size as well as household income.

Table 5.8.2.1 shows that 6.4% of all client households had no income at all for the month prior to the interview. More details on income follow:

- 5.9% of the pantry client households had no monthly income.
- 5.0% of the kitchen client households had no monthly income.
- 17.5% of the shelter client households had no monthly income.
- 59.5% of all client households had monthly household income less than \$1,000.

- Average household income among all clients during the previous month was \$880 (median: \$750). By contrast, the mean for the U.S. population as a whole in 2004 was \$5,006 (median: \$3,724).¹⁴
- Average monthly household income among the pantry clients was \$830 (median: \$750).
- Average monthly household income among the kitchen clients was \$1,060 (median: \$800).
- Average monthly household income among the shelter clients was \$1,420 (median: \$880).
- 81.9% of client households had an income of 130% or below the federal poverty level during the previous month.
- Average monthly household income among all client households as a percentage of the federal poverty level was 78.6% (median: 74.2%).
- Average monthly household income among pantry client households was 73.0% (median: 72.7%) of the federal poverty level.
- Average monthly household income among kitchen client households was 84.7% (median: 74.2%) of the federal poverty level.
- Average monthly household income among shelter client households was 169.1% (median: 100.3%) of the federal poverty level.

¹⁴ U.S. Census Bureau. Income, Poverty, and Health Insurance Coverage in the United States: 2004. August 2005, pp. 60-229.

5.8.3 Sources of Household Income for the Previous Month

Clients were asked to indicate the major source of their household income for the previous month. They were then asked to name all sources of their household income. Table 5.8.3.1 and Table 5.8.3.2 summarize the findings.

TABLE 5.8.3.1

MAIN SOURCE OF HOUSEHOLD INCOME FOR THE PREVIOUS MONTH

Main Source of Household Income for Previous Month	Pantry Client Households	Kitchen Client Households	Shelter Client Households	All Client Households
Job	19.4%	50.5%	57.4%	23.9%
Government welfare assistance				
Temporary Assistance for Needy Families (TANF)	1.2%	0.0%	0.0%	1.0%
General Assistance (GA) ^a	0.0%	0.0%	0.0%	0.0%
SUBTOTAL	1.2%	0.0%	0.0%	1.0%
Other government sources				
Social Security	34.0%	13.3%	0.2%	30.5%
Unemployment compensation	1.0%	0.0%	0.0%	0.9%
Disability (SSDI)/Workers' Compensation	11.8%	5.0%	11.2%	11.2%
Supplemental Security Income (SSI)	6.8%	4.4%	0.8%	6.3%
SUBTOTAL	53.7%	22.7%	12.3%	49.0%
Nongovernment, nonjob sources				
Pension	3.1%	2.2%	0.0%	2.9%
Child support	1.1%	0.0%	0.0%	1.0%
Churches	0.0%	0.1%	0.0%	0.0%

Other ^b	2.1%	8.0%	0.3%	2.5%
No income	5.9%	5.0%	17.5%	6.4%
Unknown	12.5%	11.6%	12.6%	12.4%
TOTAL	100.0%	100.0%	100.0%	100.0%
SAMPLE SIZE (N)	362	78	37	477

SOURCE: This table was constructed based on all responses to questions 29 and 30 of the client survey.

TABLE 5.8.3.1 (*continued*)

NOTES: The percentages presented in this table, unlike those in most other tables, were calculated without leaving out item nonresponses (labeled “unknown”). To ensure that key percentages, such as that for no income, appear consistent within this table and across related tables, a constant denominator, which includes item nonresponses, was used. All responses were weighted as described in Chapter 3 and in the Technical Appendix volume to represent all emergency food clients or households of the Food Bank of Central and Eastern North Carolina.

Missing, don’t know, and refusal responses combined are 12.5% for pantry clients, 11.6% for kitchen clients, 12.6% for shelter clients, and 12.4% for all clients.

^aEstimates for GA and TANF should be used with caution, since some respondents may not have understood the names of the programs under which they were receiving benefits. Indeed, in some states, the regular GA program is not offered, although other sources of assistance are sometimes available and could have been confused with GA. States where GA is not available include but are not limited to Georgia, Michigan, and Oklahoma.

^bThis includes some form of limited savings.

Overall, 23.9% of the clients indicated that a job was the main source of income for their households for the previous month. Other sources of income are as follows:

- For 1.0% of all clients, welfare assistance from the government such as TANF and GA was the main source of household income.
- For 49.0% of all clients, other government assistance such as social security or unemployment compensation was the main source of household income.
- For 4.8% of all clients, income came mainly from nongovernment, nonjob sources, such as pension and child support.

TABLE 5.8.3.2

ALL SOURCES OF HOUSEHOLD INCOME FOR PREVIOUS MONTH

All Sources of Household Income for Previous Month ^a	Pantry Client Households	Kitchen Client Households	Shelter Client Households	All Client Households
Job	37.9%	48.5%	27.7%	38.3%
Government welfare assistance				
Temporary Assistance for Needy Families (TANF)	2.2%	0.0%	1.1%	2.0%
General Assistance (GA) ^b	2.0%	0.0%	0.0%	1.8%
Other government sources				
Social Security	49.2%	21.7%	12.3%	45.0%
Unemployment compensation	4.3%	3.7%	7.9%	4.4%
Disability (SSDI)/Workers' Compensation	23.4%	22.7%	12.6%	22.8%
Supplemental Security Income (SSI)	22.4%	11.4%	1.9%	20.4%
Government assistance with child care costs	2.3%	0.0%	0.0%	2.0%
Nongovernment, nonjob sources				
Pension	12.4%	20.0%	0.0%	12.4%
Child support	5.3%	0.1%	0.0%	4.6%
Alimony	0.7%	0.0%	0.0%	0.6%
Relatives	10.3%	11.2%	10.0%	10.3%
No income	5.9%	5.0%	17.5%	6.4%
SAMPLE SIZE (N)	362	78	37	477

SOURCE: This table was constructed based on all responses to questions 6, 25, and 29 of the client survey.

NOTES: The percentages presented in this table, unlike those in most other tables, were calculated without leaving out item nonresponses (labeled "unknown"). To ensure that key percentages, such as that for no income, appear consistent within this table and across related tables, a constant denominator, which includes item nonresponses, was used. All responses were weighted as described in Chapter 3 and in the Technical Appendix volume to represent all emergency food clients or households of the Food Bank of Central and Eastern North Carolina.

Missing, don't know, and refusal responses combined are 0.5% for pantry clients, 0.0% for kitchen clients, 0.0% for shelter clients, and 0.4% for all clients.

^aMultiple responses were accepted.

^bEstimates for GA and TANF should be used with caution, since some respondents may not have understood the names of the programs under which they were receiving benefits. Indeed, in some states, the regular GA program is not offered, although other sources of assistance are sometimes available and could have been confused with GA. States where GA is not available include but are not limited to Georgia, Michigan, and Oklahoma.

When clients were asked about *all* sources of their household income for the previous month, 38.3% included a job as a source.

- For 2.0% of all clients, TANF was a source of household income during the previous month.
- For 1.8%, GA was a source of household income.
- 45.0% of all clients said they received social security benefits
- 22.8% chose SSDI or workers' compensation as a source of household income.
- 20.4% mentioned SSI as a source.
- In addition, 12.4%, 4.6%, and 10.3% of the clients indicate pension, child support, and their relatives, respectively, as a source of income.

5.8.4 Annual Household Income in 2004

Clients also provided estimates of their total household income in the year 2004. Table 5.8.4.1 shows their annual income in dollars and as a percentage of the federal poverty level.

TABLE 5.8.4.1
HOUSEHOLD INCOME FOR 2004

	Pantry Client Households	Kitchen Client Households	Shelter Client Households	All Client Households

SAMPLE SIZE (N)	362	78	37	477

SOURCE: This table was constructed based on all responses to questions 29 and 31 of the client survey.

NOTES: The percentages presented in this table, unlike those in most other tables, were calculated without leaving out item nonresponses (labeled “unknown”). To ensure that key percentages, such as that for no income, appear consistent within this table, a constant denominator, which includes item nonresponses, was used. All responses were weighted as described in Chapter 3 and in the Technical Appendix volume to represent all emergency food clients or households of the Food Bank of Central and Eastern North Carolina.

For total annual income, missing, don’t know, and refusal responses combined are 9.8% for pantry clients, 4.8% for kitchen clients, 12.6% for shelter clients, and 9.5% for all clients. The missing rates we report here were obtained after we cross-imputed missing responses for monthly and yearly income variables.

For income as percentage of the federal poverty level, missing, don’t know, and refusal responses combined are 9.8% for pantry clients, 4.8% for kitchen clients, 12.6% for shelter clients, and 9.5% for all clients.

^aFor the calculation of the average and the median, responses given as a range were recoded to be the midpoint of the bracket.

^bSee Table 5.8.1.1 for the federal poverty levels.

^cThe percentages in this row may not be equal to those in the corresponding row of the upper panel of this table, because the two panels of data may have different item nonresponse rates. The calculation in the lower panel required information about household size as well as household income.

In the year 2004, 49.6% of all clients had a household income less than \$10,000. More information about annual income of client households follows:

- Average household income among all clients in year 2004 was \$11,520.
- 80.2% of the clients’ households had an income of 130% or below the federal poverty level.
- Average household income as percentage of the federal poverty level was 85% (median: 73%).

5.9 HOUSING

5.9.1 Housing Status

Table 5.9.1.1 shows the housing status of the client households. It shows whether they have a place to live, what kind of housing they have, whether they own or rent, and what their other housing-related experiences have been.

TABLE 5.9.1.1
HOUSING STATUS

	Pantry Client Households	Kitchen Client Households	Shelter Client Households	All Client Households
The kind of place you live now?				
Clients with a place to live				
House	46.8%	36.6%	10.1%	44.1%
Mobile home/trailer	20.5%	1.8%	16.1%	18.7%
Apartment	30.2%	25.9%	0.0%	28.3%
Room	1.9%	19.8%	0.0%	3.3%
Live with family, friends	0.0%	1.8%	0.0%	0.2%
SUBTOTAL	99.3%	85.9%	26.2%	94.6%
Clients without a place to live				
Homeless, living in shelter or mission	0.7%	10.6%	73.8%	5.1%
Homeless, living on the street	0.0%	3.6%	0.0%	0.3%
Car, van, or recreational vehicle	0.0%	0.0%	0.0%	0.0%
Abandoned building	0.0%	0.0%	0.0%	0.0%
SUBTOTAL	0.7%	14.1%	73.8%	5.4%
TOTAL	100.0%	100.0%	100.0%	100.0%
SAMPLE SIZE (N)	362	78	37	477
Among clients who have a place to live				
Own the place you live	35.3%	20.4%	n.p.	34.9%
Rent your place	55.8%	73.3%	n.p.	56.4%
Live free with someone else	4.9%	6.3%	n.p.	5.0%
Other ^a	4.0%	0.0%	n.p.	3.7%
TOTAL	100.0%	100.0%	n.p.	100.0%
Clients late paying the last month's rent or mortgage	12.8%	38.9%	n.p.	15.0%

TABLE 5.9.1.1 (continued)

	Pantry Client Households	Kitchen Client Households	Shelter Client Households	All Client Households
Clients whose households receive Section 8 or Public Housing Assistance	19.9%	6.8%	n.p.	17.7%
SAMPLE SIZE (N) – Clients with a place to live	360	56	6	422

SOURCE: This table was constructed based on usable responses to questions 16, 17, 18, and 81 of the client survey.

NOTES: The percentages presented in this table are based only on usable responses, excluding missing, don't know, and refusal responses. All usable responses were weighted as described in Chapter 3 and in the Technical Appendix volume to represent all emergency food clients of the Food Bank of Central and Eastern North Carolina. The sample sizes (N) also include missing data.

For the kind of place where living, missing, don't know, and refusal responses combined are 0.1% for pantry clients, 0.0% for kitchen clients, 0.0% for shelter clients, and 0.1% for all clients.

For those with a place to live, missing, don't know, and refusal responses combined are 1.3% for pantry clients, 2.9% for kitchen clients, 1.1% for shelter clients, and 1.4% for all clients.

For those late paying rent or mortgage, missing, don't know, and refusal responses combined are 1.5% for pantry clients, 0.0% for kitchen clients, 0.0% for shelter clients, and 1.3% for all clients.

For those receiving Section 8, missing, don't know, and refusal responses combined are 15.3% for pantry clients, 4.7% for kitchen clients, 11.2% for shelter clients, and 14.2% for all clients.

^aThis includes "working for rent" and halfway houses.

Among all client households, 5.4% were without a place to live. More details on housing status of the clients follow:

- 73.8% of shelter client households were homeless.
- 14.1% of kitchen client households were homeless.
- 0.7% of pantry client households were homeless.
- 35.3% of pantry client households own the place where they live.
- 15.0% of the client households with a place to live were late paying the previous month's rent or mortgage.
- 17.7% of the client households with a place to live said they received Section 8 or Public Housing Assistance at the time of the interview.

5.9.2 Household Resources

Clients indicated whether their households have access to a kitchen, a working telephone, or a working car. Responses are presented in Table 5.9.2.1.

TABLE 5.9.2.1
HOUSEHOLD RESOURCES

Household Resources	Pantry Client Households	Kitchen Client Households	Shelter Client Households	All Client Households
Clients with access to a place where they can prepare a meal				
Yes	97.2%	87.5%	60.3%	94.5%
No	2.8%	12.5%	39.7%	5.5%
TOTAL	100.0%	100.0%	100.0%	100.0%
Clients have access to a working telephone				
Yes	88.5%	79.3%	99.2%	88.2%
No	11.5%	20.7%	0.8%	11.8%
TOTAL	100.0%	100.0%	100.0%	100.0%
Clients have access to a working car				
Yes	70.8%	48.0%	45.1%	67.6%
No	29.2%	52.0%	54.9%	32.4%
TOTAL	100.0%	100.0%	100.0%	100.0%
SAMPLE SIZE (N)	362	78	37	477

SOURCE: This table was constructed based on usable responses to Question 19 of the client survey.

NOTES: The percentages presented in this table are based only on usable responses, excluding missing, don't know, and refusal responses. All usable responses were weighted as described in Chapter 3 and in the Technical Appendix volume to represent all emergency food clients of the Food Bank of Central and Eastern North Carolina. The sample sizes (N) also include missing data.

For access to a place, missing, don't know, and refusal responses combined are 0.3% for pantry clients, 0.0% for kitchen clients, 0.0% for shelter clients, and 0.3% for all clients.

For working telephone, missing, don't know, and refusal responses combined are 0.4% for pantry clients, 0.0% for kitchen clients, 0.0% for shelter clients, and 0.3% for all clients.

For clients with working cars, missing, don't know, and refusal responses combined are 0.4% for pantry clients, 0.0% for kitchen clients, 0.0% for shelter clients, and 0.4% for all clients.

Findings about selected household resources presented in Table 5.9.2.1 include:

- Overall, 94.5% of the clients have access to a place where they can prepare a meal.
 - 97.2% of the pantry clients have access to such a place.
 - 87.5% of the kitchen clients have access to such a place.
 - 60.3% of the shelter clients have access to such a place.
- Overall, 88.2% of the clients have access to a working telephone.
 - 88.5% of the pantry clients have access to a working telephone.
 - 79.3% of the kitchen clients have access to a working telephone.
 - 99.2% of the shelter clients have access to a working telephone.
- Overall, 67.6% of the clients have access to a working car.
 - 70.8% of the pantry clients have access to a working car.
 - 48.0% of the kitchen clients have access to a working car.
 - 45.1% of the shelter clients have access to a working car.

6. CLIENTS: FOOD INSECURITY AND HUNGER

Food insecurity is a complex, multifaceted phenomenon that varies along a continuum of successive stages as it becomes more severe. A scaling tool developed by the USDA provides an important approach being used increasingly to assess food security and hunger among households. Six questions in a six-item short module, the minimal information required to construct the scale, were included in the client survey.¹⁵ Food security and food insecurity are conceptually defined as the following¹⁶:

- Food security: “Access by all people at all times to enough food for an active, healthy life. Food security includes at a minimum: (1) the ready availability of nutritionally adequate and safe foods, and (2) an assured ability to acquire acceptable foods in socially acceptable ways (e.g., without resorting to emergency food supplies, scavenging, stealing, or other coping strategies).”
- Food insecurity: “Limited or uncertain availability of nutritionally adequate and safe foods or limited or uncertain ability to acquire acceptable foods in socially acceptable ways.”

This chapter begins by assessing A2H clients’ levels of food security, first for all households and then separately for households with children and for households with elderly members. Subsequent sections then provide data on household responses to the specific questions used in constructing the food security scores.

¹⁵ Bickel, Gary, Mark Nord, Cristofer Price, William Hamilton, and John Cook. “Guide to Measuring Household Food Security, Revised 2000.” U.S. Department of Agriculture, Food and Nutrition Service, March 2000.

6.1 HOUSEHOLD FOOD INSECURITY

Clients responded to a six-item short module for classifying households by food security status level. Food security scale scores were assigned to households according to the “Guide to Measuring Household Food Security, Revised 2000.”¹⁷

TABLE 6.1.1

HOUSEHOLD FOOD INSECURITY

Food Security Among Clients’ Households	Pantry Client Households	Kitchen Client Households	Shelter Client Households	All Client Households
Food security among all households				
Food secure	32.9%	35.0%	68.0%	34.8%
Food insecure				
Food insecure without hunger	46.1%	15.1%	20.4%	42.1%

TABLE 6.1.1 (continued)

Food Security Among Clients' Households	Pantry Client Households	Kitchen Client Households	Shelter Client Households	All Client Households
SAMPLE SIZE (N) – Households with seniors age 65 years or older	112	7	0	119

SOURCE: This table was constructed based on usable responses to questions 42, 43, 44, 44a, 45, and 46 of the client survey.

NOTES: The percentages presented in this table are based only on usable responses, excluding missing, don't know, and refusal responses. All usable responses were weighted as described in Chapter 3 and in the Technical Appendix volume to represent all emergency food clients of the Food Bank of Central and Eastern North Carolina. The sample sizes (N) also include missing data.

Constructed according to "Guide to Measuring Household Food Security, Revised 2000."

For all households, missing, don't know, and refusal responses combined are 1.6% for pantry clients, 0.0% for kitchen clients, 0.0% for shelter clients, and 1.3% for all clients.

For households with children younger than age 18, missing, don't know, and refusal responses combined are 2.8% for pantry clients, 0.0% for kitchen clients, 0.0% for shelter clients, and 2.6% for all clients.

For households with seniors, missing, don't know, and refusal responses combined are 0.1% for pantry clients, 0.0% for kitchen clients, N.A. for shelter clients, and 0.1% for all clients.

According to the six-item short module, 42.1% of all client households of the emergency food programs were food insecure without hunger. Another 23.1% were food insecure with hunger. Combined, a total of 65.2% were food insecure.

- Among the client households with children younger than age 18, 40.3% were food insecure without hunger and 23.5% were food insecure with hunger.
- Among the client households with seniors age 65 years or older, 42.6% were food insecure without hunger and 12.4% were food insecure with hunger.

TABLE 6.1.2

FOOD STAMP PROGRAM PARTICIPATION AND FOOD SECURITY

Food Security Among Clients' Households	Pantry Client Households	Kitchen Client Households	Shelter Client Households	All Client Households
Food Stamp Program participants				
Food secure	29.0%	n.p.	n.p.	31.0%
Food insecure				
Food insecure without hunger	51.3%	n.p.	n.p.	47.8%
Food insecure with hunger	19.6%	n.p.	n.p.	21.2%
SUBTOTAL	71.0%	n.p.	n.p.	69.0%
TOTAL	100.0%	n.p.	n.p.	100.0%
SAMPLE SIZE (N) – Food Stamp Program participants				
	124	22	10	156
Food Stamp Program nonparticipants				
Food secure	35.2%	23.6%	n.p.	36.9%
Food Insecure				
Food insecure without hunger	42.9%	17.3%	n.p.	39.0%
Food insecure with hunger	21.8%	59.1%	n.p.	24.1%
SUBTOTAL	64.8%	76.4%	n.p.	63.1%
TOTAL	100.0%	100.0%	n.p.	100.0%
SAMPLE SIZE (N) – Food Stamp Program nonparticipants				
	238	56	27	321

SOURCE: This table was constructed based on usable responses to questions 42, 43, 44, 44a, 45, and 46 of the client survey.

NOTES: The percentages presented in this table are based only on usable responses, excluding missing, don't know, and refusal responses. All usable responses were weighted as described in Chapter 3 and in the Technical Appendix volume to represent all emergency food clients of the Food Bank of Central and Eastern North Carolina. The sample sizes (N) also include missing data.

Constructed according to "Guide to Measuring Household Food Security, Revised 2000."

For participating households, missing, don't know, and refusal responses combined are 0.1% for pantry clients, 0.0% for kitchen clients, 0.0% for shelter clients, and 0.1% for all clients.

For nonparticipating households with seniors, missing, don't know, and refusal responses combined are 2.4% for pantry clients, 0.0% for kitchen clients, 0.0% for shelter clients, and 2.0% for all clients.

As will be discussed in detail in Chapter 7 below, about 35.3% of client households also receive benefits from the Food Stamp Program. Table 6.1.2 compares food security status among Food Stamp Program participants to that of nonparticipants.

- 47.8% of the client household receiving food stamps were food insecure without hunger. Another 21.2% were food insecure with hunger.
- In comparison, among the client households not receiving food stamps, 39.0% were food insecure without hunger, and 24.1% were food insecure with hunger.

6.2 INDICATORS OF FOOD INSECURITY IN HOUSEHOLDS

Table 6.2.1 presents responses to two of the questions involved in the six-item short module.

TABLE 6.2.1
INDICATORS OF FOOD INSECURITY IN HOUSEHOLDS

	Pantry Client Households	Kitchen Client Households	Shelter Client Households	All Client Households
<i>“The food we bought just didn’t last, and we didn’t have money to get more.” In the last 12 months, was that...?</i>				
Often true	31.5%	33.2%	4.1%	30.3%
Sometimes true	47.3%	34.3%	27.3%	45.1%
Never true	21.3%	32.5%	68.6%	24.6%
TOTAL	100.0%	100.0%	100.0%	100.0%
<i>“We couldn’t afford to eat balanced meals.” In the last 12 months, was that...?</i>				
Often true	17.3%	27.0%	2.2%	17.4%
Sometimes true	47.4%	37.1%	23.5%	45.3%
Never true	35.4%	35.9%	74.3%	37.4%
TOTAL	100.0%	100.0%	100.0%	100.0%
SAMPLE SIZE (N)	362	78	37	477

SOURCE: This table was constructed based on usable responses to questions 42 and 43 of the client survey.

NOTES: The percentages presented in this table are based only on usable responses, excluding missing, don’t know, and refusal responses. All usable responses were weighted as described in Chapter 3 and in the Technical Appendix volume to represent all emergency food clients of the Food Bank of Central and Eastern North Carolina. The sample sizes (N) also include missing data.

For food didn’t last, missing, don’t know, and refusal responses combined are 3.4% for pantry clients, 0.8% for kitchen clients, 0.0% for shelter clients, and 3.0% for all clients.

For not eating balanced meals, missing, don’t know, and refusal responses combined are 3.4% for pantry clients, 0.0% for kitchen clients, 0.0% for shelter clients, and 3.0% for all clients.

Overall, 75.4% of the client households reported that, during the previous 12 months, they had been in a situation where the food they bought “just didn’t last and they didn’t have

money to get more.” In addition, 62.6% of the client households were, often or sometimes during the previous 12 months, in a situation where they “couldn’t afford to eat balanced meals.”

6.3 INDICATORS OF FOOD INSECURITY AND HUNGER AMONG ADULTS

Table 6.3.1 presents responses to the four questions about adults in the six-item short module.

TABLE 6.3.1
INDICATORS OF FOOD INSECURITY AND HUNGER AMONG ADULTS

	Pantry Client Households	Kitchen Client Households	Shelter Client Households	All Client Households
How often adult clients or other adults in the household cut the size of meals or skipped meals because there wasn't enough money for food for the previous 12 months ^a				
Almost every month	16.8%	26.1%	9.5%	17.3%
Some months but not every month	16.0%	3.7%	3.4%	14.3%
Only one or two months	7.6%	19.8%	11.5%	8.8%
Never	59.7%	50.4%	75.5%	59.6%
Clients who ate less than they felt they should because there wasn't enough money to buy food for the previous 12 months				
Yes	41.9%	53.7%	20.7%	41.9%
No	58.1%	46.3%	79.3%	58.1%
TOTAL	100.0%	100.0%	100.0%	100.0%
Clients who were hungry but didn't eat because they couldn't afford enough food for the previous 12 months				
Yes	23.1%	53.3%	13.0%	25.3%
No	76.9%	46.7%	87.0%	74.7%
TOTAL	100.0%	100.0%	100.0%	100.0%
Clients or other adults in the household ever did not eat for a whole day because there wasn't enough money for food				
Yes	17.6%	29.7%	2.8%	18.0%
No	82.4%	70.3%	97.2%	82.0%
TOTAL	100.0%	100.0%	100.0%	100.0%
SAMPLE SIZE (N)	362	78	37	477

SOURCE: This table was constructed based on usable responses to questions 44a, 45, 46, and 47 of the client survey.

NOTES: The percentages presented in this table are based only on usable responses, excluding missing, don't know, and refusal responses. All usable responses were weighted as described in Chapter 3 and in the

TABLE 6.3.1 (continued)

Technical Appendix volume to represent all emergency food clients of the Food Bank of Central and Eastern North Carolina. The sample sizes (N) also include missing data.

For cutting meal size, missing, don't know, and refusal responses combined are 4.2% for pantry clients, 0.8% for kitchen clients, 6.9% for shelter clients, and 4.0% for all clients.

For eating less, missing, don't know, and refusal responses combined are 2.2% for pantry clients, 0.0% for kitchen clients, 0.0% for shelter clients, and 1.9% for all clients.

For being hungry because could not afford food, missing, don't know, and refusal responses combined are 3.7% for pantry clients, 0.2% for kitchen clients, 0.0% for shelter clients, and 3.2% for all clients.

For not eating for a whole day, missing, don't know, and refusal responses combined are 1.9% for pantry clients, 0.0% for kitchen clients, 0.0% for shelter clients, and 1.6% for all clients.

^aResponses may not add up to 100% because this panel was constructed from two questions: "Never" came from Question 44, and the other responses from Question 44a.

Adults in 17.3% of the client households had to cut the size of meals or skip meals because there wasn't enough money for food *almost every month* of the previous 12 months.

Responses to the remaining three questions are:

- 41.9% of the clients ate less than they felt they should because there was not enough money to buy food during the previous 12 months.
- Adults in 25.3% of the client households were hungry but did not eat because they could not afford enough food during the previous 12 months.
- Adults in 18.0% of the client households did not eat for a whole day at least once during the previous 12 months because there was not enough money for food.

6.4 INDICATORS OF FOOD INSECURITY AND HUNGER AMONG CHILDREN

In addition to the six questions shown in tables 6.2.1 and 6.3.1, clients were asked three additional questions about their children's skipping meals, being hungry, and not eating enough.

TABLE 6.4.1

INDICATORS OF FOOD INSECURITY AND HUNGER AMONG CHILDREN

	Pantry Client Households	Kitchen Client Households	Shelter Client Households	All Client Households
How often during the previous 12 months clients' child/children was/were not eating enough because they just couldn't afford enough food				
Often	2.2%	n.p.	n.p.	2.2%
Sometimes	30.5%	n.p.	n.p.	29.2%
Never	67.3%	n.p.	n.p.	68.7%
TOTAL	100.0%	n.p.	n.p.	100.0%
Clients whose child/children ever skipped meals because there wasn't enough money for food during the previous 12 months				
Yes	13.6%	n.p.	n.p.	13.0%
No	86.4%	n.p.	n.p.	87.0%
TOTAL	100.0%	n.p.	n.p.	100.0%
Clients whose child/children was/were hungry at least once during the previous 12 months, but couldn't afford more food				
Yes	20.8%	n.p.	n.p.	19.9%
No	79.2%	n.p.	n.p.	80.1%
TOTAL	100.0%	n.p.	n.p.	100.0%
SAMPLE SIZE (N) – Households with children younger than age 18	135	9	3	147

SOURCE: This table was constructed based on usable responses to questions 3, 6b, 49, 50, and 51 of the client survey.

NOTES: The percentages presented in this table are based only on usable responses, excluding missing, don't know, and refusal responses. All usable responses were weighted as described in Chapter 3 and in the Technical Appendix volume to represent all emergency food clients of the Food Bank of Central and Eastern North Carolina. The sample sizes (N) also include missing data.

TABLE 6.4.1 (continued)

For children not eating enough, missing, don't know, and refusal responses combined are 5.1% for pantry clients, 0.0% for kitchen clients, 0.0% for shelter clients, and 4.9% for all clients.

For children skipping meals, missing, don't know, and refusal responses combined are 5.1% for pantry clients, 0.0% for kitchen clients, 67.9% for shelter clients, and 5.6% for all clients.

For children hungry, missing, don't know, and refusal responses combined are 5.4% for pantry clients, 0.0% for kitchen clients, 67.9% for shelter clients, and 5.8% for all clients.

Among all clients with children, 2.2% stated that, during the previous 12 months, their children were *often* not eating enough because they just couldn't afford enough food. Another 29.2% of the clients experienced such a situation *sometimes* during the previous 12 months.

- 13.0% of the clients with children said that their children skipped meals because there was not enough money for food during the previous 12 months.
- 19.9% of the clients with children said that their children were hungry at least once during the previous 12 months, but they could not afford more food.

6.5 CHOICE BETWEEN FOOD AND NECESSITIES

Clients were asked whether their families had to choose between food and necessities during the 12-month period prior to the interview. Table 6.5.1 summarizes the results.

TABLE 6.5.1
CHOICE BETWEEN FOOD AND NECESSITIES

	Pantry Client Households	Kitchen Client Households	Shelter Client Households	All Client Households
In the previous 12 months, clients or their family who ever had to choose at least once between				
Paying for food and paying for utilities or heating fuel	46.5%	43.2%	17.7%	44.7%
Paying for food and paying for rent or mortgage	33.1%	47.9%	17.9%	33.7%
Paying for food and paying for medicine or medical care	39.0%	23.2%	2.5%	35.8%
Households with all three situations	21.9%	17.1%	1.4%	20.5%
Households with two, but not three, of the situations	16.0%	21.3%	8.3%	16.1%
Households with just one of the situations	18.5%	19.6%	17.1%	18.5%
SAMPLE SIZE (N)	362	78	37	477

SOURCE: This table was constructed based on usable responses to Question 52 of the client survey.

NOTES: All usable responses were weighted as described in Chapter 3 and in the Technical Appendix volume to represent all emergency food clients of the Food Bank of Central and Eastern North Carolina. The sample sizes (N) also include missing data.

For choosing between food and utilities, missing, don't know, and refusal responses combined are 5.0% for pantry clients, 0.0% for kitchen clients, 0.0% for shelter clients, and 4.3% for all clients.

For choosing between food and rent (mortgage), missing, don't know, and refusal responses combined are 1.8% for pantry clients, 0.0% for kitchen clients, 0.8% for shelter clients, and 1.6% for all clients.

For choosing between food and medical care, missing, don't know, and refusal responses combined are 3.4% for pantry clients, 3.6% for kitchen clients, 0.0% for shelter clients, and 3.2% for all clients.

For number of situations, missing, don't know, and refusal responses combined are 1.6% for pantry clients, 0.0% for kitchen clients, 0.0% for shelter clients, and 1.4% for all clients.

As shown in Table 6.5.1, among pantry client households, 46.5% had to choose between paying for food and paying for utilities or heating; 33.1% had to choose between food and rent or mortgage; and 39.0% had to choose between food and medicine or medical care. Results for kitchen and shelter client households are:

- Among kitchen client households, 43.2% had to choose between paying for food and paying for utilities or heating; 47.9% between food and rent or mortgage; and 23.2% between food and medicine or medical care.
- Among shelter client households, 17.7% had to choose between paying for food and paying for utilities or heating; 17.9% between food and rent or mortgage; and 2.5% between food and medicine or medical care.

7. CLIENTS: USE OF FOOD ASSISTANCE PROGRAMS

Given the high levels of need evidenced by many clients in the A2H network, it is important to assess whether the clients of the Food Bank of Central and Eastern North Carolina are getting all the governmental nutrition assistance they are entitled to. This issue is examined here. The analysis begins by examining client participation in the Food Stamp Program, since it is the largest and most widely available government nutrition assistance program. Both levels of participation and reasons for non-participation are examined. A subsequent section examines participation in other government nutrition programs.

7.1 USE OF THE FOOD STAMP PROGRAM

Clients were asked a series of questions relating to the Food Stamp Program. Table 7.1.1 summarizes the findings.

TABLE 7.1.1
USE OF FOOD STAMP PROGRAM

Participation in Food Stamp Program	Pantry Client Households	Kitchen Client Households	Shelter Client Households	All Client Households
Client or anyone in the household had applied for food stamps	81.0%	71.5%	59.8%	79.1%
Client or anyone in the household currently receiving food stamps	37.3%	28.8%	12.9%	35.3%
Client or anyone in the household currently not receiving but received food stamps during the previous 12 months	7.6%	9.0%	3.1%	7.5%
Client or anyone in the household had applied for but had not received food stamps during the previous 12 months	34.0%	32.9%	43.8%	34.4%
SAMPLE SIZE (N)	362	78	37	477

TABLE 7.1.1 (continued)

Participation in Food Stamp Program	Pantry Client Households	Kitchen Client Households	Shelter Client Households	All Client Households
Number of weeks clients or their households have currently been receiving food stamps (for those who are receiving)				
Less than 2 weeks	0.8%	n.p.	n.p.	0.8%
2-4 weeks	1.1%	n.p.	n.p.	1.2%
5-12 weeks	5.0%	n.p.	n.p.	6.6%

	2	n.p.	n.p.	2
SAMPLE SIZE (N) – Clients who are currently receiving food stamps				
	124	22	10	156

SOURCE: This table was constructed based on usable responses to questions 32, 33, 34, 36, and 37 of the client survey.

NOTES: The percentages presented in this table are based only on usable responses, excluding missing, don't know, and refusal responses. All usable responses were weighted as described in Chapter 3 and in the Technical Appendix volume to represent all emergency food clients of the Food Bank of Central and Eastern North Carolina. The sample sizes (N) also include missing data.

The second, third, and fourth rows of the first panel do not add up exactly to the first row due to varying item nonresponses to the question involved.

TABLE 7.1.1 (continued)

For length of receipt of food stamps, missing, don't know, and refusal responses combined are 9.7% for pantry clients, 10.2% for kitchen clients, 0.0% for shelter clients, and 9.6% for all clients.

For period of time food stamps lasted, missing, don't know, and refusal responses combined are 0.9% for pantry clients, 0.0% for kitchen clients, 6.4% for shelter clients, and 0.9% for all clients.

Overall, 79.1% of the clients have applied for and 35.3% are currently receiving food stamps. More information includes:

- 48.6% of the clients who are receiving food stamps have been receiving them for more than two years.
- For 85.5% of the clients who are receiving food stamps, the stamps last for three weeks or less.
- On average, food stamps last for 2.3 weeks.

7.2 REASONS WHY CLIENTS NEVER APPLIED FOR FOOD STAMPS

Clients who had not applied for food stamps were asked why they or their households never applied for food stamps. Table 7.2.1 shows the results.

TABLE 7.2.1

REASONS WHY CLIENTS NEVER APPLIED FOR FOOD STAMPS

Reasons Why Clients or Their Households Never Applied for Food Stamps ^a	Pantry Client Households	Kitchen Client Households	Shelter Client Households	All Client Households
Ineligibility^b				
Don't think eligible because of income or assets				
All clients	44.9%	n.p.	n.p.	38.7%

TABLE 7.2.1 (continued)

Reasons Why Clients or Their Households Never Applied for Food Stamps ^a	Pantry Client Households	Kitchen Client Households	Shelter Client Households	All Client Households
Social stigma				
Feel embarrassed applying for benefits	1.8%	n.p.	n.p.	1.4%
Family or friends do not approve of my receiving benefits	0.0%	n.p.	n.p.	0.0%
Dislike relying on the government for assistance	1.8%	n.p.	n.p.	1.8%
Feel embarrassed using benefits	1.8%	n.p.	n.p.	1.4%
SUBTOTAL	1.8%	n.p.	n.p.	1.8%
Other				
Planning to apply, but not yet applied	5.8%	n.p.	n.p.	4.8%
Other ^d	23.2%	n.p.	n.p.	19.1%
SAMPLE SIZE (N) – Clients or their households who never applied for food stamps				
	84	22	14	120

SOURCE: This table was constructed based on usable responses to Question 38 of the client survey.

NOTES: All usable responses were weighted as described in Chapter 3 and in the Technical Appendix volume to represent all emergency food clients of the Food Bank of Central and Eastern North Carolina. The sample sizes (N) also include missing data.

Missing, don't know, and refusal responses combined are 11.6% for pantry clients, 6.0% for kitchen clients, 0.5% for shelter clients, and 9.9% for all clients.

^aMultiple responses were accepted.

^bSee Appendix A for food stamp eligibility criteria.

^cThe subtotal in this table indicates the percentage of people who provided one or more component items as their responses; thus, it may differ from the sum of component items.

^dThis includes working, having no mailing address, and being in a temporary living situation.

Reasons for not having applied for food stamps include:

- Overall, 45.0% of the clients who had not applied for food stamps did not do so because they believe they are not eligible or eligible for only a low benefit amount; 12.9% because it is too much hassle; 30.9% either because there is no need or because they think others would need the benefits more; and 1.8% because they associate a social stigma with food stamps.

- 38.7% of the clients indicated income above the eligible level as a reason for having not applied for food stamps.
- That 38.7% was broken down into two categories: those who had an income that is at or below 130% of the federal poverty level (25.1%), and those who had an income that is higher than 130% of the federal poverty level (9.6%).^{18,19}

¹⁸ Generalizing this result requires caution, as the income data collected through our client survey were not validated.

¹⁹ Broadly speaking, a household usually meets the income eligibility requirements for the Food Stamp Program if its gross income is less than 130% of the poverty level. However, it was not possible during the survey to collect all the detailed data necessary to assess eligibility. See Appendix B for the eligibility criteria.

7.3 REASONS WHY CLIENTS OR THEIR HOUSEHOLDS ARE NOT CURRENTLY RECEIVING FOOD STAMPS, FOR THOSE WHO HAVE APPLIED

Clients who have applied but are not currently receiving food stamps were asked why this is so. Results are shown in Table 7.3.1.

TABLE 7.3.1

REASONS WHY CLIENTS OR THEIR HOUSEHOLDS ARE NOT CURRENTLY RECEIVING FOOD STAMPS, FOR THOSE WHO HAVE APPLIED

Reasons Why Clients or Their Households Are Not Currently Receiving Food Stamps, for Those Who Have Applied for Food Stamps ^a	Pantry Client Households	Kitchen Client Households	Shelter Client Households	All Client Households
Ineligibility				
Ineligible income level	49.2%	10.2%	n.p.	45.5%
Change of household makeup	4.5%	6.8%	n.p.	4.4%
Time limit for receiving the help ran out	6.2%	6.3%	n.p.	5.9%
Citizenship status	0.0%	0.0%	n.p.	0.0%

Other reasons ^c	26.5%	26.3%	n.p.	25.8%
SAMPLE SIZE (N) – Clients who have applied for but are not currently receiving food stamps				
	154	34	13	201

SOURCE: This table was constructed based on usable responses to Question 35 of the client survey.

NOTES: All usable responses were weighted as described in Chapter 3 and in the Technical Appendix volume to represent all emergency food clients of the Food Bank of Central and Eastern North Carolina. The sample sizes (N) also include missing data.

TABLE 7.3.1 (continued)

Missing, don't know, and refusal responses combined are 6.0% for pantry clients, 10.4% for kitchen clients, 0.0% for shelter clients, and 6.0% for all clients.

^aMultiple responses were accepted.

^bThe subtotal in this table indicates the percentage of people who provided one or more component items as their responses; thus it may differ from the sum of component items.

^cThis includes "waiting" and "in progress."

Other findings include:

- Overall, 54.1% of the clients believe that they are not receiving food stamps because they are not eligible.
- 17.8% are not receiving food stamps because it is too much hassle.
- 11.8% are not receiving food stamps either because there is no need or because they think others would need the benefits more.

TABLE 7.3.2

REPORTED INCOME LEVELS OF CLIENTS WHO INDICATED INELIGIBLE INCOME
AS A REASON FOR NOT RECEIVING FOOD STAMPS

Reported Income Levels of Clients Who Indicated Ineligible Income as a Reason for Not Receiving Food Stamps	Pantry Client Households	Kitchen Client Households	Shelter Client Households	All Client Households
Ineligible income level	49.2%	10.2%	n.p.	45.5%
Income 130% of the federal poverty level or lower	36.7%	9.5%	n.p.	32.5%
Income higher than 130% of the federal poverty level	8.0%	0.0%	n.p.	9.0%
Income unknown	4.5%	0.7%	n.p.	4.0%
SAMPLE SIZE (N) – Clients who have applied for but are not currently receiving food stamps	154	34	13	201

As Table 7.3.2 shows, 45.5% of the clients indicated a higher-than-required income level as a reason they were not currently receiving food stamps. Those clients are further broken down into two categories based on the information about their previous month's household income: those whose income is 130% of the federal poverty level or lower (32.5%); and those whose income is higher than 130% of the federal poverty level (9.0%).

7.4 USE OF OTHER PROGRAMS

Clients also reported on other federal nutrition or child care programs they use. Table 7.4.1 shows the results.

TABLE 7.4.1
USE OF OTHER PROGRAMS

Other Program(s) Clients or Their Families Currently Participate in ^a	Pantry Client Households	Kitchen Client Households	Shelter Client Households	All Client Households
Government Mass Distribution Program or TEFAP (cheese, butter, etc., not from pantries)	26.4%	4.2%	5.6%	23.4%
SAMPLE SIZE (N)	362	78	37	477
Senior nutrition sites, such as senior centers that serve lunch	9.0%	n.p.	N.A.	8.8%
Home-delivered meals or meals-on-wheels (usually for seniors or people with disabilities)	2.9%	n.p.	N.A.	2.8%
Senior brown-bag programs that give out groceries and produce	10.5%	n.p.	N.A.	10.2%
SAMPLE SIZE (N) – Households with at least one senior member age 65 or older	112	7	0	119
Special Supplemental Nutrition Program for Women, Infants, and Children (WIC) ^b	64.1%	n.p.	n.p.	66.4%
SAMPLE SIZE (N) – Households with at least one child ages 0-3 years	50	2	1	53
Child day care	29.7%	n.p.	n.p.	27.6%
Government assistance for child day care among those using child day care ^c	71.1%	N.A.	N.A.	71.1%

School lunch program	54.5%	n.p.	n.p.	53.7%
School breakfast program	44.1%	n.p.	n.p.	43.5%
After-school snack program	5.6%	n.p.	n.p.	6.1%
Child care food program, such as meals at subsidized child care centers	5.9%	n.p.	n.p.	5.6%
Summer food program providing free lunches for children	9.8%	n.p.	n.p.	9.3%
SAMPLE SIZE (N) – Households with at least one child younger than age 18	135	9	3	147

TABLE 7.4.1 (continued)

SOURCE: This table was constructed based on usable responses to questions 7a, 8, and 41 of the client survey.

NOTES: All usable responses were weighted as described in Chapter 3 and in the Technical Appendix volume to represent all emergency food clients of the Food Bank of Central and Eastern North Carolina. The sample sizes (N) also include missing data.

^aMultiple responses were accepted.

^bNote that in *Hunger in America 2001* households with children ages 0 to 5 years were used as the base of the WIC participation percentage. At the suggestion of an earlier reviewer, the current study uses a base of children ages 0 to 3 years, in order to better approximate the main population of children who actually use WIC. Because a smaller denominator leads to a larger percentage, this percentage may appear substantially larger than in 2001 for some food banks, which may not reflect the actual change in the rate of WIC participation. Therefore, readers must use caution when comparing this percentage between the two studies.

^cThe sample size is 10 for the pantries, 0 for the kitchens, 0 for the shelters, and 10 for all.

Among all client households, 23.4% participate in government mass distribution programs or TEFAP. Participation in other programs is as follows:

- Among the households with at least one senior member age 65 or older, 8.8% use senior nutrition sites; 2.8% use home-delivered meals or meals-on-wheels; and 10.2% participate in senior brown-bag programs.
- Among the households with at least one child younger than age 18, 53.7% and 43.5% benefit from the school lunch and the school breakfast program, respectively; 6.1% use an after-school snack program; 5.6% use a child care food program; and 9.3% participate in the summer food program.

7.5 GENERAL ASSISTANCE, WELFARE, AND TANF IN THE PREVIOUS TWO YEARS

Clients were asked whether they received general assistance, welfare, or TANF in the previous two years and, if so, whether the assistance had been discontinued. They also provided reasons for the discontinuation. Table 7.5.1 presents the results.

TABLE 7.5.1
GENERAL ASSISTANCE, WELFARE, AND TANF IN THE PREVIOUS TWO YEARS

	Pantry Client Households	Kitchen Client Households	Shelter Client Households	All Client Households
Clients who received general assistance, welfare, or TANF during the past two years				
Yes	5.2%	3.6%	1.1%	4.9%

SAMPLE SIZE (N) – Clients who received specified assistance, which then stopped during the previous two years	7	1	0	8

SOURCE: This table was constructed based on usable responses to questions 26, 27, and 28 of the client survey.

TABLE 7.5.1 (continued)

NOTES: The percentages presented in this table are based only on usable responses, excluding missing, don't know, and refusal responses. All usable responses were weighted as described in Chapter 3 and in the Technical Appendix volume to represent all emergency food clients of the Food Bank of Central and Eastern North Carolina. The sample sizes (N) also include missing data.

For receiving assistance, missing, don't know, and refusal responses combined are 1.8% for pantry clients, 0.0% for kitchen clients, 0.0% for shelter clients, and 1.5% for all clients.

For reasons for discontinuation of assistance, missing, don't know, and refusal responses combined are 0.0% for pantry clients, 0.0% for kitchen clients, N.A. for shelter clients, and 0.0% for all clients.

^aMultiple responses were accepted.

^bThis category includes having not reapplied, relocation, and found work.

During the previous two years, 4.9% of the clients received general assistance, welfare, or TANF. Details include:

- Among those who had received the specified assistance, n.p. indicated that the assistance was discontinued.
- As for the reasons for the discontinuation, n.p. ascribed it to having an ineligible income level, n.p. to change of household makeup, and n.p. to time limit for the assistance.
- In addition, n.p. of the clients indicated that the assistance was discontinued because they were sanctioned by welfare or another agency, and n.p. mentioned their citizenship status as a factor.
- Also, n.p. of the clients no longer received the assistance because it was too much hassle for them, and n.p. chose to stop receiving the assistance.

7.6 GROCERY SHOPPING PATTERNS

Clients were asked where they do most of their grocery shopping. Results are shown in Table 7.6.1.

TABLE 7.6.1
GROCERY SHOPPING PATTERNS

<i>Where do you do <u>most</u> of your grocery shopping?</i>	Adult Clients Who Pick Up Food at a Pantry	Adult Clients at a Kitchen	Adult Clients at a Shelter	Adult Clients at All Program Sites
Supermarkets or grocery stores	85.7%	88.8%	69.0%	85.2%
Discount stores (e.g., Wal-Mart, Target, K-Mart)	10.7%	4.3%	0.5%	9.7%
Warehouse clubs (e.g., Price Club, Costco, Pace, Sam's Club, BJ's)	0.2%	1.9%	0.0%	0.3%
Convenience stores (e.g., 7-11, Quickshop, Wawa)	0.1%	2.3%	0.0%	0.2%
Ethnic food stores (e.g., bodegas, Asian food markets, or Caribbean markets)	0.0%	0.0%	0.0%	0.0%
Farmer's market	0.0%	0.0%	0.0%	0.0%
Other (including "dollar" stores)	1.6%	0.9%	27.9%	2.8%
Don't know because someone else in family shops	0.0%	0.5%	0.0%	0.0%
Don't buy groceries, free food only	1.7%	1.3%	2.6%	1.7%
TOTAL	100.0%	100.0%	100.0%	100.0%
SAMPLE SIZE (N)	362	78	37	477

SOURCE: This table was constructed based on usable responses to Question 40 of the client survey.

NOTES: The percentages presented in this table are based only on usable responses, excluding missing, don't know, and refusal responses. All usable responses were weighted as described in Chapter 3 and in the Technical Appendix volume to represent all emergency food clients of the Food Bank of Central and Eastern North Carolina. The sample sizes (N) also include missing data.

Missing, don't know, and refusal responses combined are 1.6% for pantry clients, 6.5% for kitchen clients, 0.8% for shelter clients, and 2.0% for all clients.

Among all clients, 85.2% shop mostly at supermarkets or grocery stores. Information about other places where some of the clients do most their grocery shopping follows:

- 0.2% of the clients use convenience stores for most of their grocery shopping.

- 9.7% of the clients shop mostly at discount stores such as Wal-Mart, Target, or K-Mart.
- 1.7% of the clients do not buy groceries. They rely only on free food.

8. CLIENTS: HEALTH STATUS

Health status can be an important determinant of overall household circumstances and need. Therefore, the survey asked clients for information on the health of both themselves and other household members. The responses to these questions are presented below. In addition, data are presented on clients' access to health insurance and health care.

8.1 HEALTH STATUS

Clients were asked to indicate their health status, then to indicate whether anyone (or anyone else) in their household was in poor health. Table 8.1.1 summarizes the results.

TABLE 8.1.1
HEALTH STATUS

	Adult Clients Who Pick Up Food at a Pantry	Adult Clients at a Kitchen	Adult Clients at a Shelter	Adult Clients at All Program Sites
Clients who indicated that their health was...				
Excellent	8.1%	22.4%	24.6%	10.1%
Very good	15.1%	7.1%	10.2%	14.2%
Good	25.7%	35.1%	54.3%	27.9%
Fair	29.9%	24.0%	9.1%	28.4%
Poor	21.3%	11.3%	1.8%	19.5%
TOTAL	100.0%	100.0%	100.0%	100.0%
Clients who indicated that someone else in the household was in poor health				
Yes	23.6%	15.7%	7.5%	22.1%
No	45.3%	46.7%	7.2%	43.5%
Live alone	31.2%	37.6%	85.3%	34.4%
TOTAL	100.0%	100.0%	100.0%	100.0%
Households with at least one member reported to be in poor health				
	37.2%	24.1%	9.2%	34.7%
SAMPLE SIZE (N)	362	78	37	477

TABLE 8.1.1 (*continued*)

SOURCE: This table was constructed based on usable responses to questions 20 and 21 of the client survey.

NOTES: The percentages presented in this table are based only on usable responses, excluding missing, don't know, and refusal responses. All usable responses were weighted as described in Chapter 3 and in the Technical Appendix volume to represent all emergency food clients of the Food Bank of Central and Eastern North Carolina. The sample sizes (N) also include missing data.

For client health, missing, don't know, and refusal responses combined are 0.4% for pantry clients, 0.7% for kitchen clients, 0.0% for shelter clients, and 0.4% for all clients.

For poor health of anyone in household, missing, don't know, and refusal responses combined are 1.2% for pantry clients, 1.9% for kitchen clients, 0.0% for shelter clients, and 1.2% for all clients.

Overall, 19.5% of the clients at all program sites are in poor health, and 34.7% of the client households have one or more members in poor health. More details follow:

- Among pantry clients, 8.1% were in excellent health, 15.1% in very good health, 25.7% in good health, and 51.1% in fair or poor health.
- Among kitchen clients, 22.4% were in excellent health, 7.1% in very good health, 35.1% in good health, and 35.4% in fair or poor health.
- Among shelter clients, 24.6% were in excellent health, 10.2% in very good health, 54.3% in good health, and 10.9% in fair or poor health.
- 37.2% of the pantry client households had at least one person in poor health.
- 24.1% of the kitchen client households had at least one person in poor health.
- 9.2% of the shelter client households had at least one person in poor health.

8.2 HEALTH INSURANCE AND ACCESS TO MEDICAL CARE

Clients were asked whether they or anyone in their households had various kinds of health insurance. Clients also indicated whether they had unpaid medical or hospital bills and whether they had been refused medical care during the previous 12 months. Results are provided in Table 8.2.1.

TABLE 8.2.1
HEALTH INSURANCE AND ACCESS TO MEDICAL CARE

	Adult Clients Who Pick Up Food at a Pantry	Adult Clients at a Kitchen	Adult Clients at a Shelter	Adult Clients at All Program Sites
Client or his or her family with following types of health insurance ^a				
Medicare ^b	54.4%	22.6%	13.9%	50.0%
State Medical Assistance Program or Medicaid	54.8%	28.6%	5.3%	50.2%
State Children’s Health Insurance Program (SCHIP)	4.6%	0.0%	0.0%	4.1%
Veterans Administration (VA) benefits	7.3%	10.8%	31.7%	8.4%
Private health insurance	16.3%	21.5%	37.9%	17.8%
Other health insurance ^c	9.2%	11.3%	2.4%	9.1%
No insurance	13.0%	31.5%	26.0%	15.2%
Clients who had unpaid medical or hospital bills				
Yes	58.5%	54.0%	43.5%	57.4%
No	41.5%	46.0%	56.5%	42.6%
TOTAL	100.0%	100.0%	100.0%	100.0%
Clients who had been refused medical care because they could not pay or because they had a Medicaid or Medical Assistance card during the previous 12 months				
Yes	5.3%	8.6%	4.8%	5.6%
No	92.8%	91.4%	95.2%	92.7%
Not refused care, but avoid providers who don’t accept medical assistance	0.0%	0.0%	0.0%	0.0%
Not refused care, but finding providers that accept medical assistance is a problem	2.0%	0.0%	0.0%	1.7%
TOTAL	100.0%	100.0%	100.0%	100.0%

TABLE 8.2.1 (continued)

	Adult Clients Who Pick Up Food at a Pantry	Adult Clients at a Kitchen	Adult Clients at a Shelter	Adult Clients at All Program Sites
SAMPLE SIZE (N)	362	78	37	477

SOURCE: This table was constructed based on usable responses to questions 22a-f, 23, and 24 of the client survey.

NOTES: The percentages presented in this table are based only on usable responses, excluding missing, don't know, and refusal responses. All usable responses were weighted as described in Chapter 3 and in the Technical Appendix volume to represent all emergency food clients of the Food Bank of Central and Eastern North Carolina. The sample sizes (N) also include missing data.

For types of health insurance, missing, don't know, and refusal responses combined are 0.5% for pantry clients, 0.0% for kitchen clients, 0.0% for shelter clients, and 0.4% for all clients.

For unpaid medical bills, missing, don't know, and refusal responses combined are 4.1% for pantry clients, 2.0% for kitchen clients, 11.2% for shelter clients, and 4.2% for all clients.

For refused medical care, missing, don't know, and refusal responses combined are 1.0% for pantry clients, 0.0% for kitchen clients, 12.3% for shelter clients, and 1.4% for all clients.

^aMultiple responses were accepted.

^bAt the national level, the percentage of people who reported having Medicare coverage is substantially larger than what appears to be appropriate considering the percentage of households with seniors. One possible explanation for the discrepancy is widespread confusion between Medicare and Medicaid programs.

^cThis category includes government retirement benefits and military health system (TRICARE).

Findings presented in Table 8.2.1 include:

- 13.0% of the pantry, 31.5% of the kitchen, and 26.0% of the shelter clients or their households are without health insurance. This accounts for 15.2% of all clients.
- 57.4% of the clients have unpaid medical or hospital bills.
- 5.6% of the clients report that they have been refused medical care because they could not pay or because they had a Medicaid or Medical Assistance card during the previous 12 months.

9. CLIENTS: SERVICES RECEIVED AT FOOD PROGRAMS

To better understand how clients use the services of the Food Bank of Central and Eastern North Carolina, the survey asked questions about the numbers of kitchens and pantries that households used. Questions were also asked concerning the degree of satisfaction that respondents felt with the food services they were receiving from the providers and about what clients would do if they did not have access to the provider from which they were receiving food on the day of the interview. The answers to these questions are examined below.

9.1 NUMBER OF PANTRIES OR KITCHENS USED

Clients were asked how many different pantries or kitchens they had used during the previous month. The results are shown in Table 9.1.1.

TABLE 9.1.1
NUMBER OF DIFFERENT PANTRIES OR KITCHENS USED

	Pantry Client Households	Kitchen Client Households	Shelter Client Households	All Client Households
Number of different food pantries clients or their families used during the previous month				
None	n.a.	46.0%	61.9%	6.6%
One or more pantries				
1 pantry	80.9%	46.6%	24.9%	75.6%
2 pantries	16.3%	3.8%	4.3%	14.7%
3 pantries	2.0%	2.3%	8.9%	2.3%
4 pantries	0.7%	0.0%	0.0%	0.6%
5 or more pantries	0.1%	1.2%	0.0%	0.2%
SUBTOTAL	100.0%	54.0%	38.1%	93.4%
TOTAL	100.0%	100.0%	100.0%	100.0%

TABLE 9.1.1 (continued)

	Pantry Client Households	Kitchen Client Households	Shelter Client Households	All Client Households
Number of different soup kitchens clients or their families used during the previous month				
None	92.5%	n.a.	34.5%	82.2%
One or more kitchens				
1 kitchen	6.5%	90.2%	63.3%	16.0%
2 kitchens	0.7%	7.8%	0.0%	1.3%
3 kitchens	0.2%	0.0%	1.2%	0.3%
4 kitchens	0.0%	0.0%	0.0%	0.0%
5 or more kitchens	0.0%	2.0%	0.9%	0.2%
SUBTOTAL	7.5%	100.0%	65.5%	17.8%
TOTAL	100.0%	100.0%	100.0%	100.0%
SAMPLE SIZE (N)	362	78	37	477

SOURCE: This table was constructed based on usable responses to questions 56 and 57 of the client survey.

NOTES: The percentages presented in this table are based only on usable responses, excluding missing, don't know, and refusal responses. All usable responses were weighted as described in Chapter 3 and in the Technical Appendix volume to represent all emergency food clients of the Food Bank of Central and Eastern North Carolina. The sample sizes (N) also include missing data.

For pantries used, missing, don't know, and refusal responses combined are 1.7% for pantry clients, 2.9% for kitchen clients, 12.6% for shelter clients, and 2.4% for all clients.

For kitchens used, missing, don't know, and refusal responses combined are 1.6% for pantry clients, 5.2% for kitchen clients, 11.2% for shelter clients, and 2.3% for all clients.

n.a. = not applicable.

Among the pantry clients, 80.9% used just one food pantry during the previous month.

More information on the clients' use of the emergency food programs follows:

- 90.2% of the kitchen clients used only one soup kitchen, and 54.0% also used one or more pantries.
- 38.1% of the shelter clients used one or more pantries, and 65.5% of the shelter clients also used one or more kitchens.
- 7.5% of the pantry clients also used one or more kitchens.

9.2 SATISFACTION WITH SERVICES AT FOOD PROGRAMS

Clients were asked how satisfied they were with the amount, variety, and overall quality of food provided at the emergency food programs. Clients were also asked how often they were treated with respect by the staff of those programs. Table 9.2.1 summarizes the findings.

TABLE 9.2.1
SATISFACTION WITH SERVICES AT FOOD PROGRAMS

Level of Satisfaction with Various Aspects of the Service Provided to Clients or Others in the Household:	Adult Clients Who Pick Up Food at a Pantry	Adult Clients at a Kitchen	Adult Clients at a Shelter	Adult Clients at All Program Sites
Amount of food provided				
Very satisfied	68.8%	49.6%	70.9%	67.1%
Somewhat satisfied	26.8%	47.2%	28.6%	28.8%
Somewhat dissatisfied	1.8%	0.3%	0.6%	1.6%
Very dissatisfied	2.6%	2.9%	0.0%	2.5%
TOTAL	100.0%	100.0%	100.0%	100.0%
Variety of food provided				
Very satisfied	63.2%	41.2%	67.2%	61.3%
Somewhat satisfied	30.8%	48.4%	30.4%	32.5%
Somewhat dissatisfied	3.3%	7.0%	2.0%	3.6%
Very dissatisfied	2.7%	3.4%	0.3%	2.6%
TOTAL	100.0%	100.0%	100.0%	100.0%
Overall quality of food provided				
Very satisfied	66.4%	44.6%	62.1%	64.0%
Somewhat satisfied	29.3%	50.2%	27.4%	31.3%
Somewhat dissatisfied	4.3%	1.7%	10.6%	4.4%
Very dissatisfied	0.0%	3.5%	0.0%	0.4%
TOTAL	100.0%	100.0%	100.0%	100.0%

TOTAL	100.0%	100.0%	100.0%	100.0%

TABLE 9.2.1 (continued)

Level of Satisfaction with Various Aspects of the Service Provided to Clients or Others in the Household:	Adult Clients Who Pick Up Food at a Pantry			Adult Clients at All Program Sites
	Adult Clients at a Kitchen	Adult Clients at a Shelter		
SAMPLE SIZE (N)	362	78	37	477

SOURCE: This table was constructed based on usable responses to questions 53 and 54 of the client survey.

NOTES: The percentages presented in this table are based only on usable responses, excluding missing, don't know, and refusal responses. All usable responses were weighted as described in Chapter 3 and in the Technical Appendix volume to represent all emergency food clients of the Food Bank of Central and Eastern North Carolina. The sample sizes (N) also include missing data.

For amount of food provided, missing, don't know, and refusal responses combined are 10.1% for pantry clients, 0.0% for kitchen clients, 11.2% for shelter clients, and 9.3% for all clients.

For variety of food provided, missing, don't know, and refusal responses combined are 13.0% for pantry clients, 0.0% for kitchen clients, 11.2% for shelter clients, and 11.8% for all clients.

For overall quality of food provided, missing, don't know, and refusal responses combined are 17.8% for pantry clients, 1.9% for kitchen clients, 11.2% for shelter clients, and 2.4% for all clients.

For client treatment by staff, missing, don't know, and refusal responses combined are 1.7% for pantry clients, 0.0% for kitchen clients, 11.2% for shelter clients, and 2.0% for all clients.

Across all three kinds of emergency food programs, the level of satisfaction among clients is high. 95.9% are either very satisfied or somewhat satisfied with the amount of the food they receive at the programs. Client satisfaction with specific aspects of the programs follows:

- 93.8% of the clients are either very satisfied or somewhat satisfied with the variety of the food.
- 95.3% of the clients are either very satisfied or somewhat satisfied with overall quality of the food.
- 78.9% of the clients say that they are treated with respect by the staff all the time.

9.3 WHAT CLIENTS WOULD DO WITHOUT FOOD ASSISTANCE FROM THE AGENCY

Clients were asked what they would do without the agency helping them. Results are shown in Table 9.3.1.

TABLE 9.3.1

WHAT CLIENTS WOULD DO WITHOUT FOOD ASSISTANCE FROM THE AGENCY

<i>If this agency weren't here to help you or your household with food, what would you do?^a</i>	Pantry Client Households	Kitchen Client Households	Shelter Client Households	All Client Households
Go to another agency	36.6%	22.5%	26.7%	34.9%
Get help from relatives, friends	18.8%	17.5%	44.5%	19.8%
Get help from the government	3.5%	4.7%	12.5%	4.0%
Get a job, more hours, an additional job	6.9%	3.6%	31.3%	7.7%
Sell some personal property	2.5%	3.3%	0.2%	2.5%
Lower expenses	2.8%	0.5%	11.5%	3.0%
Eat less, skip meals, reduce size of meals	6.2%	7.7%	24.5%	7.1%
Would get by somehow	19.5%	10.1%	15.0%	18.5%
I have no other place to get help	4.2%	8.0%	0.9%	4.4%
Do something illegal	0.3%	2.9%	0.6%	0.6%
Do not know ^b	21.7%	19.9%	11.7%	21.1%
Other ^c	14.6%	30.1%	10.3%	15.8%
SAMPLE SIZE (N)	362	78	37	477

SOURCE: This table was constructed based on usable responses to Question 55 of the client survey.

NOTES: All usable responses were weighted as described in Chapter 3 and in the Technical Appendix volume to represent all emergency food clients of the Food Bank of Central and Eastern North Carolina. The sample sizes (N) also include cases with missing data.

Missing and refusal responses combined are 1.6% for pantry clients, 0.0% for kitchen clients, 11.2% for shelter clients, and 1.9% for all clients.

^aMultiple responses were accepted.

^bDo not know responses to this question may indicate a feeling of hopelessness, disappointment, or desperation.

^cThis includes eating at home and begging.

In the absence of the agency helping the clients, 34.9% of them said that they would go to another agency. Other responses include:

- 18.5% of the clients said that they would get by somehow.

- 19.8% of the clients said that they would get help from relatives or friends.
- 7.1% of the clients said that they would eat less, skip meals, or reduce the size of meals.

10. AGENCIES AND FOOD PROGRAMS: PROFILES

Until now, the discussion has focused on information from the *client* survey. This chapter begins the presentation of the results from the survey of *agencies* affiliated with the Food Bank of Central and Eastern North Carolina. The first section below details the numbers of responses received from various types of agencies. Next we present information on what combinations of programs are operated by the responding agencies. Subsequent sections examine characteristics of emergency food programs operated by these agencies, such as years of program operation, services provided other than food distribution, and types of organizations. Agency estimates of the changes in their numbers of clients between 2001 and 2005 are also presented.

10.1 PARTICIPATING AGENCIES AND PROGRAMS REPRESENTED

The agency survey questionnaire was sent to approximately 815 agencies affiliated with the Food Bank of Central and Eastern North Carolina. Each agency was asked to provide detailed information about one of each type of emergency food programs it operates (such as one pantry, one kitchen, and one shelter). Agencies operating nonemergency food programs only (referred to as “other programs”) were asked to answer several general questions only.

Of the agencies that received the questionnaire, 428 agencies completed the survey. Among those that completed the survey, 325 operate one or more emergency programs, and the remaining agencies operate other nonemergency food programs. Those 428 responding agencies

reported on 779 programs,²⁰ of which 48.8% are emergency food programs. Table 10.1.1 shows the breakdown of the participating agencies by the type of program they operate.

TABLE 10.1.1
PROGRAMS REPORTED ON BY PARTICIPATING AGENCIES, BY PROGRAM TYPE

Program Type	Number	Unweighted Percentage	Unweighted Percentage Excluding "Other" Type
Pantry	282	36.2%	74.2%
Kitchen	53	6.8%	13.9%
Shelter	45	5.8%	11.8%
Other ^a	399	51.2%	n.a.
TOTAL ^b	779	100.0%	100.0%

^aOther programs refer to nonemergency food programs. They are programs that have a primary purpose other than emergency food distribution but also distribute food. Examples include day care programs, senior congregate-feeding programs, and summer camps.

^bThis is the number of programs about which agencies provide detailed or some information. The total number of programs operated by these agencies is larger.

n.a. = not applicable.

Among the total of 779 programs reported on by the agencies, 36.2% are pantries, 6.8% are kitchens, and 5.8% are shelters. The remaining 51.2% are other nonemergency food programs, such as child day care, senior-congregate feeding programs, and summer camps.

Excluding other nonemergency food programs makes the percentage breakdown 74.2% pantries, 13.9% kitchens, and 11.8% shelters.

²⁰ There are more programs than agencies, because agencies often run two or more programs of different types.

10.2 NUMBER OF PROGRAMS OPERATED BY AGENCIES

Percentages of the agencies operating various types of programs, as well as the total number of programs operated of each program type, are shown in Table 10.2.1.

TABLE 10.2.1
NUMBER OF PROGRAMS OPERATED BY AGENCIES

Number of Programs of Each Type Operated by Agencies	Percentage of All Agencies That Operate the Specified Number of Each Program Type			
	Agencies with Pantries	Agencies with Kitchens	Agencies with Shelters	Agencies with Others
1	93.5%	89.2%	91.5%	89.4%
2	4.3%	7.1%	6.2%	4.4%
3 or more	2.3%	3.7%	2.3%	6.2%
TOTAL	100.0%	100.0%	100.0%	100.0%
SAMPLE SIZE (N) – Agencies with at least one program for each program type	282	53	45	399
Total number of participating agencies		428		
Total number of programs reported on by participating agencies		779		

SOURCE: This table was constructed based on usable responses to Question 1 of the agency survey.

Among the participating agencies, 282 operate at least one pantry program, 53 at least one kitchen program, and 45 at least one shelter program. A total of 428 agencies provided information about 779 programs.

10.3 AGENCIES OPERATING VARIOUS TYPE(S) OF PROGRAMS

Table 10.3.1 shows the distribution of agencies by types of programs they operate.

TABLE 10.3.1
AGENCIES OPERATING VARIOUS TYPE(S) OF PROGRAMS

Combinations of Programs the Agency Operates	Agencies
Pantry only	4.5%
Kitchen only	0.0%
Shelter only	0.2%
Other program only	24.1%
Pantry and kitchen	0.7%
Kitchen and shelter	0.0%
Shelter and pantry	0.2%
Pantry and other	51.5%
Kitchen and other	4.5%
Shelter and other	4.7%
Pantry, kitchen, and shelter	0.9%
Pantry, kitchen, and other	4.1%
Kitchen, shelter, and other	0.8%
Shelter, pantry, and other	2.4%
Pantry, kitchen, shelter, and other	1.3%
Unknown	0.0%
TOTAL	100.0%
SAMPLE SIZE (N) – Total number of participating agencies	428

SOURCE: This table was constructed based on responses to Question 1 of the agency survey.

As Table 10.3.1 shows, 4.5% of the participating agencies exclusively operate one or more pantries, while 0.0% and 0.2% operate exclusively kitchen or shelter programs, respectively.

10.4 LENGTH OF PROGRAM OPERATION

Responding agencies identified the year their emergency food programs opened. Table 10.4.1 shows the distribution of the length of program operation.

TABLE 10.4.1
LENGTH OF PROGRAM OPERATION

How Long the Program Has Been Operating ^a	Percentage of Programs That Have Operated for a Specified Period			Agencies with Pantry, Kitchen, or Shelter
	Pantry Programs	Kitchen Programs	Shelter Programs	
2 years or less	21.0%	9.2%	15.2%	19.6%
3-4 years	17.1%	7.9%	9.4%	16.0%
5-6 years	13.1%	15.0%	14.5%	13.0%
7-10 years	11.3%	16.3%	22.5%	13.5%
11-20 years	21.5%	22.3%	22.6%	20.3%
21-30 years	8.5%	23.2%	6.4%	9.5%
More than 30 years	7.5%	6.1%	9.4%	8.0%
TOTAL	100.0%	100.0%	100.0%	100.0%
SAMPLE SIZE (N)	282	53	45	325
Average length of operation among valid responses (in years)	12	16	14	13
Median length of operation among valid responses (in years)	6	13	8	7
SAMPLE SIZE (N)	242	40	30	276

SOURCE: This table was constructed based on usable responses to Question 3b of the agency survey.

NOTES: The percentages presented in this table are based only on usable responses, excluding missing, don't know, and refusal responses. All usable responses were weighted as described in Chapter 3 and in the Technical Appendix volume to represent all emergency food programs of the Food Bank of Central and Eastern North Carolina. The sample sizes (N) also include missing data.

Missing, don't know, and refusal responses combined are 14.3% for pantry programs, 23.7% for kitchen programs, 33.4% for shelter programs, and 15.0% for all agencies.

^aFor all programs, responses greater than 70 years of operation were recoded as 70 years. Responses less than 1 year were recoded as 1 year.

The average length of operation among the pantry programs is 12 years. It is 16 years for the kitchens and 14 years for the shelter programs. Details follow:

- 21.0% of the pantries, 9.2% of the kitchens, and 15.2% of the shelters have been operating for two years or less.
- 21.5% of the pantries, 22.3% of the kitchens, and 22.6% of the shelters have been operating for 11 to 20 years.
- 8.5% of the pantries, 23.2% of the kitchens, and 6.4% of the shelters have been operating for 21 to 30 years.
- 7.5% of the pantries, 6.1% of the kitchens, and 9.4% of the shelters have been operating for more than 30 years.

10.5 OTHER SERVICES OR FACILITIES PROVIDED IN ADDITION TO FOOD DISTRIBUTION

Agencies were provided with a list of additional possible services and asked which services their programs provide to their clients. Table 10.5.1 shows what percentage of food programs supply the services listed.

TABLE 10.5.1

OTHER SERVICES OR FACILITIES AGENCIES OR PROGRAMS PROVIDE IN ADDITION TO FOOD DISTRIBUTION, BY PROGRAM TYPE

	Pantry Programs	Kitchen Programs	Shelter Programs
Food-related support			
Nutrition counseling	17.7%	30.2%	37.3%
Eligibility counseling for WIC	5.3%	5.0%	20.2%
Eligibility counseling for food stamps	13.1%	5.0%	27.3%
Soup kitchen meals	13.0%	n.a.	25.0%

Senior programs	13.4%	19.8%	12.6%
No additional services	25.4%	12.3%	0.0%
SAMPLE SIZE (N)	282	53	45

SOURCE: This table was constructed based on usable responses to Question 4 of the agency survey.

NOTES: All usable responses were weighted as described in Chapter 3 and in the Technical Appendix volume to represent all emergency food programs of the Food Bank of Central and Eastern North Carolina. The sample sizes (N) also include missing data.

Missing, don't know, and refusal responses combined are 13.2% for pantry programs, 19.4% for kitchen programs, and 8.9% for shelter programs.

n.a. = not applicable.

5.3% of pantries and 20.2% of shelters provide counseling for WIC. Other services provided by the programs or the agencies include:

- 13.1% of the pantries, 5.0% of the kitchens, and 27.3% of the shelters provide eligibility counseling for food stamps.
- 24.6% of the shelters provide counseling for other government programs.
- 19.3% of the pantries provide utility bill assistance.
- 33.2% of the pantries, 27.7% of the kitchens, and 81.0% of the shelters provide information and referral services.
- 48.0% of the shelters provide employment training.
- 6.6% of the pantries, 15.3% of the kitchens, and 36.0% of the shelters provide health services or health clinics.
- 76.5% of the shelters provide transportation.
- 44.3% of the pantries, 31.1% of the kitchens, and 85.4% of the shelters provide clothing.

Table 10.5.2 shows the distribution of the number of additional services that emergency food programs offer to their clients.

TABLE 10.5.2
NUMBER OF ADDITIONAL SERVICES, BY PROGRAM TYPE

Number of Additional Services or Facilities Provided by Programs	Pantry Programs	Kitchen Programs	Shelter Programs
None	25.4%	12.3%	0.0%
1	22.6%	28.6%	7.5%
2-5	37.8%	45.4%	19.0%
6-10	11.3%	11.6%	41.6%
More than 10	2.9%	2.1%	31.9%
TOTAL	100.0%	100.0%	100.0%
SAMPLE SIZE (N)	282	53	45
Average number of additional services among those that provide at least one such service	3	3	9
Median number of additional services among those that provide at least one such service	2	2	9
SAMPLE SIZE (N)	246	42	41

SOURCE: This table was constructed based on usable responses to Question 4 of the agency survey.

NOTES: The percentages presented in this table are based only on usable responses, excluding missing, don't know, and refusal responses. All usable responses were weighted as described in Chapter 3 and in the Technical Appendix volume to represent all emergency food programs of the Food Bank of Central and Eastern North Carolina. The sample sizes (N) also include missing data.

Missing, don't know, and refusal responses combined are 13.2% for pantry programs, 19.4% for kitchen programs, and 8.9% for shelter programs.

On average, pantries provide 3 additional services or facilities. Kitchens and shelters provide, on average, 3 and 9 additional services, respectively.

- 25.4% of pantry programs, 12.3% of kitchen programs, and 0.0% of shelter programs do not offer any other services or facilities.
- 22.6% of pantry programs, 28.6% of kitchen programs, and 7.5% of the shelter programs offer one additional service or facility.

- 37.8% of pantry programs, 45.4% of kitchen programs, and 19.0% of shelter programs offer two to five additional services or facilities.
- 11.3% of pantry programs, 11.6% of kitchen programs, and 41.6% of shelter programs offer as many as 6 to 10 additional services or facilities.
- 2.9% of pantry programs, 2.1% of kitchen programs, and 31.9% of shelter programs offer more than 10 additional services or facilities.

In addition to other services provided by their programs, agencies were asked whether they provide other facilities at the agency level for their clients. Table 10.5.3 summarizes the results.

TABLE 10.5.3
OTHER FACILITIES AGENCIES PROVIDE IN ADDITION TO
FOOD DISTRIBUTION, BY PROGRAM TYPE

	Agencies with Pantry, Kitchen, or Shelter
Health clinic	4.7%
Group home for physically/mentally disadvantaged	3.0%
Other residential facility	9.1%
Child day care program	3.2%
Youth after school program	12.6%
Summer camp serving low-income clients	6.7%
Senior congregate feeding program	5.0%
Other ^a	16.9%
No other facilities/programs	56.9%
SAMPLE SIZE (N)	325

SOURCE: This table was constructed based on usable responses to Question 27 of the agency survey.

NOTES: All usable responses were weighted as described in Chapter 3 and in the Technical Appendix volume to represent all emergency food programs of the Food Bank of Central and Eastern North Carolina. The sample sizes (N) also include missing data.

Missing, don't know, and refusal responses combined are 17.4%.

^aThis includes learning centers, food delivery services, and day programs for mentally disabled adults.

As many as 4.7% of agencies also operate health clinics. Other facilities run by agencies include:

- 3.0% of agencies run group homes for physically/mentally disadvantaged.
- 9.1% of agencies run other types of residential facilities.
- 3.2% of agencies run child day care programs.
- 12.6% of agencies run youth after-school programs.

- 6.7% of agencies run summer camps serving low-income clients.
- 5.0% of agencies run senior congregate-feeding programs.
- 16.9% of agencies run some other type of facility not mentioned above.

10.6 TYPE OF AGENCY THAT OPERATES THE PROGRAM

Table 10.6.1 shows types of agencies operating each type of program.

TABLE 10.6.1
TYPE OF AGENCY THAT OPERATES THE PROGRAM

Type of Agency That Operates the Program	Pantry Programs	Kitchen Programs	Shelter Programs	Agencies with Pantry, Kitchen, or Shelter	All Agencies
Faith-based or religion-affiliated nonprofit	81.7%	60.7%	38.1%	74.2%	63.1%
Other private nonprofit	13.7%	37.4%	56.9%	20.9%	28.1%
Governmental	1.9%	0.0%	0.0%	1.6%	2.5%
Community Action Program (CAP)	1.1%	0.0%	0.0%	0.9%	1.0%
Other ^a	1.6%	1.9%	5.0%	2.4%	5.3%
TOTAL	100.0%	100.0%	100.0%	100.0%	100.0%
SAMPLE SIZE (N)	282	53	45	325	428

SOURCE: This table was constructed based on usable responses to Question 28 of the agency survey.

NOTES: The percentages presented in this table are based only on usable responses, excluding missing, don't know, and refusal responses. All usable responses were weighted as described in Chapter 3 and in the Technical Appendix volume to represent all emergency food programs of the Food Bank of Central and Eastern North Carolina. The sample sizes (N) also include missing data.

Missing, don't know, and refusal responses combined are 5.6% for pantry programs, 5.2% for kitchen programs, 6.1% for shelter programs, 5.4% for agencies with pantry, kitchen, or shelter programs, and 6.3% for all agencies.

^aThis includes various community-based organizations.

Table 10.6.1 shows that 81.7% of the pantries, 60.7% of the kitchens, and 38.1% of the shelters are run by faith-based or religion-affiliated nonprofit agencies. In addition:

- 1.9% of the pantries, 0.0% of the kitchens, and 0.0% of the shelters are run by government-affiliated agencies.
- The remaining agencies are operated by other kinds of private nonprofit organizations, such as community-based charities or philanthropic organizations.

10.7 PROGRAMS SERVING SELECTED TYPES OF CLIENTS

Agencies were asked whether their programs serve migrant workers, legal immigrants, or undocumented immigrants.²¹

TABLE 10.7.1
PROGRAMS SERVING SELECTED TYPES OF CLIENTS

	Pantry Programs	Kitchen Programs	Shelter Programs
Migrant Workers			
Yes	51.3%	42.4%	50.4%
No	48.7%	57.6%	49.6%
TOTAL	100.0%	100.0%	100.0%
Legal Immigrants			
Yes	59.1%	48.6%	62.7%
No	40.9%	51.4%	37.3%
TOTAL	100.0%	100.0%	100.0%
Undocumented Immigrants			
Yes	39.8%	32.2%	42.9%
No	60.2%	67.8%	57.1%
TOTAL	100.0%	100.0%	100.0%
SAMPLE SIZE (N)	282	53	45

SOURCE: This table was constructed based on usable responses to Question 18 of the agency survey.

NOTES: The percentages presented in this table are based only on usable responses, excluding missing, don't know, and refusal responses. All usable responses were weighted as described in Chapter 3 and in the Technical Appendix volume to represent all emergency food programs of the Food Bank of Central and Eastern North Carolina. The sample sizes (N) also include missing data.

For migrant workers, missing, don't know, and refusal responses combined are 33.0% for pantry programs, 30.8% for kitchen programs, and 26.8% for shelter programs.

For legal immigrants, missing, don't know, and refusal responses combined are 35.5% for pantry programs, 38.4% for kitchen programs, and 26.8% for shelter programs.

For undocumented immigrants, missing, don't know, and refusal responses combined are 46.6% for pantry programs, 42.9% for kitchen programs, and 32.6% for shelter programs.

²¹ At the national level, a large number of the responding agencies left these three questions unanswered.

Findings in Table 10.7.1 include:

- 51.3% of the pantries, 42.4% of the kitchens, and 50.4% of the shelters serve migrant workers.
- 59.1% of the pantries, 48.6% of the kitchens, and 62.7% of the shelters serve legal immigrants.
- 39.8% of the pantries, 32.2% of the kitchens, and 42.9% of the shelters serve undocumented immigrants.

10.8 AGENCY ESTIMATES OF CHANGE IN NUMBER OF CLIENTS FROM 2001 TO 2005

Agencies were asked whether they serve more or fewer clients than they did in 2001.

Table 10.8.1 shows the findings.

TABLE 10.8.1

AGENCY ESTIMATES OF CHANGE IN NUMBER OF CLIENTS FROM 2001 TO 2005

Agency Estimate of Change in the Number of Clients Compared with Year 2001	Pantry Programs	Kitchen Programs	Shelter Programs
More clients	63.1%	65.2%	59.5%
Fewer clients	8.0%	8.9%	7.3%
About the same number of clients	14.9%	21.9%	25.6%
Program did not exist in 2001	13.9%	4.1%	7.5%
TOTAL	100.0%	100.0%	100.0%
SAMPLE SIZE (N)	282	53	45

SOURCE: This table was constructed based on usable responses to Question 7 of the agency survey.

NOTES: The percentages presented in this table are based only on usable responses, excluding missing, don't know, and refusal responses. All usable responses were weighted as described in Chapter 3 and in the Technical Appendix volume to represent all emergency food programs of the Food Bank of Central and Eastern North Carolina. The sample sizes (N) also include missing data.

Missing, don't know, and refusal responses combined are 6.0% for pantry programs, 14.6% for kitchen programs, and 17.2% for shelter programs.

Regarding the volume of the clients, 63.1% of the pantries, 65.2% of the kitchens, and 59.5% of the shelters indicate that they serve more clients now than they did in 2001.

- 14.9% of the pantries, 21.9% of the kitchens, and 25.6% of the shelters indicated that they serve about the same number of clients in 2005 as in 2001.
- 8.0% of the pantries, 8.9% of the kitchens, and 7.3% of the shelters indicated that they serve fewer clients in 2005 than they did in 2001.
- 13.9% of the pantries, 4.1% of the kitchens, and 7.5% of the shelters did not exist in 2001.

10.9 SEASONALITY OF CLIENT MIX

Agencies were asked whether their programs experience significant change in client mix by season and, if so, what kinds of change. Results are shown in Table 10.9.1.

TABLE 10.9.1
SEASONALITY OF CLIENT MIX

Nature of Changes in Client Mix During the Year ^a	Pantry Programs	Kitchen Programs	Shelter Programs
Ratio of men to women changes	16.4%	24.7%	22.5%
Mix of ethnic groups changes	21.2%	20.7%	40.2%
Many more children in summer	27.1%	38.6%	23.8%
Many more migrant workers in summer	9.6%	10.9%	12.5%
Many more migrant workers in winter	6.1%	4.7%	5.7%
Different group of people at the holidays	59.9%	31.7%	46.4%
Other ^b	3.7%	2.0%	0.0%
Do not experience change in client mix	29.1%	35.3%	10.6%
SAMPLE SIZE (N)	272	46	38

SOURCE: This table was constructed based on usable responses to Questions 19 of the agency survey.

NOTES: All usable responses were weighted as described in Chapter 3 and in the Technical Appendix volume to represent all emergency food programs of the Food Bank of Central and Eastern North Carolina. The sample sizes (N) also include missing data.

Missing, don't know, and refusal responses combined are 3.5% for pantry programs, 12.6% for kitchen programs, and 14.4% for shelter programs.

^aMultiple responses were accepted.

^bThis includes fewer elderly people in winter and more families in winter.

29.1% of the pantries, 35.3% of the kitchens, and 10.6% of the shelters indicated that they do not experience seasonal changes in the mix of clients during the year. As to the nature of seasonal changes in client mix among programs that experience such changes:

- 16.4% of the pantries, 24.7% of the kitchens, and 22.5% of the shelters said they experience changes in the ratio of men to women.

- 27.1% of the pantries, 38.6% of the kitchens, and 23.8% of the shelters said they serve more children in summer.
- 59.9% of the pantries, 31.7% of the kitchens, and 46.4% of the shelters said they serve a different group of people during the holidays.

11. AGENCIES AND FOOD PROGRAMS: FOOD SERVICES

In understanding the workings of the A2H network, it is important to understand the broad differences between providers in their scales of operations. The chapter discusses a number of indicators of the size of provider food service operations. As will be seen, providers vary dramatically in size, from pantries that serve just a few clients a day to pantries and kitchens that provide food to hundreds of clients on a given day of operation.

There is great variation among providers in the detail with which they keep long-term records such as service and client counts. Therefore, the analysis below focuses on measures of size based on either a “typical week” or on the “most recent day the provider was open,” since these are the size concepts that respondents were in general best able to relate to.

11.1 NUMBER OF BOXES OR BAGS DISTRIBUTED IN A TYPICAL WEEK

Agencies were asked how much food their pantries distribute during a typical week and how much a typical box or bag weighs. Table 11.1.1 shows the results.

TABLE 11.1.1
NUMBER OF BOXES OR BAGS DISTRIBUTED IN A TYPICAL WEEK

	Pantry Programs
Programs distributing the following number of boxes or bags of food in a typical week ^a :	
1-9	15.2%
10-29	25.5%
30-49	10.8%
50-99	22.7%
100-299	19.2%
300-499	2.6%
500 or more	4.1%
TOTAL	100.0%
SAMPLE SIZE (N)	282

TABLE 11.1.1 (continued)

	Pantry Programs
Average number of boxes or bags of food distributed in a typical week among valid responses ^b	150
Median number of boxes or bags of food distributed in a typical week among valid responses ^b	42
Average weight of a typical bag/box among valid responses (in pounds)	23
Median weight of a typical bag/box among valid responses (in pounds)	20
SAMPLE SIZE (N)	222

SOURCE: This table was constructed based on usable responses to questions 6 and 6a of the agency survey.

NOTES: The percentages presented in this table are based only on usable responses, excluding missing, don't know, and refusal responses. All usable responses were weighted as described in Chapter 3 and in the Technical Appendix volume to represent all pantries (as noted earlier in this footnote only) of the Food Bank of Central and Eastern North Carolina. The sample sizes (N) also include missing data.

Missing, don't know, and refusal responses combined are 22.6% for pantry programs.

^aFor pantries, responses greater than 5,000 bags or boxes distributed were recoded as 5,000 bags or boxes. Responses greater than 40 pounds per bag or box were recoded as 40 pounds.

^bZeros as responses were not included as valid responses for calculating the average and the median.

On average, the participating pantries distributed 150 boxes or bags (median: 42) of food during a typical week, with the average weight of a typical box or bag being 23 pounds. More details on the amount of food distributed during a typical week follow:

- 25.5% of the pantries distributed 10 to 29 boxes or bags of food.
- 10.8% of the pantries distributed 30 to 49 boxes or bags of food.
- 22.7% of the pantries distributed 50 to 99 boxes or bags of food.
- 19.2% of the pantries distributed 100 to 299 boxes or bags of food.
- 2.6% of the pantries distributed 300 to 499 boxes or bags of food.
- 4.1% of the pantries distributed 500 or more boxes or bags.

11.2 AMOUNT OF FOOD SERVED ON THE DAY THE PROGRAM WAS LAST OPEN

Agencies were asked how much food their programs distributed when they were last open. Results are presented in Table 11.2.1.

TABLE 11.2.1

AMOUNT OF FOOD SERVED ON THE DAY THE PROGRAM WAS LAST OPEN

	Pantry Programs (in Bags or Boxes)	Kitchen Programs (in Meals)	Shelter Programs (in Meals)
Programs that distributed the following number of boxes/bags or meals of food ^{a,b}			
1-9	18.4%	14.2%	5.2%
10-29	23.2%	9.2%	28.0%
30-49	15.0%	20.8%	34.7%
50-99	17.9%	20.9%	15.8%
100-149	9.9%	10.8%	4.4%
150-199	6.5%	8.4%	5.0%
200-249	2.5%	7.3%	0.0%
250 or more	6.7%	8.4%	6.8%
TOTAL	100.0%	100.0%	100.0%
SAMPLE SIZE (N)	282	53	45
Average number of bags or boxes of food distributed, among valid responses ^c			
	84	n.a.	n.a.
Median number of bags or boxes of food distributed, among valid responses ^c			
	36	n.a.	n.a.
Average number of meals served, among valid responses ^c			
	n.a.	129	65
Median number of meals served, among valid responses ^c			
	n.a.	50	33
SAMPLE SIZE (N)	195	26	18

SOURCE: This table was constructed based on usable responses to Question 6c of the agency survey.

NOTES: The percentages presented in this table are based only on usable responses, excluding missing, don't know, and refusal responses. All usable responses were weighted as described in Chapter 3 and in the Technical Appendix volume to represent all emergency food programs of the Food Bank of Central and Eastern North Carolina. The sample sizes (N) also include missing data.

Missing, don't know, and refusal responses combined are 33.4% for pantry programs, 49.5% for kitchen programs, and 59.9% for shelter programs.

TABLE 11.2.1 (continued)

^aFor pantries and kitchens, responses greater than 1,000 bags or boxes distributed or meals served were recoded as 1,000 bags or boxes distributed or meals served. For shelters, responses greater than 300 meals served were recoded as 300 meals served.

^bIt should be noted that, particularly for pantries, amounts distributed per day can vary substantially over the month, so responses may depend on when the survey was filled out.

^cZeros as responses were not included as valid responses for calculating the average and the median.

n.a. = not applicable.

Emergency food programs vary greatly in size. Some programs served several people and others several hundred people when they were last open. On average, the pantry programs distributed 84 boxes/bags (median: 36) of food when they were last open. The kitchen programs distributed 129 meals (median: 50) and the shelter programs distributed 65 meals (median: 33).

12. AGENCIES AND FOOD PROGRAMS: ABILITY TO MEET CLIENT NEEDS

The study has also examined the capacity of the agencies and food programs to meet client needs. Below, we consider the stability of the programs, the main problems they face, and the degree to which they have had to stretch resources or turn away clients. Reasons why some agencies have had to turn away clients are also discussed.

12.1 STABILITY OF EXISTING FOOD PROGRAMS

Agencies were asked whether their food programs are stable or facing problems that threaten their food programs' continued operation and, if so, which of several listed factors were the causes of the threat. Agencies were asked to check more than one reason, if more than one was appropriate. Table 12.1.1 shows the percentage of food programs affected by each of the factors cited.

TABLE 12.1.1
STABILITY OF EXISTING FOOD PROGRAMS

	Pantry Programs	Kitchen Programs	Shelter Programs
Nature of the problem ^a			
Problems related to funding	41.7%	47.5%	65.7%
Problems related to food supplies	34.4%	30.6%	27.1%
Problems related to paid staff or personnel	7.2%	11.4%	35.8%
Problems related to volunteers	15.0%	15.4%	17.5%
Community resistance	0.8%	2.8%	7.3%
Other problems	6.1%	2.8%	0.0%
Programs not facing problems that threaten their continued operation	35.9%	33.6%	29.7%
SAMPLE SIZE (N)	282	53	45

SOURCE: This table was constructed based on usable responses to Question 17 of the agency survey.

TABLE 12.1.1 (continued)

NOTES: All usable responses were weighted as described in Chapter 3 and in the Technical Appendix volume to represent all emergency food programs of the Food Bank of Central and Eastern North Carolina. The sample sizes (N) also include missing data.

Missing, don't know, and refusal responses combined are 8.7% for pantry programs, 16.5% for kitchen programs, and 11.0% for shelter programs.

^aMultiple responses were accepted.

As Table 12.1.1 shows, 64.1% of the pantries, 66.4% of the kitchens, and 70.3% of the shelters believe they are facing one or more problems that threaten their continued operation:

- Of the programs facing threats, 41.7% of the pantries, 47.5% of the kitchens, and 65.7% of the shelters referred to funding issues as a threat; 34.4% of the pantries, 30.6% of the kitchens, and 27.1% of the shelters indicated food supplies as a threat to their continued operation.
- 11.4% of the threatened kitchens and 35.8% of the threatened shelters identified issues related to paid staff or personnel as a threat; 15.0% of the pantries and 15.4% of the kitchens stated that volunteer-related problems posed a threat.

12.2 FREQUENCY OF STRETCHING FOOD RESOURCES

Agencies were asked whether their programs ever had to ration or limit food in order to provide some food to all clients and, if so, how often. Table 12.2.1 shows the varying degrees of frequency with which the food programs stretched food resources.

TABLE 12.2.1
FREQUENCY OF STRETCHING FOOD RESOURCES

During 2005, How Often Did the Program Have to Reduce Meal Portions or Reduce the Quantity of Food in Food Packages Because of a Lack of Food	Pantry Programs	Kitchen Programs	Shelter Programs
Never	37.3%	66.7%	70.4%
Rarely	44.3%	25.1%	15.8%
SUBTOTAL	81.6%	91.8%	86.2%
Sometimes	18.1%	8.2%	13.8%
Always	0.3%	0.0%	0.0%
SUBTOTAL	18.4%	8.2%	13.8%
TOTAL	100.0%	100.0%	100.0%
SAMPLE SIZE (N)	282	53	45

SOURCE: This table was constructed based on usable responses to Question 13 of the agency survey.

NOTES: The percentages presented in this table are based only on usable responses, excluding missing, don't know, and refusal responses. All usable responses were weighted as described in Chapter 3 and in the Technical Appendix volume to represent all emergency food programs of the Food Bank of Central and Eastern North Carolina. The sample sizes (N) also include missing data.

Missing, don't know, and refusal responses combined are 4.0% for pantry programs, 13.1% for kitchen programs, and 20.3% for shelter programs.

During the year 2005, 37.3% of pantries, 66.7% of kitchens, and 70.4% of shelters never experienced the need to stretch food resources (reduce meal portions or reduce the quantity of food in food packages).

- Nevertheless, 18.4% of the pantries, 8.2% of the kitchens, and 13.8% of the shelters indicated that they sometimes or always had to stretch food resources.

12.3 PROGRAMS THAT TURNED AWAY CLIENTS

Agencies were asked whether clients had been turned away within the past year and, if so, how many and for what reasons. Agencies were asked to use either their records or their best estimates to supply this information. Tables 12.3.1 and 12.3.2 show the results.

TABLE 12.3.1
PROGRAMS THAT TURNED AWAY CLIENTS

	Pantry Programs	Kitchen Programs	Shelter Programs
Did the program turn away clients during the past year? ^a			
Yes	34.1%	14.8%	67.5%
No	65.9%	85.2%	32.5%
TOTAL	100.0%	100.0%	100.0%
SAMPLE SIZE (N)	282	53	45
Average number of clients turned away in the past year among those that turned away at least one client	32	34	19
Median number of clients turned away in the past year among those that turned away at least one client	16	30	20
SAMPLE SIZE (N) – Programs providing a valid number of clients who were turned away	48	6	13
Reasons for turning away clients ^b			
Lack of food resources	40.0%	40.8%	7.2%
Services needed not provided by the program	13.2%	27.3%	56.0%
Clients were ineligible or could not prove eligibility	30.9%	27.3%	46.3%
Clients abused program/came too often	50.9%	54.6%	15.1%
Clients exhibited drug, alcohol, or behavior problem	21.2%	27.3%	69.1%
Clients lived outside service area	31.6%	13.9%	8.8%
Clients had no proper identification	18.3%	0.0%	28.8%
Client's income exceeded the guidelines	18.3%	0.0%	0.0%
Other	10.9%	18.1%	29.6%
SAMPLE SIZE (N) – Programs that turned away clients	88	7	27

SOURCE: This table was constructed based on usable responses to questions 9, 10, and 12 of the agency survey.

NOTES: All usable responses were weighted as described in Chapter 3 and in the Technical Appendix volume to represent all emergency food programs of the Food Bank of Central and Eastern North Carolina. The sample sizes (N) also include missing data.

For programs that turned away clients, missing, don't know, and refusal responses combined are 6.9% for pantry programs, 13.6% for kitchen programs, and 13.3% for shelter programs.

TABLE 12.3.1 (continued)

For reasons for turning away clients, missing, don't know, and refusal responses combined are 1.4% for pantry programs, 0.0% for kitchen programs, and 3.5% for shelter programs.

^aFor pantries, responses greater than 3,000 clients turned away were recoded as 3,000 clients. For kitchens and shelters, responses greater than 2,500 clients turned away were recoded as 2,500 clients.

^bMultiple responses were accepted.

As Table 12.3.1 shows, 34.1% of the pantries, 14.8% of the kitchens, and 67.5% of the shelters responded that they turned away clients during the past year. Reasons for turning away clients follow:

- Among programs turning away clients, 40.0% of the pantries, 40.8% of the kitchens, and 7.2% of the shelters turned away clients at least once due to lack of food resources.
- Among programs turning away clients, 13.2% of the pantries, 27.3% of the kitchens, and 56.0% of the shelters turned away clients at least once because the services needed were not provided by the program.
- Among programs turning away clients, 30.9% of the pantries, 27.3% of the kitchens, and 46.3% of the shelters turned away clients at least once because the clients were ineligible or could not prove eligibility.
- Among programs turning away clients, 50.9% of the pantries, 54.6% of the kitchens, and 15.1% of the shelters turned away clients at least once because the clients abused the program or because they came too often.

TABLE 12.3.2

MOST FREQUENT REASONS THE PROGRAM TURNED AWAY CLIENTS

	Pantry Programs	Kitchen Programs	Shelter Programs
Most frequent reason			
Lack of food or resources	31.1%	27.3%	4.2%
Services needed not provided by the program	3.3%	0.0%	20.7%
Clients were ineligible or could not prove eligibility	1.2%	13.5%	21.7%

SOURCE: This table was constructed based on usable responses to Question 11 of the agency survey.

NOTES: The percentages presented in this table are based only on usable responses, excluding missing, don't know, and refusal responses. All usable responses were weighted as described in Chapter 3 and in the Technical Appendix volume to represent all emergency food programs of the Food Bank of Central and Eastern North Carolina. The sample sizes (N) also include missing data.

For most frequent reason, missing, don't know, and refusal responses combined are 4.9% for pantry programs, 0.0% for kitchen programs, and 15.2% for shelter programs.

For second most frequent reason, missing, don't know, and refusal responses combined are 32.0% for pantry programs, 45.4% for kitchen programs, and 22.5% for shelter programs.

12.4 ADDITIONAL FOOD RESOURCES NEEDED PER WEEK

Agencies were asked how much additional food is needed during a typical week to adequately meet the demand for food. Results are summarized in Table 12.4.1.

TABLE 12.4.1

ADDITIONAL FOOD RESOURCES NEEDED PER WEEK

	Pantry Programs	Kitchen Programs	Shelter Programs
No additional meals or meal equivalents needed ^a	51.4%	56.8%	70.4%
1 to 10 additional meals or meal equivalents needed	1.6%	5.9%	3.1%
11 to 49 additional meals or meal equivalents needed	5.9%	8.6%	6.4%
50 to 149 additional meals or meal equivalents needed	9.8%	10.7%	6.7%
150 or more additional meals or meal equivalents needed	31.2%	18.0%	13.4%
TOTAL	100.0%	100.0%	100.0%
SAMPLE SIZE (N)	282	53	45
Average number of additional meal equivalents needed among valid answers ^b	401	300	198
Median number of additional meal equivalents needed among valid answers ^b	192	50	100
Average amount of additional food needed (pounds) ^b	522	390	257
Median amount of additional food needed (pounds) ^b	250	65	130
SAMPLE SIZE (N) – Programs that need more food resources	91	16	9

SOURCE: This table was constructed based on usable responses to Question 14 of the agency survey.

NOTES: The percentages presented in this table are based only on usable responses, excluding missing, don't know, and refusal responses. All usable responses were weighted as described in Chapter 3 and in the Technical Appendix volume to represent all emergency food programs of the Food Bank of Central and Eastern North Carolina. The sample sizes (N) also include missing data.

Missing, don't know, and refusal responses combined are 32.6% for pantry programs, 31.0% for kitchen programs, and 33.9% for shelter programs.

^aThis variable was constructed from two variables, one asking food poundage and the other number of meals. Poundage was converted to meals by dividing the poundage by 1.3. Then, the resulting number of meals and the other variable of actual number of meals were summed to produce the number of meals reported here. The 1.3 pounds per meal factor is based on tabulations from U.S. Department of Agriculture: "Food Consumption and Dietary Levels of Households in the United States, 1987-88." Washington, DC: U.S. Government Printing Office, 1994.

^bZeros as responses were not included as valid responses for calculating the average and the median. For pantries, responses greater than 2,500 lb. (1,923 meals) were recoded as 2,500 lb. (1,923 meals). For kitchens, responses

TABLE 12.4.1 (continued)

greater than 1,690 lb. (1,300 meals) were recoded as 1,690 lb. (1,300 meals). For shelters, responses greater than 2,080 lb. (1,600 meals) were recoded as 2,080 lb. (1,600 meals).

The percentage of programs that answered that they did not need additional food for distribution is 51.4% for pantries, 56.8% for kitchens, and 70.4% for shelters. Results among the programs in need of additional food follow:

- The median pantry needed more than 250 additional pounds of food per week.
- The median kitchen needed more than 50 additional meal equivalents per week.
- The median shelters needed more than 100 additional meal equivalents per week.

13. AGENCIES AND FOOD PROGRAMS: RESOURCES

Substantial resources are required to operate emergency food programs effectively, including food, staffing, and physical space. This chapter reports the types and sources of the resources used by providers of the Food Bank of Central and Eastern North Carolina. We begin by examining the sources of food reported by the providers. The use of paid and unpaid staff is then examined, with a focus on the great importance of volunteers to the system.

13.1 SOURCES OF FOOD DISTRIBUTED BY PROGRAMS

The survey asked how much of the food distributed through the emergency food programs comes from food banks, versus other sources. In particular, agencies were asked to state the percentage of food received from each of the sources shown in Table 13.1.1.

TABLE 13.1.1
SOURCES OF FOOD DISTRIBUTED BY PROGRAMS

Sources of Food	Pantry Programs	Kitchen Programs	Shelter Programs
Average percentage of food received from food bank(s)	72.9%	39.0%	29.8%
Percentage of programs receiving food from ^a :			
TEFAP or CSFP	66.1%	57.2%	54.6%
Church or religious congregations	72.4%	76.0%	74.3%
Local merchant or farmer donations	39.3%	50.0%	49.5%
Local food drives (e.g., Boy Scouts)	39.5%	35.9%	56.8%
Food purchased by agency	47.7%	65.9%	72.2%
Other ^b	21.2%	20.8%	24.8%
SAMPLE SIZE (N)	282	53	45

SOURCE: This table was constructed based on usable responses to questions 8, 8a, and 8b of the agency survey.

NOTES: The percentages presented in this table are based only on usable responses, excluding missing, don't know, and refusal responses. All usable responses were weighted as described in Chapter 3 and in the Technical Appendix volume to represent all emergency food programs of the Food Bank of Central and Eastern North Carolina. The sample sizes (N) also include missing data.

TABLE 13.1.1 (*continued*)

For average percentage of food received from food bank, missing, don't know, and refusal responses combined are 5.2% for pantry programs, 5.7% for kitchen programs, and 9.8% for shelter programs.

For percentage of programs that distribute government or USDA commodities (TEFAP or CSFP) received from food bank(s) or a state agency, missing, don't know, and refusal responses combined are 15.8% for pantry programs, 16.5% for kitchen programs, and 21.3% for shelter programs.

For percentage of food from the other listed sources, missing, don't know, and refusal responses combined are 13.5% for pantry programs, 10.0% for kitchen programs, and 11.0% for shelter programs.

^aMultiple responses were accepted.

^bThis includes individual donations, organization gardens, and donations from other volunteer or civic groups.

Food banks are a major source of food. 72.9% of the food the pantries distribute, 39.0% of the food the kitchens serve, and 29.8% of the food the shelters serve are provided by their food banks. Programs also receive food from other sources:

- 66.1% of pantries, 57.2% of kitchens, and 54.6% of shelters receive food from federal food or commodity programs, such as TEFAP or CSFP.
- 72.4% of pantries, 76.0% of kitchens, and 74.3% of shelters receive food from churches or religious congregations.
- 39.3% of pantries, 50.0% of kitchens, and 49.5% of shelters receive food from local merchants or farmer donations.
- 39.5% of pantries, 35.9% of kitchens, and 56.8% of shelters receive food from local food drives.

13.2 STAFF AND VOLUNTEER RESOURCES DURING PREVIOUS WEEK

Agencies were asked how many paid staff and volunteers they had and how many volunteer hours they had received during the previous week. Table 13.2.1 presents the results.

TABLE 13.2.1
STAFF AND VOLUNTEER RESOURCES DURING PREVIOUS WEEK

Staff and Volunteer Resources	Pantry Programs	Kitchen Programs	Shelter Programs	Other Programs
Number of paid staff ^a				
None	72.4%	37.7%	2.6%	n.a.
1	13.3%	20.6%	13.7%	n.a.

TABLE 13.2.1 (continued)

Staff and Volunteer Resources	Pantry Programs	Kitchen Programs	Shelter Programs	Other Programs
6-10	18.4%	8.8%	10.2%	9.0%
11-25	22.7%	20.1%	16.7%	13.5%
26-50	12.8%	16.0%	24.4%	18.9%
51-100	8.7%	11.5%	8.8%	16.1%
More than 100	7.4%	20.4%	11.5%	15.3%
TOTAL	100.0%	100.0%	100.0%	100.0%
Average number of volunteer hours among valid responses (hours)	32	62	39	56
Median number of volunteer hours among valid responses (hours)	32	62	39	6
SAMPLE SIZE (N)	282	53	45	399

SOURCE: This table was constructed based on usable responses to questions 15, 16, and 27 of the agency survey.

NOTES: The percentages presented in this table are based only on usable responses, excluding missing, don't know, and refusal responses. All usable responses were weighted as described in Chapter 3 and in the Technical Appendix volume to represent all emergency food programs of the Food Bank of Central and Eastern North Carolina. The sample sizes (N) also include missing data.

For number of paid staff, missing, don't know, and refusal responses combined are 13.1% for pantry programs, 9.3% for kitchen programs, and 21.5% for shelter programs.

For number of volunteers, missing, don't know, and refusal responses combined are 5.6% for pantry programs, 18.6% for kitchen programs, 20.1% for shelter programs, and 62.1% for other programs.

For number of volunteer hours, missing, don't know, and refusal responses combined are 5.6% for pantry programs, 18.6% for kitchen programs, 20.1% for shelter programs, and 62.1% for other programs.

^aFor pantries and kitchens, responses greater than 50 paid staff members were recoded as 50 paid staff members. For shelters, responses greater than 75 paid staff members were recoded as 75 paid staff members.

^bFor pantries, kitchens, and shelters, responses greater than 200 volunteers were recoded as 200 volunteers. For other programs, responses greater than 3,500 volunteers were recoded as 3,500 volunteers.

^cFor pantries, kitchens, and shelters, responses greater than 1,000 volunteer hours were recoded as 1,000 volunteer hours. For other programs, responses greater than 7,000 volunteer hours were recoded as 7,000 volunteer hours.

As Table 13.2.1 shows, 72.4% of the pantries, 37.7% of the kitchens, and 2.6% of the shelters had no paid staff in their workforce during the week prior to this study. The median number of paid staff was 0 for the pantries, 1 for the kitchens, and 8 for the shelters. More results include:

- The median number of volunteers in a week was 5 for the pantries, 8 for the kitchens, and 7 for the shelters, and 6 for the other programs.
- The median number of volunteer hours during the previous week of this study was 32 for the pantries, 62 for the kitchens, and 39 for the shelters, and 6 for the other programs.
- 10.9% of the pantries, 18.7% of the kitchens, and 14.8% of the shelters, and 21.1% of the other programs had no volunteers in their workforce during the previous week of this study.
- The midpoint (\$7.90) of the current minimum wage (\$5.15) and the average hourly earning from service occupations (\$10.65) can be used to obtain a dollar value of volunteer hours.²²

²² U.S. Department of Labor, Bureau of Labor Statistics. "National Compensation Survey: Occupational Wages in the United States, 2004." August 2005, Table 1, p. 3.

13.3 PRODUCTS PURCHASED FROM SOURCES OTHER THAN FOOD BANKS

Agencies were asked to indicate the categories of products that their programs purchased with cash from sources other than their food bank resources. Results based on agency responses are summarized in Table 13.3.1.

TABLE 13.3.1
PRODUCTS PURCHASED FROM SOURCES OTHER THAN FOOD BANK

Categories of Products Programs Purchased with Cash from Sources Other than the Agency’s Food Bank ^a	Pantry Programs	Kitchen Programs	Shelter Programs
Bread, cereal, rice, and pasta	35.5%	61.2%	50.1%
Fresh fruits and vegetables	13.6%	49.1%	45.5%
Canned or frozen fruits and vegetables	31.1%	59.5%	31.6%
Meat, poultry, fish, beans, eggs, and nuts	26.2%	55.6%	63.5%
Milk, yogurt, and cheese	13.4%	50.5%	60.2%
Fats, oils, condiments, and sweets	13.1%	56.1%	42.7%
Cleaning or personal hygiene products, diapers, and toilet paper	29.2%	58.7%	91.8%
Other ^b	8.0%	10.5%	5.1%
No outside purchases	37.4%	6.3%	2.5%
SAMPLE SIZE (N)	282	53	45

SOURCE: This table was constructed based on usable responses to Question 23 of the agency survey.

NOTES: All usable responses were weighted as described in Chapter 3 and in the Technical Appendix volume to represent all emergency food programs of the Food Bank of Central and Eastern North Carolina. The sample sizes (N) also include missing data.

Missing, don’t know, and refusal responses combined are 9.3% for pantry programs, 8.8% for kitchen programs, and 16.0% for shelter programs.

^aMultiple responses were accepted.

^bThis includes beverages, such as coffee, tea, and juice; paper products, such as plastic utensils, paper plates, and garbage bags; and laundry products.

As Table 13.3.1 shows, 37.4% of the pantries, 6.3% of the kitchens, and 2.5% of the shelters did not purchase products from sources other than their food banks. However, most

emergency food programs purchased products they needed from sources other than their food banks. More details follow:

- 35.5% of the pantries, 61.2% of the kitchens, and 50.1% of the shelters purchased bread, cereal, rice, and pasta.
- 13.6% of the pantries, 49.1% of the kitchens, and 45.5% of the shelters purchased fresh fruits and vegetables.
- 31.1% of the pantries, 59.5% of the kitchens, and 31.6% of the shelters purchased canned or frozen fruits and vegetables.
- 26.2% of the pantries, 55.6% of the kitchens, and 63.5% of the shelters purchased meat, poultry, fish, beans, eggs, and nuts.
- 13.4% of the pantries, 50.5% of the kitchens, and 60.2% of the shelters purchased milk, yogurt, and cheese.
- 13.1% of the pantries, 56.1% of the kitchens, and 42.7% of the shelters purchased fats, oils, condiments, and sweets.
- 29.2% of the pantries, 58.7% of the kitchens, and 91.8% of the shelters purchased cleaning or personal hygiene products, diapers, and toilet paper.

14. AGENCIES AND FOOD PROGRAMS: IMPORTANCE OF FOOD BANKS

At the national level, food banks are by far the single largest source of food to A2H providers. This chapter examines the providers' relationship to the food banks in more detail. We first present tabulations of what products the providers would like to be able to obtain in greater quantity from their food banks. Subsequent sections explore the overall importance of the food banks to the operations of the providers and additional types of services the providers would like to obtain from the food banks.

14.1 PRODUCTS NEEDED FROM FOOD BANKS

Agencies were also asked to identify the categories of products they need more of from their food bank. Table 14.1.1 presents the findings.

TABLE 14.1.1
PRODUCTS NEEDED FROM FOOD BANKS

Categories of Food and Nonfood Products Programs Need or Need More of from Their Food Bank ^a	Pantry Programs	Kitchen Programs	Shelter Programs
Bread, cereal, rice, and pasta	50.1%	40.0%	26.9%
Fresh fruits and vegetables	30.9%	42.0%	37.7%
Canned or frozen fruits and vegetables	45.5%	42.0%	17.7%
Meat, poultry, fish, beans, eggs, and nuts	52.5%	45.8%	42.4%
Milk, yogurt, and cheese	37.4%	37.7%	44.8%
Fats, oils, condiments, and sweets	30.6%	40.5%	26.0%
Cleaning or personal hygiene products, diapers, and toilet paper	64.7%	42.7%	73.4%
Other ^b	7.9%	11.2%	12.5%
SAMPLE SIZE (N)	282	53	45

SOURCE: This table was constructed based on usable responses to Question 24 of the agency survey.

NOTES: All usable responses were weighted as described in Chapter 3 and in the Technical Appendix volume to represent all emergency food programs of the Food Bank of Central and Eastern North Carolina. The sample sizes (N) also include missing data.

TABLE 14.1.1 (*continued*)

Missing, don't know, and refusal responses combined are 5.7% for pantry programs, 15.5% for kitchen programs, and 13.4% for shelter programs.

^aMultiple responses were accepted.

^bThis includes paper products, such as plastic utensils, paper plates, and garbage bags; beverages, such as juice, coffee, and tea; and dietary supplements, such as vitamins and Ensure.

As presented in Table 14.1.1, many agencies wish to receive more of certain products from their food banks. Specifics are as follows:

- 50.1% of the pantries, 40.0% of the kitchens, and 26.9% of the shelters need more bread, cereal, rice, and pasta.
- 30.9% of the pantries, 42.0% of the kitchens, and 37.7% of the shelters need more fresh fruits and vegetables.
- 45.5% of the pantries, 42.0% of the kitchens, and 17.7% of the shelters need more canned or frozen fruits and vegetables.
- 52.5% of the pantries, 45.8% of the kitchens, and 42.4% of the shelters need more meat, poultry, fish, beans, eggs, and nuts.
- 37.4% of the pantries, 37.7% of the kitchens, and 44.8% of the shelters need more milk, yogurt, and cheese.
- 30.6% of the pantries, 40.5% of the kitchens, and 26.0% of the shelters need more fats, oils, condiments, and sweets.
- 64.7% of the pantries, 42.7% of the kitchens, and 73.4% of the shelters need more products in the category of cleaning or personal hygiene products, diapers, and toilet paper.

14.2 IMPACT OF ELIMINATION OF FOOD BANK

Agencies were asked how much of an impact the elimination of their food bank would have on their programs. Table 14.2.1 shows the results.

TABLE 14.2.1
IMPACT OF ELIMINATION OF FOOD BANK

<i>If the Food Supply You (i.e., Agency) Receive from Your Food Bank Was Eliminated, How Much of an Impact Would This Have on Your Program?</i>	Pantry Programs	Kitchen Programs	Shelter Programs
No impact at all	3.5%	13.8%	4.9%
Minimal impact	9.8%	18.8%	33.8%
Significant impact	29.0%	34.9%	39.0%
Devastating impact	53.6%	32.6%	13.9%
Unsure	4.1%	0.0%	8.3%
TOTAL	100.0%	100.0%	100.0%
SAMPLE SIZE (N)	282	53	45

SOURCE: This table was constructed based on usable responses to Question 25 of the agency survey.

NOTES: The percentages presented in this table are based only on usable responses, excluding missing, don't know, and refusal responses. All usable responses were weighted as described in Chapter 3 and in the Technical Appendix volume to represent all emergency food programs of the Food Bank of Central and Eastern North Carolina. The sample sizes (N) also include missing data.

Missing, don't know, and refusal responses combined are 3.3% for pantry programs, 7.0% for kitchen programs, and 17.3% for shelter programs.

82.6% of the pantries, 67.5% of the kitchens, and 52.9% of the shelters said that the elimination of support from their food banks would have a significant or devastating impact on their operation. Details include:

- 53.6% of the pantries, 32.6% of the kitchens, and 13.9% of the shelters believed that the elimination of the food bank would have a devastating impact on their programs.
- Another 29.0% of the pantries, 34.9% of the kitchens, and 39.0% of the shelters believed that the elimination of the food bank would have a significant impact on their programs.

14.3 AREAS OF ADDITIONAL ASSISTANCE DESIRED

Agencies were asked what kinds of additional assistance, in addition to food, they need to meet their clients' needs. Findings are presented in Table 14.3.1.

TABLE 14.3.1

AREAS OF ADDITIONAL ASSISTANCE DESIRED

Programs That Need Additional Assistance in Any of the Following Areas ^a	Pantry Programs	Kitchen Programs	Shelter Programs
Nutrition education	25.7%	31.7%	22.1%
Training in food handling	18.6%	39.9%	32.5%
Accessing local resources	42.3%	31.2%	22.9%
Advocacy training	21.8%	11.5%	13.5%
Other ^b	3.7%	0.0%	0.0%
SAMPLE SIZE (N)	282	53	45

SOURCE: This table was constructed based on usable responses to Question 26 of the agency survey.

NOTE: All usable responses were weighted as described in Chapter 3 and in the Technical Appendix volume to represent all emergency food programs of the Food Bank of Central and Eastern North Carolina.

^aMultiple responses were accepted.

^bThis includes funding and addiction programs.

Some programs wished to receive further assistance from their food banks in one or more of the areas specified in Table 14.3.1. Details include:

- 25.7% of the pantries, 31.7% of the kitchens, and 22.1% of the shelters said that they needed additional assistance in nutrition education.
- 18.6% of the pantries, 39.9% of the kitchens, and 32.5% of the shelters said that they needed additional assistance in training in food handling.
- 42.3% of the pantries, 31.2% of the kitchens, and 22.9% of the shelters said that they needed additional assistance in accessing local resources.
- 21.8% of the pantries, 11.5% of the kitchens, and 13.5% of the shelters said that they needed additional assistance in advocacy training.

APPENDIX A

**PRECISION OF REPORTED ESTIMATES:
SURVEY ERROR AND SAMPLING ERROR**

Food banks should be aware that many of the estimates in the report are based on relatively small sample sizes and are subject to survey error, which includes statistical sampling error and error from the operational components of the survey (non-sampling error), such as nonresponse, reporting error and measurement error. While the sampling design and sample sizes can impose some control on the sampling error (and while this error can be quantified), the non-sampling error reflects the degree of success in designing the questionnaire and data collection procedures and in conducting the data collection activities at all stages. Unfortunately, the non-sampling error cannot be quantified. The exact amount of variation (both sampling error and non-sampling error) will be different for different food banks, and the relative contribution of sampling error and non-sampling error to the total survey error will also vary by food bank.

In general, food banks should be aware that, at a minimum, most of the percentages in the report are measured with sampling variation in the range of 8 to 12 percentage points²³. For instance, if food stamp participation rates among households served by a food bank are estimated to be—say—32%, it is very likely that the margin of error at a minimum extends from 24% to 40% around the 32% estimate. Furthermore, in many instances this margin of error could be 12 percentage points or more, especially for subgroups with small sample sizes.

For estimates of annual numbers of clients, for most food banks the margin of error tends to be in the range of about 30% of the estimates. For instance if a food bank's providers are estimated to serve—say—100,000 different clients annually, the margin of error around this

²³ Sampling variation is measured in these reports in terms of the 90% confidence interval around an estimate. The 90% confidence interval implies that, with 90% confidence, the true value of an estimate will be in the interval. These confidence intervals, however, do not account for the non-sampling error, which can increase (sometimes substantially) the size of the confidence interval.

estimate would extent from about 70,000 to 130,000. In general, sampling error can depend on such factors as:

- Overall number of clients interviewed
- The number of different providers of each type at which clients were interviewed
- The specific variable(s) being considered

The ranges of precision highlighted above focus only on sampling variation due to statistical sampling and the number of completed interviews. As noted previously, other forms of survey error (the non-sampling error) will increase overall survey error. These other forms of error include:

- **Nonresponse.** When completed interviews is obtained from only a portion of the clients selected for the survey
- **Response Error.** When the client interviewed does not provide an accurate answer to a question because the client either misunderstands the question or chooses not to provide an accurate answer
- **Reporting Error.** When counts or other information used in the sampling and other data collection activities are in error or missing
- **Measurement Error.** When the question in the questionnaire is not worded effectively to obtain the desired information from the client

These forms of error exist in all surveys, but the size of the non-sampling error (relative to the sampling error) depends on the design of the data collection activities and implementation of these by all persons involved in the survey.

SAMPLING ERROR UNDER DIFFERENT CIRCUMSTANCES

The food bank reports contain a wealth of information and an extensive number of estimates based on the survey data. While in general it is desirable and useful to provide detailed information on the sampling variation for all variables for each specific food bank and in the multiple food bank-level reports, this is not feasible and would potentially detract from the

usefulness of the reports. To provide a useful measure of the extent of sampling error in the estimates, we have computed estimates of the statistical variation for selected variables to identify the general range of sampling variation²⁴. Based on those calculations, we provide below some general guidelines that can be useful in helping food banks assess how much statistical variation is present in their estimates. The guidelines follow.²⁵

Guidelines for Estimated Percentages for All Clients or Only Pantry Clients

The largest sample sizes at the food bank level are for the overall client sample and for the subsample of pantry users. Following are guidelines for sampling variation for these groups:

Guideline 1. If you are considering a percentage estimate in the range of 30% to 70% and if the estimate is based on between 300 and 500 observations, then the margin of error is likely to be plus-or-minus about 8 percentage points.

Example 1. Suppose that the report for a specific food bank estimates the percentage of pantry households that include at least one working member as 30%. Also, suppose the sample size for pantry clients at that food bank is 330. Then we can be 90% confident that the true value lies between 22% and 38%.

Guideline 2. If you are considering a percentage estimate below 30% or above 70%, and if the estimate is based on between 300 and 500 observations, then the margin of error is likely to be plus-or-minus about 5 percentage points. (This is like Guideline 1 but with a different percentage range.)

²⁴ As noted before, the measures of sampling variation do not account for non-sampling error.

²⁵ Estimates of the sampling variation are based on estimates computed using data analysis software design for complex surveys (SUDAAN) to estimate standard errors for selected estimates for each individual participating food banks. The estimates in this appendix reflect average standard errors across food banks. The calculations take into account clustering, differential sampling rates, and other aspects of the sampling design. The confidence intervals reported in the text are 90% confidence intervals.

Example 2. Suppose that the report for a specific food bank estimates the percentage of all households that include at least one member who is 65 years old or older. Suppose the estimate is 10%, and suppose the sample size for pantry clients at that food bank is 316. Then we can be 90% confident that the true value lies between 5% and 15%.

Guideline 3. If you are considering a percentage estimate in the range of 30% to 70% and if the estimate is based on 100 to 300 observations, then the margin of error is plus-or-minus about 9 percentage points. (This is like Guideline 1 but with a different sample size.)

Example 3. Suppose that the report for a specific food bank estimates the percentage of pantry households that are food insecure to be 60%, and suppose the sample size for pantry clients at that food bank is 122. Then we can be 90% confident that the true value lies between 51% and 69%.

Guideline 4. If you are considering a percentage estimate below 30% or above 70%, and if the estimate is based on about 100 to 300 observations, then the margin of error is likely to be about plus-or-minus about 6 percentage points. (This is like Guideline 2 but with a different sample size.)

Example 4. Suppose that the report for a specific food bank has an estimate of 15% for the percentage of all households that include at least one member who is 65 years old or older. Suppose too that the sample size for pantry clients at that food bank is 220. Then we can be 90% confident that the true value lies between 9% and 21%.

Guidelines for Estimated Percentages for Clients at Kitchens or Shelters

The numbers of completed interviews at kitchens and shelters tend to be smaller and the estimates from these providers also inherently have greater statistical variation because of the frequency of operation. Following are guidelines for sampling variation for these groups:

For Kitchens

Guideline 5. If you are considering a percentage estimate for kitchens in the range of 30% to 70% and if the estimate is based on between 30 and 50 observations, then the margin of error is approximately plus-or-minus about 18 percentage points.

Example 5. Suppose that the report for a specific food bank include an estimate that 40% of the kitchen households include at least one working member. Also, suppose the sample size for kitchen clients at that food bank is 45. Then we can be 90% confident that the true value lies between 27% and 63%.

Guideline 6. If you are considering a percentage estimate for kitchens that is below 30% or above 70%, and if the estimate is based on between 30 and 50 observations, then the margin of error is plus-or-minus about 10 percentage points. (This is like Guideline 5 but with a different percentage range.)

Example 6. Suppose that the report for a specific food bank includes an estimate of the percentage of all households that include at least one member who is 65 years old or older. Suppose the estimate is 20%, and suppose the sample size for kitchen clients at that food bank is 43. Then we can be 90% confident that the true value lies between 10% and 30%.

Guideline 7. If you are considering a percentage estimate for kitchen clients in the range of 30% to 70% and if the estimate is based on more than 50 observations, then the margin of error is plus-or-minus about 16 percentage points. (This is like Guideline 5 but with a different sample size.)

Example 7. Suppose that the report for a specific food bank estimates the percentage of kitchen households that are food insecure to be 60%, and suppose the sample size for kitchen clients at that food bank is 87. Then we can be 90% confident that the true value lies between 44% and 76%.

Guideline 8. If you are considering a percentage estimate for kitchen clients that is below 30% or above 70%, and if the estimate is based on more than 50 completed interviews, then the margin of error is plus-or-minus about 10 percentage points. (This is like Guideline 6 but with a different sample size.)

Example 8. Suppose that the report for a specific food bank has an estimate of 22% for all kitchen households include at least one member who is 65 years old or older. Suppose too that the sample size for kitchen clients at that food bank is 58. Then we can be 90% confident that the true value lies between 12% and 32%.

For Shelters

Guideline 9. If you are considering a percentage estimate for a shelter in the range of 30% to 70% and if the estimate is based on more than 30 completed interviews, then the margin of error is plus-or-minus about 19 percentage points.

Example 9. Suppose that the report for a specific food bank estimates the percentage of shelter households which food insecure as 65%. Also, suppose the sample size for shelter clients at that food bank is 45. Then we can be 90% confident that the true value lies between 46% and 84%.

Guideline 10. If you are considering a percentage estimate for shelters that is below 30% or above 70%, and if the estimate is based on more than 30 observations, then the margin of error is plus-or-minus about 11 percentage points. (This is like Guideline 9 but with a different percentage range.)

Example 10. Suppose that the report for a specific food bank, there is the estimate of the percentage of shelter households that include at least one working member. Suppose the estimate is 20%, and suppose the sample size for shelter clients at that food bank is 43. Then we can be 90% confident that the true value lies between 9% and 31%.

Guidelines for Estimates of Numbers of Annual Clients

The food bank reports also include estimates of the numbers of *different* clients served by the food banks in a year. For the typical food bank with about 400 overall client observations, the margin of error is approximately plus-or-minus 31% of the estimate. For instance, if a food bank is estimated to have approximately 20,000 different clients annually, then the statistical margin of error extends between approximately 13,800 and 26,200 clients.

APPENDIX B
FOOD STAMP ELIGIBILITY CRITERIA

FOOD STAMP ELIGIBILITY CRITERIASource: http://www.fns.usda.gov/fsp/applicant_recipients/resources.htm

For 2005, the following food stamp eligibility rules applied to households in the 48 contiguous states and the District of Columbia.

A. RESOURCES (RULES ON RESOURCE LIMITS)

Households may have \$2,000 in countable resources, such as a bank account, or \$3,000 in countable resources if at least one person is age 60 or older or is disabled. However, certain resources are *not* counted, such as a home and lot, the resources of people who receive Supplemental Security Income (SSI), the resources of people who receive Temporary Assistance for Needy Families (TANF) (formerly AFDC), and most retirement (pension) plans.

A licensed vehicle is *not* counted if:

- It is used for income-producing purposes
- It is annually producing income consistent with its fair market value
- It is needed for long distance travel for work (other than daily commute)
- It is used as the home
- It is needed to transport a physically disabled household member
- It is needed to carry most of the household's fuel or water
- The household has little equity in the vehicle (because of money owed on the vehicle, it would bring no more than \$1,500 if sold)

For the following licensed vehicles, the fair market value over \$4,650 is counted:

- One per adult household member
- Any other vehicle a household member under 18 drives to work, school, job training, or to look for work

For all other vehicles, the fair market value over \$4,650 or the equity value, whichever is more, is counted as a resource.

B. INCOME (RULES ON INCOME LIMITS)

Households must meet income tests *unless* all members are receiving Title IV (TANF), SSI, or, in some places, general assistance.

Most households must meet both the gross and net income tests, but a household with an elderly person or a person who is receiving certain types of disability payments only has to meet the net income test. Gross income means a household's total, nonexcluded income, before any deductions have been made. Net income means gross income minus allowable deductions.

Households, except those noted, that have income over the amounts listed below cannot get food stamps.

People in Household	Gross Monthly Income Limits	Net Monthly Income Limits
1	\$1,037	\$798
2	\$1,390	\$1,070
3	\$1,744	\$1,341
4	\$2,097	\$1,613
5	\$2,450	\$1,885
6	\$2,803	\$2,156
7	\$3,156	\$2,428
8	\$3,509	\$2,700
Each additional person	+\$354	+\$272

Note: Updated October 2005, effective through September 2006.

C. DEDUCTIONS (RULES ON ALLOWABLE DEDUCTIONS FROM INCOME)

Gross income means a household's total, nonexcluded income, before any deductions have been made. Net income means gross income minus allowable deductions.²⁶

²⁶ As of October 2005, effective through September 2006.

- A 20% deduction from earned income
- A standard deduction of \$134 for most households (higher for larger households, and in Alaska, Hawaii, and Guam)
- A dependent care deduction when needed for work, training, or education—but not more than \$200 for each child under age 2 and not more than \$175 for each other dependent
- Medical expenses for elderly or disabled members which are more than \$35 for the month if they are not paid by insurance or someone else
- Legally owed child support payments
- Excess shelter costs that are more than half the household's income after the other deductions. Allowable costs include the cost of fuel to heat and cook with, electricity, water, the basic fee for one telephone, rent or mortgage payments, and taxes on the home. The amount of the shelter deduction cannot be more than \$400 unless one person in the household is elderly or disabled. (The limit is higher in Alaska, Hawaii, and Guam.)

D. WORK AND ALIENS (RULES ON WORK, AND LEGAL IMMIGRANTS)

With some exceptions, able-bodied adults between 16 and 60 must register for work, accept suitable employment, and take part in an employment and training program to which they are referred by the food stamp office. Failure to comply with these requirements can result in disqualification from the program. In addition, able-bodied adults between 18 and 50 who do not have any dependent children can get food stamps for only 3 months in a 36-month period if they do not work or participate in a workfare or employment and training program other than job search. This requirement is waived in some locations.

E. IMMIGRANT ELIGIBILITY REQUIREMENTS

The 2002 Farm bill restores food stamp eligibility to most legal immigrants that:

- Have lived in the country five years
- Are receiving disability-related assistance or benefits, regardless of entry date
- Starting October 1, 2003, are children regardless of entry date

Certain non-citizens, such as those admitted for humanitarian reasons and those admitted for permanent residence, are also eligible for the program. Eligible household members can get food stamps even if there are other members of the household that are not eligible.

Non-citizens that are in the United States temporarily, such as students, are not eligible.

A number of states have their own programs to provide benefits to immigrants who do not meet the regular Food Stamp Program eligibility requirements.

APPENDIX C

**SOURCES OF INFORMATION SHOWN IN THE CHARTS AND TABLES IN
CHAPTERS 5 THROUGH 14**

Table	Client Question	Agency Question
5.1.1	Client data	
5.2.1	2. Sex 3. Age 4. Relationship 6. Employment 7. Are there any children age 0-5 years in household? 11. Are you Spanish, Latino, or of Hispanic descent or origin? 11a. Would that be Mexican, Puerto Rican, Cuban, some other Spanish, Hispanic, or Latino group? 12. What is your race?	
5.3.1	2. Sex 3. Age 5. Citizen	
5.3.2	2. Sex 3. Age 5. Citizen	
5.4.1	9. Are you married, living with someone as married, widowed, divorced, separated, or have you never been married?	
5.5.1	10. What is the highest level of education you completed?	
5.6.1	11. Are you Spanish, Latino, or of Hispanic descent or origin? 11a. Would that be Mexican, Puerto Rican, Cuban, some other Spanish, Hispanic, or Latino group? 12. What is your race?	
5.7.1	3. Age 6. Employment	

Table	Client Question	Agency Question
5.7.2	<p>6. Employment</p> <p>12a. Is respondent working?</p> <p>13. You mentioned that you are not working now. How long has it been since you worked?</p> <p>14a. Is this job a managerial or professional job?</p> <p>15. Are you participating in any gov't sponsored job training or work experience programs, such as Welfare to Work or the food stamp employment training program?</p>	
5.8.1	Federal Poverty Level Table	
5.8.2.1	<p>29. What was your total income last month before taxes?</p> <p>29a. What was your household's total income for last month?</p>	
5.8.3.1	<p>29. What was your total income last month before taxes?</p> <p>30. What was your household's main source of income last month?</p>	
5.8.3.2	<p>6. Employment</p> <p>25. Did you get money in the <u>last month</u> from any of the following....?</p> <p>29. What was your total income last month before taxes?</p>	
5.8.4.1	<p>29. What was your total income last month before taxes?</p> <p>31. What was your household's total income before taxes and other deductions <u>last year</u> from all sources, including Social Security and other gov't programs?</p>	
5.9.1.1	<p>16. Please tell me the kind of place where you now live.</p> <p>17. Do you own, rent, live free with someone else?</p> <p>18. Were you late paying your last month's rent or mortgage?</p> <p>81. Does your household receive Section 8 or Public Housing Assistance?</p>	
5.9.2.1	<p>19. Do you have access to a place to prepare a meal, a working telephone, and a car that runs?</p>	

Table	Client Question	Agency Question
6.1.1	<p>42. “The food I/we bought just didn’t last, and I/we didn’t have money to get more.” (Often, sometimes, never true)</p> <p>43. “I/We couldn’t afford to eat balanced meals.” (Often, sometimes, never true)</p> <p>44. In the last 12 months, did you ever cut the size of your meals or skip meals because there wasn’t enough money for food?</p> <p>44a. How often did this happen?</p> <p>45. In the last 12 months, did you ever eat less than you felt you should because there wasn’t enough money to buy food?</p> <p>46. In the last 12 months, were you ever hungry but didn’t eat because you couldn’t afford enough food?</p>	
6.1.2	<p>42. “The food I/we bought just didn’t last, and I/we didn’t have money to get more.” (Often, sometimes, never true)</p> <p>43. “I/We couldn’t afford to eat balanced meals.” (Often, sometimes, never true)</p> <p>44. In the last 12 months, did you ever cut the size of your meals or skip meals because there wasn’t enough money for food?</p> <p>44a. How often did this happen?</p> <p>45. In the last 12 months, did you ever eat less than you felt you should because there wasn’t enough money to buy food?</p> <p>46. In the last 12 months, were you ever hungry but didn’t eat because you couldn’t afford enough food?</p>	
6.2.1	<p>42. “The food I/we bought just didn’t last, and I/we didn’t have money to get more.” (Often, sometimes, never true)</p> <p>43. “I/We couldn’t afford to eat balanced meals.” (Often, sometimes, never true)</p>	

Table	Client Question	Agency Question
6.3.1	<p>44a. How often did this happen?</p> <p>45. In the last 12 months, did you ever eat less than you felt you should because there wasn't enough money to buy food?</p> <p>46. In the last 12 months, were you ever hungry but didn't eat because you couldn't afford enough food?</p> <p>47. In the last 12 months, did you ever not eat for a whole day because there wasn't enough money for food?</p>	
6.4.1	<p>3. Age</p> <p>6b. How many of the other people in your household are children less than 18 years old?</p> <p>49. "My child was not eating enough because I/we just couldn't afford enough food." (Often, sometimes, never true)</p> <p>50. In the last 12 months, did your child ever skip meals because there wasn't enough money for food?</p> <p>51. In the last 12 months, was your child ever hungry but you just couldn't afford more food?</p>	
6.5.1	<p>52. In the past 12 months, have you or anyone in your household every had to choose between: paying for food and paying for medicine or medical care; paying for food and paying for utilities or heating fuel; paying for food and paying for rent or mortgage?</p>	
7.1.1	<p>32. Have you ever applied for Food Stamps?</p> <p>33. Are you receiving Food Stamps now?</p> <p>34. Did you receive Food Stamps in the past 12 months?</p> <p>36. How long have you been receiving Food Stamps?</p> <p>37. How many weeks do your Food Stamps usually last?</p>	
7.2.1	<p>38. Why haven't you applied for the Food Stamp Program?</p>	
7.3.1	<p>35. Why don't you receive Food Stamps now?</p>	

Table	Client Question	Agency Question
7.4.1	7a. Do any of your younger-than-school-age children go to day care? 8. Does the government pay part of the cost of day care? 41. In which, if any, of the following programs do you currently participate?	
7.5.1	26. Did you receive general assistance, welfare, or TANF at any time in the <u>past two years</u> ? 27. Was that assistance ever stopped during the past two years? 28. Why was your assistance stopped?	
7.6.1	40. Where do you do <u>most</u> of your grocery shopping?	
8.1.1	20. Would you say your own health is excellent, very good, good, fair, or poor? 21. Is anyone in your household in poor health?	
8.2.1	22a-f. Do you have any of the following kinds of health insurance? 23. Do you have unpaid medical or hospital bills? 24. In the past 12 months, have you been refused medical care because you could not pay or because you had a Medicaid or Medical Assistance card?	
9.1.1	56. How many different food pantries gave you food in the past month? 57. How many different soup kitchens gave you meals in the past month?	
9.2.1	53. Please rate how satisfied you are with the food that you and others in your household receive here. 54. When you come here, how often are you treated with respect by the staff who distribute food?	
9.3.1	55. If this agency weren't here to help you with food, what would you do?	
10.1.1		Agency data
10.2.1		1. Record the total number of emergency shelters, pantries, kitchens, and other programs you currently operate.
10.3.1		1. Record the total number of emergency shelters, pantries, kitchens, and other programs you currently operate.

Table	Client Question	Agency Question
10.4.1		3b. In what year did each selected program open?
10.5.1		4. For each selected program, please indicate which of the following services, if any, are currently being provided.
10.5.2		4. For each selected program, please indicate which of the following services, if any, are currently being provided.
10.5.3		27. Does your agency operate any of the following types of facilities?
10.6.1		28. Type of agency.
10.7.1		18. Do the selected programs currently serve any of the following groups?
10.8.1		7. Compared to 3 years ago, that is, 2001, is this program providing food to more, fewer, same number of clients?
10.9.1		19. In which of the following ways does the client mix change during the year for any of the selected programs?
11.1.1		6. During a typical week, approximately how many meals are served and/or bags or boxes of food distributed by each of the selected programs? 6a. How much does a typical bag or box usually weigh?
11.2.1		6c. How many different persons or households did you serve on the last day you were open? And how many meals were served and/or bags or boxes of food distributed by each of the selected programs on that day?
12.1.1		17. Is the continued operation of the selected programs threatened by one or more serious problems?
12.2.1		13. During the past year, about how often did each of the selected programs have to reduce meal portions or reduce the quantity of food in food packages because of a lack of food?

Table	Client Question	Agency Question
12.3.1		<p>9. During the past year, did the selected programs turn away any clients for <u>any</u> reason?</p> <p>10. For which of the following reasons did each selected program turn clients away?</p> <p>12. During the past year, approximately how many clients did each selected program turn away?</p>
12.3.2		11. What were each selected program's two most frequent reasons for turning away clients?
12.4.1		14. In your opinion, during a <i>typical week</i> , how much <i>more</i> food, if any, does each of the selected programs need in order to adequately meet their demand for food? Your best estimate is fine.
13.1.1		<p>8. For each selected program, approximately what percent of the distributed food comes from the food bank?</p> <p>8a. Do the selected programs distribute government or USDA commodities?</p> <p>8b. Approximately what percent of the distributed food comes from other sources?</p>
13.2.1		<p>15. Currently, how many <u>paid</u> staff are employed by each of the selected programs?</p> <p>16. During the past week, how many volunteers assisted and the number of volunteer hours for each selected program.</p>
13.3.1		23. Please indicate for each selected program, which of the following categories of products are <u>purchased</u> with cash from sources other than your food bank?
14.1.1		24. What categories of food and non-food products do you <u>need</u> that you are not getting now, or need more of from your food bank to meet your clients' needs?
14.2.1		25. If the food supply you receive from your food bank were eliminated, how much of an impact would this have on your program?
14.3.1		26. Does your program need additional assistance in any of the following areas?
